Robogenesis Daniel H. Wilson,2015-03-17 It's been three years since the global uprising of the world's robots, three long years in which ordinary people waged a guerilla war that saved humankind from the brink of annihilation. But a horrific new enemy has emerged, and the resistance is called to fight once again. And in a world where humanity and technology are pushed to the breaking point, their one hope may reside with their former enemy—Archos R-14.

Speak Louisa Hall,2015-07-07 A thoughtful, poignant novel that explores the creation of Artificial Intelligence—illuminating the very human need for communication, connection, and understanding. In a narrative that spans geography and time, from the Atlantic Ocean in the seventeenth century, to a correctional institute in Texas in the near future, and told from the perspectives of five very different characters, *Speak* considers what it means to be human, and what it means to be less than fully alive. A young Puritan woman travels to the New World with her unwanted new husband. Alan Turing, the renowned mathematician and code breaker, writes letters to his best friend's mother. A Jewish refugee and professor of computer science struggles to reconnect with his increasingly detached wife. An isolated and traumatized young girl exchanges messages with an intelligent software program. A former Silicon Valley Wunderkind is imprisoned for creating illegal lifelike dolls. Each of these characters is attempting to communicate across gaps—to estranged spouses, lost friends, future readers, or a computer program that may or may not understand them. In dazzling and electrifying prose, Louisa Hall explores how the chasm between computer and human—shrinking rapidly with today's technological advances—echoes the gaps that exist between ordinary people. Though each speaks from a distinct place and moment in time, all five characters share the need to express themselves while simultaneously wondering if they will ever be heard, or understood.

The Lost Witch Melvin Burgess,2020-05-07 Bea has started to hear and see things that no one else can--creatures, voices, visions. Then strangers visit Bea and tell her she is different: she has the rare powers of a witch. They warn her she is being hunted. Her parents think she is hallucinating and needs help. All Bea wants to do is get on with her life, and to get closer to Lars, the mysterious young man she has met at the skate park. But her life is in danger, and she must break free. The question is--who can she trust? Carnegie Medal-winner Melvin Burgess returns with a powerful, thrilling fantasy for young adults about magic, myth, and following your instincts.

The Dynamics of Cultural Nationalism John Hutchinson,2023-11-06 First published in 1987, *The Dynamics of Cultural Nationalism* demonstrates the nature and role of cultural nationalism as a separate movement in the creation of modern nations. This is done through an intensive study of the modern Irish movements, and in particular the Gaelic revival at the end of the nineteenth century, which makes clear the importance of cultural nationalism as a vision and politics in its own right. The author, by approaching his material as both historian and sociologist, is able to illuminate the Irish case of nationalism by placing it in a broad, comparative perspective, showing how cultural nationalism has often provided those answers to the problems of nation building and the rediscovery of national identity that political nationalism failed to provide. This book will be of interest to all those in the social sciences and history who are concerned with problems of national identity, the uses of history and culture in the creation of modern nations, and the particular case of the development of nationalist movements in Ireland.

Maradona Diego Armando Maradona,2011-02-08 Argentina history book about the controversial Diego Maradona A soccer biography for kids Follows the author's journey from childhood to 1994 "Sometimes I think that my whole life is on film, that my whole life is in print. But it's not like that. There are things which are only in my heart—that no one knows. At last I have decided to tell everything." —Diego Maradona Diego Maradona went from a poor boy in a Buenos Aires shanty town to a genius

with the soccer ball. He kicked his way to the top of South American, European, and world soccer, but his battles with the many pressures of life inside and outside the game consistently threatened to tear his legend and his spirit down. He is one of many famous soccer players, but one of only a few to write their own soccer autobiography. Villain or hero, one thing about Maradona is clear: he was the best soccer player of his generation and possibly of all time. He has never shared his remarkable story in his own words—until this autobiography. From his poverty-stricken origins to his greatest successes on the field, Maradona remembers, with frankness and insight, the most impactful moments of his life. These include the pressures of being a child prodigy, the infamous semi-final game against England in the 1986 World Cup, an amazing turn-around and the dream-turned-sour at Napoli, and the disgrace and shame of his positive drug test at USA 1994. In this brutally honest autobiography, readers glimpse the inner thoughts of one of the most controversial, talented, and complex professional athletes of the times. He was a man divided between the demands of his corporate club bosses, the media, the fans, and his own tempestuous personal life. With a new epilogue that updates Maradona's amazing story and includes over 80 delightful photographs, Maradona is a confessional, a revelation, an apology, and a celebration.

Advances on remote laboratories and e-learning experiences Luís Gomes, Javier Garcia Zubia, 2008 This book provides a comprehensive overview on several aspects of remote laboratories development and usage, and their potential impact in the teaching and learning processes using selected e-learning experiences. The book is based on the presentations and discussions carried out at «International Meeting on Professional Remote Laboratories», which took place in University of Deusto, Bilbao, in the period of November 16-17, 2006. Apart from chapters based on the presentations, some others have also been included in this book. In this way, we hope to give a broad, well balanced and up-to-date picture of the current status of remote labs and their role within the e-learning paradigm.

The Emotion and the Truth Mariano Aguirre, Francisco Ferrándiz, 2002 This is a book about modern wars in fragile state, one of the most important issues in the international system, and how the media, the academic and non-governmental organizations understand, act towards, interact among them and provide knowledge about these armed conflicts.

Working in Conflict - Working on Conflict Pat Gibbons, Brigitte Piquard, 2006-01-01 The intensification and multiplicity of protracted conflicts, the blurring of traditional distinctions between war zones and safe areas, together with increased difficulties in distinguishing between belligerents and civilian population have all served to worsen the fate of innocent victims and to complicate the work of those who try to assist them. Actors who claim space under the humanitarian banner are guided by varying principles of humanitarianism or employ different interpretations of a small number of acknowledged humanitarian principles. This book addresses some of the main challenges and dilemmas of contemporary humanitarian work. It presents a selection of papers from a high level forum that the Network on Humanitarian Assistance (NOHA) convened in 2003 as an introductory course to its Joint European Master's in International Humanitarian Action. The event gathered over two hundred participants including researchers, policy makers, practitioners, and postgraduate students from around the world. The first section of the book explores the meaning of the «humanitarian» concept. The second analyses the evolving mandates of humanitarian actors under a number of broad groupings and, finally, the third examines the scope of the humanitarian business and the relationship between humanitarian action and conflict transformation - hence the title working in conflict/working on conflict.

Rethinking Peace Robert Elias, Jennifer E. Turpin, 1994 With the development of the atomic bomb, Albert Einstein remarked that everything had changed except our thinking about the world. Einstein and Bertrand Russell warned us that we have to learn to think in a new way shall we put an end to the human race; or shall we renounce war?
