**Policy Making and Implementation** Ronald James May,2009-09-01 There is a vast literature on the principles of public administration and good governance, and no shortage of theoreticians, practitioners and donors eager to push for public sector reform, especially in less-developed countries. Papua New Guinea has had its share of public sector reforms, frequently under the influence of multinational agencies and aid donors. Yet there seems to be a general consensus, both within and outside Papua New Guinea, that policy making and implementation have fallen short of expectations, that there has been a failure to achieve 'good governance'. This volume, which brings together a number of Papua New Guinean and Australian-based scholars and practitioners with deep familiarity of policy making in Papua New Guinea, examines the record of policy making and implementation in Papua New Guinea since independence. It reviews the history of public sector reform in Papua New Guinea, and provides case studies of policy making and implementation in a number of areas, including the economy, agriculture, mineral development, health, education, lands, environment, forestry, decentralization, law and order, defence, women and foreign affairs, privatization, and AIDS. Policy is continuously evolving, but this study documents the processes of policy making and implementation over a number of years, with the hope that a better understanding of past successes and failures will contribute to improved governance in the future.

**Methods of Interregional and Regional Analysis** Walter Isard,Iwan J. Azis,Matthew P. Drennan,Ronald E. Miller,Sidney Saltzman,Erik Thorbecke,2017-07-05 This landmark textbook introduces students to the principles of regional science and focuses on the key methods used in regional analysis, including regional and interregional input-output analysis, econometrics (regional and spatial), programming and industrial and urban complex analysis, gravity and spatial interaction models, SAM and social accounting (welfare) analysis and applied general interregional equilibrium models. The coherent development of the materials contained in the set of chapters provides students with a comprehensive background and understanding of how to investigate key regional problems. For the research scholar, this publication constitutes an up-to-date source book of the basic elements of each major regional science technique. More significant, it points to new directions for future research and ways interregional and regional analytic approaches can be fused to realise much more probing attacks on regional and spatial problems - a contribution far beyond what is available in the literature.

**Geography** Peter Haggett,2001 A generation of geography students on both sides of the Atlantic were raised on Peter Haggett's classic text, *Geography: A Modern Synthesis*. First published in 1972, it went through three revisions and was translated into six languages. This new version, re-titled for a new century, *Geography: A*

Global Synthesis retains many of the features which gave the original volume such worldwide appeal. It presents geography as an integrated and integrating discipline, seeing both environmental and human geography and systematic and regional geography as intrinsically linked. It argues the facts of geographic distributions, the techniques by which geographers study the world, and the philosophy which informs their analyses all a part of a global synthesis. This synthesis operates at a range of spatial scales from the local up to the planetary system itself. It ranges in time back to human origins and onward to human futures. The book sees geography as an essential discipline for students wishing to understand their changing world at the start of a new millennium. Key features: \* thoroughly revised, restructured, and rewritten to reflect changes in world geography, it is illustrated with over 500 figures and stunning new plates \* retains a distinctive five-fold structure spanning the major geographic fields with one additional section (The Geographers Toolbox) and includes several new chapters e.g. Globalization; Geography of World Health; Geographical Information Systems (GIS). New sections are also provided on themes such as Global Warming, Gender Geography, and Job Opportunities for Geographers \* although aimed at students with little previous geographic training, it also provides onward links to more advanced courses for those wishing to pursue the subject further. \* each of the book's 24 chapters is accompanied by three boxes. These are concerned with: introducing new methods (e.g. GIS software packages); illustrating the contributions of a particular geographer (e.g. Peter Gould and the geography of Aids); providing a regional case study (e.g. Lake Baikal); describing a historical phase in the development of geography (e.g. The Berkeley School) \* new appendices provide: a glossary of key geographical terms; sites on the world wide web of interest to geographers. Peter Haggett is Professor Emeritus of Geography in the University of Bristol and a member of the Institute of Advanced Studies. A Cambridge graduate, he taught geography at three U.K universities (London, Cambridge and Bristol) and at more than a dozen universities in North America and Australasia. He has acted as advisor to African and Asian universities, and served as visiting scientist at the World Health Organization and the U.S. Centers for Disease Control. Over the last forty years, he has authored and co-authored a score of volumes and atlases and established three new geographical journals. His research has been recognized in the first award by France of its Vautrin Lud Prize (geography's Nobel-like award); by gold medals from the American Geographical Society, the Royal Geographical Society and the Swedish Geographical Society; and by honorary degrees from universities on both sides of the Atlantic. With Seden's Torsten Hagerstrand, he was one of the two founding members of the European Academy and also served as Vice President of the British Academy.
