Wondering about God Martin Duran,2019-07-14 This book studies the different forms of religious disbelief in Ancient Greece, from impiety to atheism. It focuses mainly on atheism (both criticism of the Olympian gods and the questioning of the very idea of divinity). It is a historical study that begins with the pre-Socratic philosophers and ends with the appearance of Christianity and its debate with paganism. Special importance is given to great figures such as Socrates or philosophical movements such as Epicureanism.

Saintly Women Nancy Nienhuis,Beverly Mayne Kienzle,2017-12-12 This ground-breaking volume assesses the contemporary epidemic of intimate partner violence and explores how and why cultural and religious beliefs serve to excuse battering and to work against survivors' attempts to find safety. Theological interpretations of sacred texts have been used for centuries to justify or minimize violence against women. The authors recover historical and especially medieval narratives whose protagonists endure violence that is framed by religious texts or arguments. The medieval theological themes that redeem battering in saints' lives—suffering, obedience, ownership and power—continue today in most religious traditions. This insightful book emphasizes Christian history and theology, but the authors signal contributions from interfaith studies to efforts against partner violence. Examining medieval attitudes and themes sharpens the readers' understanding of contemporary violence against women. Analyzing both historical and contemporary narratives from a religious perspective grounds the unique approach of Nienhuis and Kienzle, one that forges a new path in grappling with partner violence. Medieval and contemporary narratives alike demonstrate that women in abusive relationships feel the burden of religious beliefs that enjoin wives to endure suffering and to maintain stable marriages. Religious leaders have reminded women of wives' responsibility for obedience to husbands, even in the face of abuse. In some narratives, however, women create safe places for themselves. Moreover, some exemplary communities call upon religious belief to support their opposition to violence. Such models of historical resistance reveal precedents for response through intervention or protection.

Multiproduct Plants Joachim Rauch,2006-03-06 In the chemical industry, just in time delivery and ever more efficient processes are prime requisites for competitiveness. High end products require a wide product diversity resulting in lower quantities of each single product. The answer to the problem are multiproduct plants designed to meet changing requirements. Already at design stage, different potential requirements are taken into consideration allowing technical equipment to be installed according to the desired product. Reconfiguration can be achieved quickly through exchange of readily available components without costly refitting of the entire plant. This is the first comprehensive source of information on this modern topic, treating the different concepts known for multiproduct plants, their technical realization, possible uses for the production of chemicals, the choice of the construction materials, as well as safety considerations.
