Cultural Translation in Early Modern Europe Peter Burke, R. Po-chia

Hsia, 2007-03-29 This groundbreaking 2007 volume gathers an international team of historians to present the practice of translation as part of cultural history. Although translation is central to the transmission of ideas, the history of translation has generally been neglected by historians, who have left it to specialists in literature and language. This book seeks to achieve an understanding of the contribution of translation to the spread of information in early modern Europe. It focuses on non-fiction: the translation of books on religion, history, politics and especially on science, or 'natural philosophy', as it was generally known at this time. The chapters cover a wide range of languages, including Latin, Greek, Russian, Turkish and Chinese. The book will appeal to scholars and students of the early modern and later periods, to historians of science and of religion, as well as to anyone interested in translation studies.

Language and Power in the Early Middle Ages Patrick J. Geary, 2013 Language and ideology in the scholarship of the late Middle Ages

The Fictions of Translation Judith Woodsworth, 2018-02-15 In *The Fictions of Translation*, emerging and seasoned scholars from a range of cultures bring fresh perspectives to bear on the age-old practice of translation. The current movement of people, knowledge and goods around the world has made intercultural communication both prevalent and indispensable. Consequently, the translator has become a more prominent figure and translation an increasingly present theme in works of literature. Embedding translation in a fictional setting and considering its most extreme forms – pseudotranslation or self-translation, for example – are fruitful ways of conceptualizing the act of translating and extending the boundaries of translation studies. Taken together, the various translational fictions examined in this collection yield new insights into questions of displacement, migration and hybridity, all characteristic of the modern world. *The Fictions of Translation* will thus be of interest to practising translators, students and scholars of translation and literary studies, as well as a more general readership.

Exploring Translation Theories Anthony Pym, 2017-11-27 *Exploring Translation Theories* presents a comprehensive analysis of the core contemporary paradigms of Western translation theory. The book covers theories of equivalence, purpose, description, uncertainty, localization, and cultural translation. This second edition adds coverage on new translation technologies, volunteer translators, non-linear logic, mediation, Asian languages, and research on translators' cognitive processes. Readers are encouraged to explore the various theories and consider their strengths, weaknesses, and implications for translation practice. The book concludes with a survey of the way translation is used as a model in postmodern cultural studies and sociologies, extending its scope beyond traditional Western notions. Features in each chapter include: An introduction outlining the main points, key concepts and illustrative examples. Examples drawn from a range of languages, although knowledge of no language other than English is assumed. Discussion points and suggested classroom activities. A chapter summary. This comprehensive and engaging book is ideal both for self-study and as a textbook for Translation theory courses within Translation Studies, Comparative Literature and Applied Linguistics.

Discovering the Riches of the Word, 2015-02-24 The contributions to *Discovering the Riches of the Word. Religious Reading in Late Medieval and Early Modern Europe* explore new approaches to the study of religious reading in a long term (from the thirteenth to the seventeenth century) and geographically broad perspective.

The Language of the Gods in the World of Men Sheldon Pollock, 2009-06 The scholarship exhibited here is not only superior; it is in many ways staggering. The author's control of an astonishing range of primary and secondary texts from many languages, eras, and disciplines is awe-inspiring. This is a learned, original, and important work.—Robert Goldman, Sanskrit and India Studies, University of California, Berkeley

The Wycliffite Bible: Origin, History and Interpretation, 2016-09-27 The Wycliffite Bible: Origin, History and Interpretation offers new perspectives and research by leading scholars on the first complete translation of the Bible into English produced at the end of the 14th century by the followers of John Wyclif.

The Medieval Translator: Actas del Coloquio Internacional de Conques (26-29 de julio, 1993) Roger Ellis, René Tixier, 1996

A Companion to the Hussites Michael Van Dussen, Pavel Soukup, 2020 The Hussites, as the Bohemian reformists have come to be called, became one of the most vocal and influential reform movements of the late Middle Ages, with significance for the reformations of the sixteenth century and later. They represented an interchange between town and gown that was largely unprecedented in medieval Europe. Scholarship on the Hussites has a long and distinguished tradition, and current studies must continually contend with a historiography that is implicated in the nationalism, confessionalism, and politics of the nineteenth and twentieth centuries. This volume gives students and scholars a clear sense of the historiography and current trends in Hussite studies, as well as concise statements on major emphases in Hussite theology, ecclesiology, philosophy, and religious practice. Contributors are: Eliska Baťová, Pavlína Cermanová, Dusan Coufal, Phillip Haberkern, Ota Halama, David Holeton, Stephen Lahey, Jindřich Marek, Pavel Kolář, Olivier Marin, Petra Mutlová, Pavlína Rychterová, Pavel Soukup, Michael Van Dussen, and Blanka Zilynská.

The Birth of Identities Brian Patrick McGuire, 1996

The Theory and Practice of Translation in the Middle Ages Rosalynn Voaden, 2003 The interest of the writers of these essays in the intricacies and implications of translation in the Middle Ages, or of the translation of medieval texts in the modern period, has resulted in a diverse and intellectually stimulating volume. The papers in this volume, written in either English, French, or Spanish, approach translation from a wide variety of perspectives and offer a range of interpretations of the concept of translation. The volume contains essays ranging in time from the Anglo Saxon period to the present, and in topic from medieval recipe books to arguments in favour of women administering the sacrament. Languages studied include non-European languages as well as Latin and numerous European vernaculars as both source and target languages. As any translator or student of translation quickly becomes aware, it is impossible to divorce language from culture. All the contributors to this volume struggle with the complexities of translation as a cultural act, even when the focus would seem to be specifically linguistic. It is these complexities which lend the study of the theory and practice of translation in the Middle Ages its enduring fascination

Pursuing a New Order Pavlína Rychterová, Julian Ecker, 2018 Concentrating on the period of advance of the vernaculars in the context of religious text production in Central and Eastern Central Europe from the fourteenth until the sixteenth century, the individual

studies in this volume present material so far neglected by the nationally defined historiographies and literary studies. The process of vernacularization created a new sociolinguistic field for the negotiation of social order through the choice of texts and topics. The volume seeks to answer the question whether, why and how distinctive new communicative, literary, and political cultures developed after the vernacular languages had acquired ever higher levels of literacy and education. The volume fills a gap of contemporary scholarship on the role of the vernaculars and vernacular literatures in European medieval societies and with the focus on the Eastern European regions it breaks new ground in regard to questions that have so far only been explored based on material from Europe's 'West'.

Comparative and Transnational History Heinz-Gerhard Haupt, Jürgen Kocka, 2012 Since the 1970s West German historiography has been one of the main arenas of international comparative history. It has produced important empirical studies particularly in social history as well as methodological and theoretical reflections on comparative history. During the last twenty years however, this approach has felt pressure from two sources: cultural historical approaches, which stress microhistory and the construction of cultural transfer on the one hand, global history and transnational approaches with emphasis on connected history on the other. This volume introduces the reader to some of the major methodological debates and to recent empirical research of German historians, who do comparative and transnational work.

Word and Language Roman Jakobson, 2010-12-14

Cultures of Translation Klaus Stierstorfer, Monika Gomille, 2008 The essays of this volume reflect the tremendous semantic extension the term 'translation' has experienced in the recent debates, which have transformed it into a key term in current issues about language, literature and culture. In the wake of the culture concepts of the 1980s, translation has emerged as the central analytical term for the contact of cultures, while the poststructuralist idea of the infinite chain of the signification process has helped to establish it as a dynamic model. In the course of recent research developments, the issues discussed in an ever-widening field of translation studies began to interconnect with issues discussed in equally topical and newly-established research areas of postcolonial studies and questions of 'World Englishes' and their lively cultural and literary exchanges. The essays of this volume take up and develop this general premise of a close interrelationship in processes of translation between language and culture, and the resulting linkage in the study of these processes between research in language and translation studies, on the one hand, and cultural and literary studies, on the other. The thematic scope stretches across the entire spectrum from issues in translations from one language and culture to another, through problems of and new avenues for cultural interchange as presented in works of art, to questions of translation theory and intercultural exchange on the most general level.

All Things in the Bible [2 volumes] Nancy M. Tischler, 2006-04-30 The Bible is the central text of Western civilization, and an understanding of it is vital to the study of world history and culture. In addition, more and more high school and college students are studying the Bible as literature. Monumental in scope and written especially for high school students and general readers, this encyclopedia surveys the material culture, customs, and beliefs of the biblical world. Included are more than 200 alphabetically arranged entries on the tools, animals, foods, habits, laws, professions, and peoples of the Bible. Each entry provides definitions; scriptural references; etymological, historical, and archaeological information; and, when possible, a discussion of the relevance of the topic to modern readers. Entries include cross-references and cite works for further reading, and the encyclopedia is generously illustrated. In addition, it explains many of the major events in Israel's history, the accepted concept of cosmology and weather, and the common understanding of many details from the Creation to Armageddon.

Translation of Cultures Petra Wittke-Rüdiger, Konrad Gross, 2009 The contributors to this collection approach the subject of the translation of cultures from various angles. Translation refers to the rendering of texts from one language into another and the shift between languages under precolonial (retelling/transcreation), colonial (domestication), and postcolonial (multilingual trafficking) conditions.
