A Woman's Place is in the Boardroom P.

Thomson,J. Graham,2005-09-12 There are relatively few women in senior executive positions and on the boards of major companies. Based upon research and in the context of contemporary management debates the authors argue the business case for promoting women to these positions in order to create more value for shareholders. The book draws upon interviews with chairpersons and chief executives and includes case study material.

A History of Reading Alberto Manguel, 2014-08-26 At one magical instant in your early childhood, the page of a book—that string of confused, alien ciphers—shivered into meaning, and at that moment, whole universes opened. You became, irrevocably, a reader. Noted essayist and editor Alberto Manguel moves from this essential moment to explore the six-thousand-year-old conversation between words and that hero without whom the book would be a

lifeless object: the reader. Manguel brilliantly covers reading as seduction, as rebellion, and as obsession and goes on to trace the quirky and fascinating history of the reader's progress from clay tablet to scroll, codex to CD-ROM.

Inshore Fisheries Management David Symes,Jeremy Phillipson,2001-12-31 Despite their importance in terms of employment and income generation, inshore fisheries have been a neglected area of study. The review of the common fisheries policy, especially in the light of the need to re-examine the derogation which reserves access to the inshore zone to coastal state vessels, provides an opportunity to redress the balance. With contributions from leading authorities on fisheries management, the book takes an in-depth look at seven European countries, examining the basis for the definition of inshore fisheries, evaluating their status, and describing the salient characteristics of their management. The national studies form the basis for cross-cultural analyses of the social organisation, cultural norms, economic objectives, and institutional structures of inshore fisheries in Europe. Finally, a number of key issues relating to the future of inshore fisheries management in a more integrated approach are examined. Overall the volume reaffirms the invaluable role played by inshore fisheries in the local and regional economies of Europe's complex coastline.
