The Big Data Agenda Annika Richterich,2018-04-13 This book highlights that the capacity for gathering, analysing, and utilising vast amounts of digital (user) data raises significant ethical issues. Annika Richterich provides a systematic contemporary overview of the field of critical data studies that reflects on practices of digital data collection and analysis. The book assesses in detail one big data research area: biomedical studies, focused on epidemiological surveillance. Specific case studies explore how big data have been used in academic work. The Big Data Agenda concludes that the use of big data in research urgently needs to be considered from the vantage point of ethics and social justice. Drawing upon discourse ethics and critical data studies, Richterich argues that entanglements between big data research and technology/ internet corporations have emerged. In consequence, more opportunities for discussing and negotiating emerging research practices and their implications for societal values are needed.

Chinese Soft Power Maria Repnikova,2022-04-28 This Element presents an overarching analysis of Chinese visions and practices of soft power. Maria Repnikova's analysis introduces the Chinese theorization of the idea of soft power, as well as its practical implementation across global contexts. The key channels or mechanisms of China's soft power examined include Confucius Institutes, international communication, education and training exchanges, and public diplomacy spectacles. The discussion concludes with suggestions for new directions for the field, drawing on the author's research on Chinese soft power in Africa.

The Ethics of Biomedical Big Data Brent Daniel Mittelstadt,Luciano Floridi,2016-08-03 This book presents cutting edge research on the new ethical challenges posed by biomedical Big Data technologies and practices. 'Biomedical Big Data' refers to the analysis of aggregated, very large datasets to improve medical knowledge and clinical care. The book describes the ethical problems posed by aggregation of biomedical datasets and re-use/re-purposing of data, in areas such as privacy, consent, professionalism, power relationships, and ethical governance of Big Data platforms. Approaches and methods are discussed that can be used to address these problems to achieve the appropriate balance between the social goods of biomedical Big Data research and the safety and privacy of individuals. Seventeen original contributions analyse the ethical, social and related policy implications of the analysis and curation of biomedical Big Data, written by leading experts in the areas of biomedical research, medical and technology ethics, privacy, governance and data protection. The book advances our understanding of the ethical conundrums posed by biomedical Big Data, and shows how practitioners and policy-makers can address these issues going forward.

Primavera Mark A. Schoedl,2020-12-30 I did not become a serious writer until later in life. I simply could not find my way in the business worlds; so, writing and the visual arts arose from the ashes of despair. John Kouzmanoff, a retired elementary school teacher helped me through the doldrums of my disparate existence. Over time, he talked about his life and the fears that held him back. Suddenly, I eased up on myself and those dreaded anxieties became less noticeable. John, however, passed away from kidney failure while vacationing in Salt Lake City. This man of 65 who once marched every single time Martin Luther King, Jr. came to Chicago, softly touches my heart whenever nothing seems to go right. Humility and love are all I ever need or to reach out (desire) for that matter. Rest in Peace John.

Shaping the Future of Power Lina Benabdallah,2020 China's rise to power has become one of the most discussed questions in both International Relations Theory (IRT) and Foreign Policy circles. Although power has been a core concept of IRT for a long time, the faces and mechanisms of power as it relates to Chinese foreign policy making has reinvigorated and changed the contours of that debate. With the rise of China and other powers across the global political arena comes a new visibility for different kinds of encounters between states, particularly between China and other Global South states. These encounters are made more visible to IR scholars now because of the increasing influence and impact that rising powers are making in the international system. This book shows foreign policy encounters between rising powers and Global South states do not necessarily exhibit the same logics, behaviors, or investment strategies of Euro-American hegemons. Instead, they have distinctive features that require new theoretical frameworks for their analysis. Shaping the Future of Power probes the type of power mechanisms that build, diffuse, and project China's power in Africa. It is necessary to take into account the processes of knowledge production, social capital formation, and skills transfers in Chinese foreign policy toward African states to fully understand China's power building mechanisms. These elements are crucial for the relational power framework to capture both the material aspects and ideational people-centered aspects to power. By examining China's investments in human resource development programs for Africa, the book examines a vital, yet undertheorized, aspect of China's foreign policy making--

Media Politics in China Maria Repnikova,2017-06-15 Maria Repnikova offers an innovative analysis of the media oversight role in China by examining how a volatile partnership is sustained between critical journalists and the state.

Chinese Media in Africa Emeka Umejei,2020-07-23 Chinese Media in Africa: Perception, Performance, and Paradox analyzes the debate on Chinese media expansion in Africa and its implication for the African media landscape by engaging with African journalists who train and work in Chinese media organizations based in Africa. Emeka Umejei analyzes how African journalists that enter the sphere of Chinese media, often with libertarian notions of journalism, are able to navigate the collisions and collusions that inform journalism in these settings. Through extensive interviews with African journalists, Umejei explores the constant negotiation of freedoms—including the ability to always work in relation to African reality—within state-controlled media organizations. These interviews bring to light the paradoxical nature of Chinese media organizations that both preach equality with Africa and simultaneously promote Chinese hegemony in the media, highlighting the diverse contours that shape and influence journalism practices in these settings. Scholars of journalism, media studies, African studies, international relations, and sociology will find this book particularly useful.

Either Private or Class Work It has been the purpose of the writer, in these books - and in other material especially prepared for the purpose of supplementing and providing for the special needs of each pupil to develop logically, and in a well-balanced manner, the pupil's capacity and ability to read music as readily as he would read a story or article written in a language with which he is familiar; to lay solid foundations in matters of technic, tone-shading, phrasing, and pedaling; to have developed equal facility in the use of all Major keys and all Minor keys; to bring the pupil through the Historical Notes and Anecdotes - into a closer intimacy with the development of the art of music and with the lives of great musicians; and, withal, to inspire him to desire, in his playing, not only mechanical accuracy, but also an expressive and artistic interpretation of good music. China in the World Jennifer Hubbert, 2019-03-31 Confucius Institutes, the language and culture programs funded by the Chinese government, have been established in more than 1,500 schools worldwide since their debut in 2004. A centerpiece of China's soft power policy, they represent an effort to smooth China's path to superpower status by enhancing its global appeal. Yet Confucius Institutes have given rise to voluble and contentious public debate in host countries, where they have been both welcomed as a source of educational funding and feared as spy outposts, neocolonial incursions, and obstructions to academic freedom. *China in the World* turns an anthropological lens on this most visible, ubiquitous, and controversial globalization project in an effort to provide fresh insight into China's shifting place in the world. Author Jennifer Hubbert takes the study of soft power policy into the classroom, offering an anthropological intervention into a subject that has been dominated by the methods and analyses of international relations and political science. She argues that concerns about Confucius Institutes reflect broader debates over globalization and modernity and ultimately about a changing global order. Examining the production of soft power policy in situ allows us to move beyond program intentions to see how Confucius Institutes are actually understood and experienced in day-to-day classroom interactions. By assessing the perspectives of participants and exploring the complex ways in which students, teachers, parents, and program administrators interpret the Confucius Institute curriculum, she highlights significant gaps between China's soft power policy intentions and the effects of those policies in practice. *China in the World* brings original, long-term ethnographic research to bear on how representations of and knowledge about China are constructed, consumed, and articulated in encounters between China, the United States, and the Confucius Institute programs themselves. It moves a controversial topic beyond the realm of policy making to examine the mechanisms through which policy is implemented, engaged, and contested by a multitude of stakeholders and actors. It provides new insight into how policy actually works, showing that it takes more than financial wherewithal and official resolve to turn cultural presence into power.

China's Media and Soft Power in Africa X. Zhang, H. Wasserman, W. Mano, 2016-04-08 This volume brings together scholars from different disciplines and nations to examine and assess the effectiveness of China's soft power initiatives in Africa. It throws light not only on China's engagement with Africa but also on how China's increasing influence is received in the African media.

Soft Power Mingjiang Li, 2009-08-15 Soft power has become a very popular concept in international affairs, appearing in government policy papers, academic discussions, and the popular media. In China, soft power has become one of the most frequently used phrases among political leaders, leading academics, and journalists. Defined against hard power, which often involves threat and coercion, soft power applies attraction, persuasion, and cooperation, finding its sources in culture, political values, and foreign policies. China, rich in culture and traditional philosophy, boasts abundant sources of soft power. *Soft Power* attempts to analyze the domestic and international views of China's soft power, the main strengths and weaknesses of China's soft power, and the application of soft power in China's international politics. It provides a comprehensive exploration of the soft power dimension in China's foreign relations by integrating views from various disciplines, such as history, education, culture, political economy, comparative politics, and philosophy. The book argues that soft power has become a very popular concept in China, that China is contemplating and exploring an innovative strategy in its rise and international politics, and that there have been quite a few notable elements of this in China's diplomatic practice, including softer rhetoric, promotion of the Chinese culture abroad, economic diplomacy, and image building. The book also argues that the limitations of China's soft power primarily stem from political values and China's own transitions, and reflects the reality that views and opinions regarding China's soft power are fairly diverse both in China and in the international arena.

Communication in China Yuezhi Zhao, 2008 The stakes for control over the means of communication in China have never been so high as the country struggles with breathtaking social change. This authoritative book analyzes the key dimensions of the transformation in China's communication system since the early 1990s and examines the highly fluid and potentially explosive dynamics of communication, power, and social contestation during China's rapid rise as a global power. Yuezhi Zhao begins with an analysis of the party-state's reconfiguration of political, economic, and ideological power in the Chinese communication system. She then explores the processes and social implications of domestic and foreign capital formation in the communication industry. Drawing on media and Internet debates on fundamental political, economic, and social issues in contemporary China, the book concludes with a nuanced depiction of the pitched and uneven battles for access and control among different social forces. Locating developments in Chinese communication within the nexus of state, market, and society, the author analyzes how the legacies of socialism continue to cast a long shadow. The book not only provides a multifaceted and interdisciplinary portrait of contemporary Chinese communication, but also explores profound questions regarding the nature of the state, the dynamics of class formation, and the trajectory of China's epochal social transformation.

The Discourse of Race in Modern China Frank Dikotter, 1992-02-01 This book is a study of a topic that is both extremely important and highly sensitive: how the Chinese have viewed other ethnic groups across time. The issue of racial differences constitutes a highly marked and oblique discourse in modern China. This is the

first book to analyse that shielded rhetoric directly.

Chinese Multinationals Jean-Paul Larcon,2009 This book examines the rise of Chinese companies in international markets during the last two decades of rapid expansion of the Chinese economy. The fruit of a collaboration between two leading business schools, HEC Paris and the School of Economics and Management of Tsinghua University, it provides a comprehensive overview of the strategies of Chinese multinationals in terms of international marketing and branding, M&As and international joint ventures, management of technology, organization and human resource management, etc.The strategies of several well-known companies are described in detail, including Baosteel, Bird, Haier, Hisense, Huawei Technologies, Lenovo, Nuchtech, Petrochina, TCL, Tsingtao Brewery, Wahaha, Wanxiang, etc.

Maoism Julia Lovell,2019-09-03 *** WINNER OF THE 2019 CUNDILL HISTORY PRIZE SHORTLISTED FOR THE BAILLIE GIFFORD PRIZE FOR NON-FICTION 2019 SHORTLISTED FOR THE NAYEF AL-RODHAN PRIZE FOR GLOBAL UNDERSTANDING SHORTLISTED FOR DEUTSCHER PRIZE LONGLISTED FOR THE 2020 ORWELL PRIZE FOR POLITICAL WRITING*** 'Revelatory and instructive... [a] beautifully written and accessible book' The Times For decades, the West has dismissed Maoism as an outdated historical and political phenomenon. Since the 1980s, China seems to have abandoned the utopian turmoil of Mao's revolution in favour of authoritarian capitalism. But Mao and his ideas remain central to the People's Republic and the legitimacy of its Communist government. With disagreements and conflicts between China and the West on the rise, the need to understand the political legacy of Mao is urgent and growing. The power and appeal of Maoism have extended far beyond China. Maoism was a crucial motor of the Cold War: it shaped the course of the Vietnam War (and the international youth rebellions that conflict triggered) and brought to power the murderous Khmer Rouge in Cambodia; it aided, and sometimes handed victory to, anti-colonial resistance movements in Africa; it inspired terrorism in Germany and Italy, and wars and insurgencies in Peru, India and Nepal, some of which are still with us today – more than forty years after the death of Mao. In this new history, Julia Lovell re-evaluates Maoism as both a Chinese and an international force, linking its evolution in China with its global legacy. It is a story that takes us from the tea plantations of north India to the sierras of the Andes, from Paris's fifth arrondissement to the fields of Tanzania, from the rice paddies of Cambodia to the terraces of Brixton. Starting with the birth of Mao's revolution in northwest China in the 1930s and concluding with its violent afterlives in South Asia and resurgence in the People's Republic today, this is a landmark history of global Maoism.
