SOG John L. Plaster, 2022-05-19 A new edition of this classic illustrated history of the operations and operatives of MACV-SOG in the Vietnam War. In 1972 the U.S. military destroyed all known photos of the top-secret Studies and Observations Group, with the intention that details could never be made public. But unknown to those in charge, SOG veterans had brought back with them hundreds of photographs of SOG in action and would keep them secret for more than three decades. In this new edition of SOG: A Photo History, more than 700 irreplaceable photos bring to life the stories of SOG legends Larry Thorne, Bob Howard, Dick Meadows, George Sisler, Q and others, and document what really happened deep inside enemy territory: Operation Tailwind, the Son Tay raid, SOG's defense of Khe Sanh, Hatchet Force operations, Bright Light rescues, HALO insertions, string extractions, SOG's darkest programs and much more.

SOG John L. Plaster, 2019-01-01 John Plaster's riveting account of his covert activities as a member of a special operations team during the Vietnam War is "a true insider's account, this eye-opening report will leave readers feeling as if they've been given a hot scoop on a highly classified project" (Publishers Weekly). Code-named the Studies and Observations Group, SOG was the most secret elite US military unit to serve in the Vietnam War—so secret its very existence was denied by the government. Composed entirely of volunteers from such ace fighting units as the Army Green Berets, Air Force Air Commandos, and Navy SEALs, SOG took on the most dangerous covert assignments, in the deadliest and most forbidding theaters of operation. In SOG, Major John L. Plaster, a three-tour SOG veteran, shares the gripping exploits of these true American warriors in a minute-by-minute, heartbeat-by-heartbeat account of the group's stunning operations behind enemy lines—penetrating heavily defended North Vietnamese military facilities, holding off mass enemy attacks, launching daring missions to rescue downed US pilots. Some of the most extraordinary true stories of honor and heroism in the history of the US military, from sabotage to espionage to hand-to-hand combat, Plaster's account is "a detailed history of this little-known aspect of the Vietnam War...a worthy act of historical rescue from an unjustified, willed oblivion" (The New York Times).

Water Stress and Crop Plants Parvaiz Ahmad, 2016-06-08 Plants are subjected to a variety of abiotic stresses such as drought, temperature, salinity, air pollution, heavy metals, UV radiations, etc. To survive under these harsh conditions plants are equipped with different resistance mechanisms which vary from species to species. Due to the environmental fluctuations agricultural and horticultural crops are often exposed to different environmental stresses leading to decreased yield and problems in the growth and development of the crops. Drought stress has been found to decrease the yield to an alarming rate of some important crops throughout the globe. During last few decades, lots of physiological and molecular works have been conducted under water stress in crop plants. **Water Stress and Crop Plants: A Sustainable Approach** presents an up-to-date in-depth coverage of drought and flooding stress in plants, including the types, causes and consequences on plant growth and development. It discusses the physiobiochemical, molecular and omic approaches, and responses of crop plants towards water stress. Topics include nutritional stress, oxidative stress, hormonal regulation, transgenic approaches, mitigation of water stress, approaches to sustainability, and modern tools and techniques to alleviate the water stress on crop yields. This practical book offers pragmatic guidance for scientists and researchers in plant biology, and agribusinesses and biotechnology companies dealing with agronomy and environment, to mitigate the negative effects of stress and improve yield under stress. The broad coverage also makes this a valuable guide enabling students to understand the physiological, biochemical, and molecular mechanisms of environmental stress in plants.

Secret Commandos John L. Plaster, 2018-10-16 Major John L. Plaster recalls his remarkable covert activities as a member of a special operations team during the Vietnam War in a "comprehensive, informative, and often exciting...account of an important part of the overall Vietnam tragedy" (The New York Times). Before there were Navy

SEALs, there was SOG. Short for "Studies and Operations Group," it was a secret operations force in Vietnam, the most highly decorated unit in the war. Although their chief mission was disrupting the main North Vietnamese supply route into South Vietnam, SOG commandos also rescued downed helicopter pilots and fellow soldiers, and infiltrated deep into Laos and Cambodia to identify bombing targets, conduct ambushes, mine roads, and capture North Vietnamese soldiers for intelligence purposes. Always outnumbered, they matched wits in the most dangerous environments with an unrelenting foe that hunted them with trackers and dogs. Ten entire teams disappeared and another fourteen were annihilated. This is the dramatic, page-turning true story of that team's dedication, sacrifice, and constant fight for survival. In the "gripping" (Publishers Weekly) *Secret Commandos*, John Plaster vividly describes these unique warriors who gave everything fighting for their country—and for each other.

Removal of Radionuclides from Process Streams - a Review I. J. Itzkovitch, G. M. Ritcey, 1979 This report details the origin and control of radium 226, thorium 230 and lead 210 contamination of mill effluent streams from conventional and non-conventional milling of uranium ores, reviews the basic chemistry of the radionuclides as it relates to potential alternatives for control and presents these alternatives along with a summary of published cost data--Abstract, p. v.

Blue Covenant Maude Barlow, 2009-05-01 A cautionary account of climate change and the global water supply. "You will not turn on the tap in the same way after reading this book." –Robert Redford In a book hailed by Publishers Weekly as a "passionate plea for access-to-water activism," *Blue Covenant* addresses an environmental crisis that—together with global warming—poses one of the gravest threats to our survival. How did the world's most vital resource become imperiled? And what must we do to pull back from the brink? In "stark and nearly devastating prose", world-renowned activist and bestselling author Maude Barlow—who is featured in the acclaimed documentary *Flow*—discusses the state of the world's water. Barlow examines how water companies are reaping vast profits from declining supplies, and how ordinary people from around the world have banded together to reclaim the public's right to clean water, creating a grassroots global water justice movement. While tracing the history of international battles for the right to water, she documents the life-and-death stakes involved in the fight and lays out the actions that we as global citizens must take to secure a water-just world for all (Booklist). "Sounds the water alarm with conviction and authority." –Kirkus Reviews "This book proves that water deserves another destiny." –Eduardo Galeano "Blue Covenant will inspire civil society movements around the world." –Vandana Shiva
