Street Art of Resistance Sarah H. Awad, Brady Wagoner, 2018-02-08 This book explores how street art has been used as a tool of resistance to express opposition to political systems and social issues around the world. Aesthetic devices such as murals, tags, posters, street performances and caricatures are discussed in terms of how they are employed to occupy urban spaces and present alternative visions of social reality. Based on empirical research, the authors use the framework of creative psychology to explore the aesthetic dimensions of resistance that can be found in graffiti, art, music, poetry and other creative cultural forms. Chapters include case studies from countries including Brazil, Canada, Chile, Denmark, Egypt, Ireland, Mexico and Spain to shed new light on the social, cultural and political dynamics of street art not only locally, but globally. This innovative collection will be of particular interest to scholars of social and political psychology, urban studies and the wider sociologies and is essential reading for all those interested in the role of art in social change.

Media and Suicide Thomas Niederkrotenthaler, Steven Stack, 2017-07-28 Somewhere in the world, in the next forty seconds, a person is going to commit suicide. Globally, suicides account for 50 percent of all violent deaths among men and 71 percent for women. Despite suicide prevention programs, therapy, and pharmacological treatments, the suicide rate is either increasing or remaining high around the world. *Media and Suicide* holds traditional and emergent media accountable for influencing an individual's decision to commit suicide. Global experts present research, historical analysis, theoretical disputes (including discussion on the Werther and Papageno effects), and policy regarding the media's impact on suicide. They answer questions about the effects of different types of media and storytelling, show how the impact of social media can be diminished, discuss internet bullying, mass-shootings and mass-suicides, show the effects of recovery stories, and much more. The editors also present examples of suicide policy in the United States, Switzerland, the United Kingdom, Ireland, and Hong Kong on how to best communicate reporting guidelines to decrease the copycat effect, especially in less developed nations where most of the world's nearly one million suicides occur each year. Although there is much work to be done to prevent media-influenced suicide, this innovative volume will contribute a large piece to this complex puzzle.

Gifts for the Gods Lidija Mary McKnight, Stephanie Atherton-Woolham, 2015 The role of animal mummies as votive offerings in ancient Egypt and how their discovery, excavation, collection, curation, conservation and scientific study by the British contributes to our knowledge of this enigmatic and little-understood practice.

How to Hack Like a GHOST Sparc Flow, 2020-02-29 There are a thousand and one ways to hack an Active Directory environment. But, what happens when end up in a full Cloud environment with thousands of servers, containers and not a single Windows machine to get you going? When we land in an environment designed in the Cloud and engineered using the latest DevOps practices, our hacker intuition needs a little nudge to follow along. How did the company build their systems and what erroneous assumptions can we take advantage of? This book covers the basics of hacking in this new era of Cloud and DevOps: Break container isolation, achieve persistence on Kubernetes cluster and navigate the treacherous sea of AWS detection features to make way with the company's most precious data. Whether you are a fresh infosec student or a Windows veteran, you will certainly find a couple of interesting tricks to help you in your next adventure.

Walls of Freedom Basma Hamdy, 2013 A powerful portrayal of the Egyptian Revolution, telling the story with striking images of art that turned Egypt's walls into a visual testimony of bravery and resistance. Even the army tanks that rolled onto Tahrir Square were immediately adorned with graffiti. This survey of current Egyptian street art looks at the most influential artists who have made their iconic marks on the streets. Spanning Cairo, Alexandria and Luxor, this is a document of the volatile and fast-shifting political situation there. Since the start of the Arab revolution the Middle East has seen an unparalleled explosion of graffiti. * With contributions by experts in the fields of typography, graphic design, sociology and Egyptology These images of the revolution taken by acclaimed photographers and activists places the graffiti of the revolution in a broader context, and examines the historical, socio-political and cultural backgrounds which have shaped the movement.

Handbook of Culture and Memory Brady Wagoner, 2018 In 'Handbook of Culture and Memory', an interdisciplinary group of contributors provide new models of the complex interrelationships between people's memory and their social relationships, group stories and history, monuments, rituals and material artifacts.

The Constructive Mind Brady Wagoner, 2017-02-16 The Constructive Mind is an integrative study of the psychologist Frederic Bartlett's (1886–1969) life, work and legacy. Bartlett is most famous for the idea that remembering is constructive and for the concept of schema; for him, 'constructive' meant that human beings are future-oriented and flexibly adaptive to new circumstances. This book shows how his notion of construction is also central to understanding social psychology and cultural dynamics, as well as other psychological processes such as perceiving, imagining and thinking. Wagoner contextualises the development of Bartlett's key ideas in relation to his predecessors and contemporaries. Furthermore, he applies Bartlett's constructive analysis of cultural transmission in order to chart how his ideas were appropriated and transformed by others that followed. As such this book can also be read as a case study in the continuous reconstruction of ideas in science.

Handbook of Imagination and Culture Tania Zittoun, Vlad Petre Glăveanu, 2018 The Handbook of Imagination and Culture is a unique interdisciplinary collection of chapters showing the centrality of imagination in the development of persons and societies. This book brings together a group of psychologists, philosophers, social scientists, and artists to explore imagination through psychological, social, and cultural processes.

The Palgrave Handbook of Creativity and Culture Research Vlad Petre Glăveanu, 2017-01-21 This groundbreaking Handbook brings together leading international experts in creativity and culture research to provide an overview of current debates. It showcases the wealth of topics, approaches and definitions specific for this new, interdisciplinary field within creativity research. The theoretical and methodological innovations emerging from the joint study of creativity and culture highlight the role of creativity within today's innovation-based, multicultural societies. Drawing on theoretical and empirical reflections, including case studies from different continents and different creative domains, this Handbook provides a truly global outlook on current creativity research within an emergent, interdisciplinary field. This variety is highlighted by the Handbook's structure as it is divided into five sections: Creativity and Culture in the Psychology of Creativity; Creativity in Socio-Cultural Psychology; Creativity in Cultural Context; Creativity and Culture in Applied Domains; Cross-disciplinary Perspectives on Creativity and Culture. These sections provide a clear overview of the debates and questions of this research area as contributors share their interest in creativity not only as an individual but also a social and cultural phenomenon, and in culture as both the foundation and outcome of creative action. The Handbook will be an essential resource for researchers, particularly those based in social science and humanities disciplines.

Culture and Social Change Brady Wagoner, Eric Jensen, Julian A. Oldmeadow, 2012-09-01 This book brings together social scientists to create an interdisciplinary dialogue on the topic of social change as a cultural process. Culture is as much about novelty as it is about tradition, as much about change as it is about stability. This dynamic tension is analyzed in collective protests, intergroup dynamics, language, mass media, science, community participation, art, and social transitions to capitalism, among others contexts. These diverse cases illustrate a number of key factors that can propel, slow-down and retract social change. An emancipatory and integrative social science is developed in this book, which offers a new explanatory model of human behavior and thought under conditions of institutional and societal change.

Creativity – A New Vocabulary Vlad Petre Glăveanu, Lene Tanggaard Pedersen, Charlotte Wegener, 2016-04-08 This book covers topics not commonly associated with creativity that offer us insight into creative action as a social, material, and cultural process. A wide range of specialists within the humanities and social sciences will find this interesting, as well as practitioners who are looking for novel ways of thinking about and doing creative work.

Rethinking Creativity Vlad Petre Glăveanu, Alex Gillespie, Jaan Valsiner, 2014-07-25 Despite more than half a century of psychological research on creativity we are still far from a clear understanding of the creative process, its antecedents and consequences and, most of all, the ways in which we can effectively support creativity. This is primarily due to a narrow focus on creative individuals isolated from culture and society. Rethinking Creativity proposes a fundamental review of this position and argues that creativity is not only a psychological but a sociocultural phenomenon. This edited volume aims to relocate creativity from inside individual minds to the material, symbolic and social world of culture. It brings together eminent social and cultural psychologists who study dynamic, transformative and emergent phenomena, and invites them to conceptualise creativity in ways that depart from mainstream definitions and theoretical models existing in past and present literature on the topic. Chapters include reflections on the relationship between creativity and difference, creativity as a process of symbolic transformation, the role of apprenticeships and collaboration, the importance of considering materiality and affordances in creative work, and the power of imagination to construct individual trajectories. The diverse contributions included in this book offer readers multiple pathways into the intricate relationship between mind, culture, and creativity, and invite them to rethink these phenomena in ways that foster creative action within their own life and the lives of those around them. It will be of key interest to both social and cultural psychologists, as well as to creativity researchers and those who, as part of their personal or professional life, try to understand creativity and develop creative forms of expression.

Distributed Creativity Vlad Petre Glăveanu, 2014-03-28 This book challenges the standard view that creativity comes only from within an individual by arguing that creativity also exists 'outside' of the mind or more precisely, that the human mind extends through the means of action into the world. The notion of 'distributed creativity' is not commonly used within the literature and yet it has the potential to revolutionise the way we think about creativity, from how we define and measure it to what we can practically do to foster and develop creativity. Drawing on cultural psychology, ecological psychology and advances in cognitive science, this book offers a basic framework for the study of distributed creativity that considers three main dimensions of creative work: sociality, materiality and temporality. Starting from the premise that creativity is distributed between people, between people and objects and across time, the book reviews theories and empirical examples that help us unpack each of these dimensions and above all, articulate them into a novel and meaningful conception of creativity as a simultaneously psychological and socio-material process. The volume concludes by examining the practical implications in adopting this perspective on creativity.

Symbolic Transformation Brady Wagoner, 2009-12-04 Brings together scholars in the social sciences from around the world, to address the question of how mind and culture are related through symbols

Constraints of Agency Craig W. Gruber, Matthew G. Clark, Sven Hroar Klempe, Jaan Valsiner, 2014-11-03 This book explores the basic concept of agency and develops it further in psychology using it to better understand and explain psychological processes and behavior. More importantly, this book seeks to put an emphasis on the role of agency in four distinct settings: history of psychology, neuroscience, psychology of religion, and sociocultural theories of co-agency. In Volume 12 of the Annals of Theoretical Psychology the contributors explore a number of new ways to look at agency in psychology. This volume seeks to develop a systematic theory of axioms for agency. It describes implications for research and practice that are founded on an understanding of the person as an actor in the world. This book also has implications for research and practice across psychology's sub-fields uniting the discipline through an agentic view of the person

Resistance in Everyday Life Nandita Chaudhary, Pernille Hviid, Giuseppina Marsico, Jakob Waag Villadsen, 2017-07-10 This book is about resistance in everyday life, illustrated through empirical contexts from different parts of the world. Resistance is a widespread phenomenon in biological, social and psychological domains of human cultural development. Yet, it is not well articulated in the academic literature and, when it is, resistance is most often considered counter-productive. Simple evaluations of resistance as positive or negative are avoided in this volume; instead it is conceptualised as a vital process for human development and well-being. While resistance is usually treated as an extraordinary occurrence, the focus here is on everyday resistance as an intentional process where new meaning constructions emerge in thinking, feeling, acting or simply living with others. Resistance is thus conceived as a meaning-making activity that operates at the intersection of personal and collective systems. The contributors deal with strategies for handling dissent by individuals or groups, specifically dissent through resistance. Resistance can be a location of intense personal, interpersonal and cultural negotiation, and that is the primary reason for interest in this phenomenon. Ordinary life events contain innumerable instances of agency and resistance. This volume discusses their manifestations, and it is therefore of interest for academics and researchers of cultural psychology, cultural studies, anthropology, sociology, and human development.

Dialogicality in Focus Mariann Märtsin, 2011 The phenomenon which dialogism addresses is human interaction. It enables us to conceptualise human interaction as intersubjective, symbolic, cultural, transformative and conflictual, in short, as complex. This book focuses on dialogicality itself to interrogate the concepts and methods which are taken for granted in the burgeoning literature.
