**Periodization in the Art Historiographies of Central and Eastern Europe** Shona Kallestrup, Magdalena Kunińska, Mihnea Alexandru Mihail, Anna Adashinskaya, Cosmin Minea, 2022-06-07 This volume critically investigates how art historians writing about Central and Eastern Europe in the late nineteenth and early twentieth centuries engaged with periodization. At the heart of much of their writing lay the ideological project of nation-building. Hence discourses around periodization – such as the mythicizing of certain periods, the invention of historical continuity and the assertion of national specificity – contributed strongly to identity construction. Central to the book's approach is a transnational exploration of how the art histories of the region not only interacted with established Western periodizations but also resonated and 'entangled' with each other. In their efforts to develop more sympathetic frameworks that refined, ignored or hybridized Western models, they sought to overcome the centre–periphery paradigm which equated distance from the centre with temporal belatedness and artistic backwardness. The book thus demonstrates that the concept of periodization is far from neutral or strictly descriptive, and that its use in art history needs to be reconsidered. Bringing together a broad range of scholars from different European institutions, the volume offers a unique new perspective on Central and Eastern European art historiography. It will be of interest to scholars working in art history, historiography and European studies.

**Statistical Paradigms** Ashis SenGupta, Tapas Samanta, Ayanendranath Basu, 2014-10-03 This volume consists of a collection of research articles on classical and emerging Statistical Paradigms — parametric, non-parametric and semi-parametric, frequentist and Bayesian — encompassing both theoretical advances and emerging applications in a variety of scientific disciplines. For advances in theory, the topics include: Bayesian Inference, Directional Data Analysis, Distribution Theory, Econometrics and Multiple Testing Procedures. The areas in emerging applications include: Bioinformatics, Factorial Experiments and Linear Models, Hotspot Geoinformatics and Reliability. Contents: Reviews: Weak Paradoxes and Paradigms (Jayanta K Ghosh) Nonparametrics in Modern Interdisciplinary Research: Some Perspectives and Prospectives (Pranab K Sen) Parametric: Bounds on Distributions Involving Partial, Marginal and Conditional Information: The Consequences of Incomplete Prior Specification (Barry C Arnold) Stepdown Procedures Controlling a Generalized False Discovery Rate (Wenge Guo and Sanat K Sarkar) On Confidence Intervals for Expected Response in  $2^n$  Factorial Experiments with Exponentially Distributed Response Variables (H V Kulkarni and S C Patil) Predictive Influence of Variables in a Linear Regression Model when the Moment Matrix is Singular (Md Nurul Haque Mollah and S K Bhattacharjee) New Wrapped Distributions — Goodness of Fit (A V Dattatreya Rao, I Ramabhadra Sarma and S V S Girija) Semi-Parametric: Non-Stationary Samples and Meta-Distribution (Dominique Guégan) MDL Model Selection Criterion for Mixed Models with an Application to Spline Smoothing (Antti Liski and Erkki P Liski) Digital Governance and Hotspot Geoinformatics with Continuous Fractional Response (G P Patil, S W Joshi and R E Koli) Bayesian Curve Registration of Functional Data (Z Zhong, A Majumdar and R L Eubank) Non-Parametric & Probability: Nonparametric Estimation in a One-Way Error Component Model: A Monte Carlo Analysis (Daniel J Henderson and Aman Ullah) GERT Analysis of Consecutive-k Systems: An Overview (Kanwar Sen, Manju Agarwal and Pooja Mohan) Moment Bounds for Strong-Mixing Processes with Applications (Ratan Dasgupta) Readership: Researchers, professionals and advanced students working on Bayesian and frequentist approaches to statistical modeling and on interfaces for both theory and applications. Key Features: A scholarly and motivating review of non-parametric methods by P K Sen, winner of the Wilks Medal in 2010 Discussion of paradoxes of the frequentist and

Bayesian paradigms, related counterexamples, and their implications  
Stands out in terms of the width and depth  
Keywords: Bayesian Inference; Design of Experiments; Econometrics; Hotspot Geoinformatics; Linear Models and Regression Analysis; Multiple Testing Procedures; Probability Distributions for Linear and Directional Data; Reliability

*A Textbook in Classical Tibetan* Joanna Bialek, 2022-03-21 A Textbook in Classical Tibetan is the first comprehensive course book in the Classical Tibetan language written in English. The textbook describes the grammar of pre-16th-century Classical Tibetan works for beginners and students of intermediate level. It is intended to cover the most essential topics that can be mastered within two semesters of an academic class. Classical Tibetan is a written Middle Tibetan language that has been in use in Tibet from the 9th century. Until the early 20th century it served all purposes, from administrative, to medical, to religious. Nowadays Classical Tibetan remains an important part of religious identity and services for communities also outside of cultural Tibet, foremost in India, Nepal, and Bhutan, but also elsewhere, most importantly in Europe, North America and Australia. The main body of the textbook consists of an introduction to the Tibetan script, eighteen lessons, and a reading section. Each lesson elucidates several grammatical topics which are followed by an exercise and a word list. The chapter readings contain four supplementary readings. In addition to the main parts of the textbook, a brief introduction to Tibetic languages provides linguistic context for the language taught in the textbook, whereas the chapter Translations of Exercises and Readings contains translations and explanatory notes to the exercises provided at the end of each lesson, as well as to the readings. A Textbook in Classical Tibetan is essential reading for both undergraduate and graduate students without any knowledge of Classical Tibetan, but also for those who would like to deepen their experience of the language by reading annotated excerpts from well-known pieces of Tibetan literature.

*Creative Nonfiction in Sport and Exercise Research* Francesca Cavallerio, 2021-11-18 Academics around the world recognise the effectiveness of storytelling as a way to engage audiences in conversations, raising awareness of issues, and encouraging change. Stories are now seen as the best medium to convey information to diverse audiences. This book explores a novel approach to representing research findings through the adoption of creative nonfictional stories (CNF). At a time when dissemination of scientific research is constantly highlighted as a fundamental aspect for academics, CNF represents an opportunity to effectively communicate science to non-academic audiences through stories. By providing practical examples of how to transform findings into compelling stories rooted in data, following the mantra of showing rather than telling, which characterises CNF, *Creative Nonfiction in Sport and Exercise Research* helps researchers – qualitative, quantitative, established professors, and students – to turn their research into stories. A unique contribution to the field, this book is the first in the sport and exercise research field to take scholars on a discovery journey, moving from their classic realist to a more creative, compelling, but still rigorous representation of research findings. The book features chapters written by authors from different sport research backgrounds, who present the findings of a previously published ‘classic’ study rewritten in the form of a story. Reflective chapters focusing on the how-to and the challenges of this creative analytical practice complete the work, to support scholars in developing their creative skills.

*My Woodwork Notebook* Cnyto Hobby Media, 2019-09-26 Ideal gift for the hobbieist in your life - 6x9 119 lined page journal - unique funny gift!

*Global Trafficking Networks on Film and Television* César Albarrán-Torres, 2021-03-07 This book draws on a multi-method study of film and television narratives of global criminal networks to explore the links between audiovisual media, criminal networks and global audiences in the age of digital content

distribution. Mapping out media representations of the ongoing war on drugs in Mexico and the United States, the author delves into the social, cultural and geopolitical impacts of distribution and consumption of these media. With a particular emphasis on the globalized Mexican cartels, this book investigates three areas – gender and racial representation in film and television, the digital distribution of content through the internet and streaming services such as Hulu and Netflix, and depictions of extreme violence in film, television and online spaces – to identify whether there are fundamental similarities and differences in how Hollywood productions reproduce stereotypes about race, gender and extreme violence. Some of the movies and television series analysed are *Breaking Bad*, *Ozark*, *Weeds*, *Rambo: Last Blood*, *No Country for Old Men*, *Sicario* and the Netflix series *Narcos*, *Narcos: Mexico* and *El Chapo*. Taking a unique interdisciplinary approach to the study of cartels in the media, this book will be of interest to students and scholars of media studies, film, television, security studies, Latin American and cultural studies.

World Literature Decentered Ian Almond, 2021-07-13 What would world literature look like, if we stopped referring to the “West”? Starting with the provocative premise that the “‘West’ is ten percent of the planet”, *World Literature Decentered* is the first book to decenter Eurocentric discourses of global literature and global history – not just by deconstructing or historicizing them, but by actively providing an alternative. Looking at a series of themes across three literatures (Mexico, Turkey and Bengal), the book examines hotels, melancholy, orientalism, femicide and the ghost story in a series of literary traditions outside the “West”. The non-West, the book argues, is no fringe group or token minority in need of attention – on the contrary, it constitutes the overwhelming majority of this world.

Athletic Development Caroline Heaney, Nichola Kentzer, Ben Oakley, 2021-07-11 *Athletic Development: A Psychological Perspective* is an examination of the psychological factors that help or hinder the development of participants in sport. This includes influences such as families, coach-athlete interactions, and transitional episodes on an individual’s pathway in sport. This edited collection of topical chapters shines a unique psychological perspective on the athlete’s development through sport. It explores a range of contemporary themes that influence athlete’s development including: An introduction to athletic development which orientates a holistic, psychological perspective of the athletic development process. Social influences on athletic development, which explores the impact of varied social influences (e.g., coach, family, peers, school) on sports participation and performance from a psychological perspective. Athlete wellbeing, which explores various aspects influencing mental health and welfare as an athlete progresses through their sports career. The book combines key theory with illustrative case studies, to analyse the complexities of athletic development. It takes a critical perspective highlighting some of the debates and controversies in these areas and uses spotlight boxes in each chapter to focus on questions or topics of particular interest. *Athletic Development: A Psychological Perspective* is a key reader for all students in the fields of sport and exercise psychology, sport coaching, and related sport science subjects.

**Unsustainable World** Peter N. Nemetz, 2022-02-27 Using a cross-disciplinary, science- and economics-based approach, this book provides a sobering and comprehensive assessment of the multifaceted barriers to achieving sustainability at a global level. Organized into three parts, the book defines sustainability in part I and sets the context of the historical and current difficulties facing the world today. In parts II and III, it outlines the sustainability challenges faced in transportation, manufacturing, and agriculture, and then in turn addresses the solutions, conditional solutions, and nonsolutions to these challenges. These

include electric and autonomous automobiles, nuclear power, renewable energy, geoengineering, and carbon capture and storage. The author attempts to differentiate among those proposed solutions and discusses which are most promising and which are infeasible, counterproductive, and potentially a waste of time and money. In each of the book's chapters, the scientific evidence is presented in detail, in keeping with the advice of the young Swedish climate activist, Greta Thunberg, to let the science speak for itself. The author outlines why sustainability is unlikely to be achieved in several key areas of human endeavor and readers are challenged to weigh the scientific evidence for themselves. Using an economic business-based approach, this book introduces students and general readers to the challenges of sustainability and the environmental difficulties facing humanity today.

*The Science and Practice of Middle and Long Distance Running* Richard C. Blagrove, Philip R. Hayes, 2021-03-30 The popularity of distance running as a sport, and a recreational activity, is at an all-time high. Motivated by the desire to achieve a personal best, remain healthy, or simply complete an event, distance runners of all ages and abilities actively seek out advice from experienced coaches and sport scientists. This is also reflected in the growth of programmes of education for young coaches and aspiring sport scientists in recent years. There are a multitude of different approaches to training distance runners; however, the basic principles and ingredients required for success are applicable to any distance runner. The science that underpins the training and physical preparation of distance runners has developed considerably in recent years. The most experienced and successful coaches in the distance running community rarely have the opportunity to share their tried and tested methods of training. Similarly, the novel work of sport scientists is often only accessible to elite runners, their support teams and academia. *The Science and Practice of Middle and Long Distance Running* links together the science and coaching artistry associated with preparing distance runners for events ranging from 800 m up to ultra-marathon distances. It combines the latest scientific evidence, published by world-leading sport scientists, with the sound training principles and strategies adopted by experienced coaches. The book translates cutting-edge scientific research from the fields of physiology, biomechanics, psychology and nutrition into practical suggestions for achieving success. Important topical issues and contemporary practices related to health and performance are also addressed. This book is an essential addition to the library of any distance runner, coach or sport scientist.

*Forensic Science* Kathy Mirakovits, Jay A Siegel, 2021-07-05 *Forensic Science: The Basics*, Fourth Edition is fully updated, building on the popularity of the prior editions. The book provides a fundamental background in forensic science, criminal investigation and court testimony. It describes how various forms of evidence are collected, preserved and analyzed scientifically, and then presented in court based on the analysis of the forensic expert. The book addresses knowledge of the natural and physical sciences, including biology and chemistry, while introducing readers to the application of science to the justice system. New topics added to this edition include coverage of the formation and work of the NIST Organization of Scientific Area Committees (OSACs), new sections on forensic palynology (pollen), forensic taphonomy, the opioid crisis, forensic genetics and genealogy, recent COVID-19 fraud schemes perpetrated by cybercriminals, and a wholly new chapter on forensic psychology. Each chapter presents a set of learning objectives, a mini glossary, and acronyms. While chapter topics and coverage flow logically, each chapter can stand on its own, allowing for continuous or selected classroom reading and study. *Forensic Science*, Fourth Edition is an ideal introductory textbook to present forensic science principles and practices to students, including those with a basic science background without requiring prior forensic science coursework.

**Bridge Engineering** W.F. Chen,Lian Duan,2003-02-27 With chapters culled from the acclaimed Bridge Engineering Handbook, Bridge Engineering: Substructure Design focuses on the various components comprising and affecting bridge substructures. These include bearings, piers and columns, towers, abutments and retaining structures, footings and foundations, and bridge hydraulics. For each component, the

*Populist Challenges to Constitutional Interpretation in Europe and Beyond* Fruzsina Gárdos-Orosz,Zoltán Szente,2021-05-03 This book explores the relationship between populism or populist regimes and constitutional interpretation used in those regimes. The volume discusses the question of whether contemporary populist governments and movements have developed, or encouraged new and specific constitutional theories, doctrines and methods of interpretation, or whether their constitutional and other high courts continue to use the old, traditional interpretative tools in constitutional adjudication. The book is divided into four parts. Part I contains three chapters elaborating the theoretical basis for the discussion. Part II examines the topic from a comparative perspective, representing those European countries where populism is most prevalent, including Austria, Croatia, the Czech Republic, Greece, Hungary, Italy, Poland, Romania, Spain, and the United Kingdom. Part III extends the focus to the United States, reflecting how American jurisprudence and academia have produced the most important contributions to the theory of constitutional interpretation, and how recent political developments in that country might challenge the traditional understanding of judicial review. This section also includes a general overview on Latin America, where there are also some populist governments and strong populist movements. Finally, the editors' closing study analyses the outcomes of the comparative research, summarizing the conclusions of the book. Written by renowned national constitutional scholars, the book will be essential reading for students, academics and researchers working in Constitutional Law and Politics. Chapter 1 of this book is freely available as a downloadable Open Access PDF at <http://www.taylorfrancis.com> under a Creative Commons Attribution-Non Commercial-No Derivatives (CC-BY-NC-ND) 4.0 license.

**Rising Powers, People Rising** Alf Gunvald Nilsen,Karl von Holdt,2021-04-26 Rising Powers, People Rising is a pathbreaking volume in which leading international scholars discuss the emerging political economy of development in the BRICS countries centred on neo-liberalization, precarity, and popular struggles. The rise of the BRICS countries – Brazil, Russia, India, China, and South Africa – has called into question the future of Western dominance in world markets and geopolitics. However, the developmental trajectories of the BRICS countries are shot through with socio-economic fault lines that relegate large numbers of people to the margins of current growth processes, where life is characterized by multiple and overlapping vulnerabilities. These socio-economic fault lines have, in turn, given rise to political convulsions across the BRICS countries, ranging from single-issue protests to sustained social movements oriented towards structural transformation. The contributions in this book focus on the ways in and extent to which these trajectories generate distinct forms and patterns of mobilization and resistance, and conversely, how popular struggles impact on and shape these trajectories. The book unearths the economic, social, and political contradictions that tend to disappear from view in mainstream narratives of the BRICS countries as rising powers in the world-system. The chapters in this book were originally published as a special issue of Globalizations.

**Understanding CATIA** Kaushik Kumar,Chikesh Ranjan,J. Paulo Davim,2021-04-09 This book provides a key understanding of CATIA which is a solid modeling software. By using screen shots of step-by-step training, the reader will obtain comprehensive knowledge of all tools provided in CATIA for use in a variety of engineering fields. The book introduces CATIA basics, covers part design, discusses sheet metal design, talks about assembly, presents drawings and

shows modeling of an engineered component. The primary aim of this book is to assist in learning the use of CATIA software through examples taken from various areas of engineering. The content and treatment of the subject matter is most appropriate for university students studying engineering and practicing engineers who wish to learn the use of CATIA.

*Analyzing Organization Cultures* Bruce Fortado, 2021-04-28 Certain consultants argue leaders can quickly, easily, and considerably alter their organization cultures to improve performance. Conversely, field researchers have described situations where leaders could do little to alter the existing organization culture. Between these extreme positions, a spectrum of varying degrees of leader influence exists, and organizations fall at various places along this spectrum. This book presents five field studies dealing with team, service, and sales cultures where both expected and unexpected outcomes arose. In multiple instances, leaders hoped showing some employee appreciation would compensate for offering below market average wages. Several leadership groups were prospering based on cost cuts or increased sales. Those below often had their work intensified and they were experiencing greater stress. Eight paradoxical situations were uncovered and the interpretations of the participants were based in part on their personal work histories and the history of their current organization. In each case, evidence of employee informal organization and managerial operating cultures were documented. *Analyzing Organization Cultures* uses detailed case studies of five work organizations to offer a comparative approach to analyzing organizational culture. It shows the latest state of knowledge on the topic and will be of interest to researchers, academics, and students in the fields of organizational studies, management history, human resource management, and organizational theory.

**ASEAN and Regional Order** Amitav Acharya, 2021-05-30 Founded in 1967, the Association of Southeast Asian Nations (ASEAN) has emerged as one of the most successful regional organizations in the world. This book discusses the future of ASEAN against a backdrop of a growing US–China rivalry and the security implications of COVID-19. Chapters in this book move through a history of ASEAN and its multilateral institutions, including the ASEAN Regional Forum (ARF) and the East Asia Summit (EAS), featuring rare photographic material to contextualize both recent developments in regional security and projections for ASEAN’s prospects. Key concepts and terms are unpacked throughout, with the chapters focusing on rapidly changing international and regional environments, economic insecurities such as trade conflicts, human rights, and ASEAN identity, and providing extensive analysis of the factors challenging the principle ASEAN Centrality and the Indo-Pacific security architecture. The concept of security community frames this book, despite being subject to change if intraregional discord and institutional stagnation take hold. As a discussion of the role and future of ASEAN in a pivotal period of world history, *ASEAN and Regional Order* will prove vital to both students and scholars of international relations, regional organizations, and Asian studies more broadly.
