The History of Swanzey, New Hampshire, from 1734 to 1890 Benjamin Read,1892

Glory Denied: The Vietnam Saga of Jim Thompson, America's Longest-Held Prisoner of War Tom Philpott,2012-05-28 Weaving together interviews with Thompson and his family; comments from friends, fellow soldiers, and other POWs; and excerpts from service records, medical reports, and intelligence briefings, journalist Tom Philpott creates a moving and compelling portrait of a complex and heroic figure.

Geological Survey Water-supply Paper ,1950

Handbook of Compressed Gases Compressed Gas Association, Inc.,1999-06-30 In the field of compressed gases and related equipment, there is an expanding core of essential knowledge that people handling and using these materials should be familiar with or should know where to find. The focus of this book concerns the properties and the accepted means of transportation, storage, and handling of compressed gases. This handbook is simultaneously intended as an overview of the subject and a source of supplementary information. It is also intended to serve as a guide to pertinent federal regulatory requirements and published standards of the Compressed Gas Association and other standards-developing organizations. The Association advises readers that the CGA technical publications remain the official statement of policy on a particular matter. Reference is made throughout this text to the numerous technical publications published by the Compressed Gas Association. Some of these publications have been incorporated by reference into federal, state, provincial, and local regulations. Since the CGA publications are reviewed on a periodic basis, whenever the text of this handbook conflicts with corresponding information in the CGA technical pamphlets, the most recently printed material shall take precedence.

Data Mining and Mathematical Programming Panos M. Pardalos, Pierre Hansen,2008-04-09 Data mining aims at finding interesting, useful or profitable information in very large databases. The enormous increase in the size of available scientific and commercial databases (data avalanche) as well as the continuing and exponential growth in performance of present day computers make data mining a very active field. In many cases, the burgeoning volume of data sets has grown so large that it threatens to overwhelm rather than enlighten scientists. Therefore, traditional methods are revised and streamlined, complemented by many new methods to address challenging new problems. Mathematical Programming plays a key role in this endeavor. It helps us to formulate precise objectives (e.g., a clustering criterion or a measure of discrimination) as well as the constraints imposed on the solution (e.g., find a partition, a covering or a hierarchy in clustering). It also provides powerful mathematical tools to build highly performing exact or approximate algorithms. This book is based on lectures presented at the workshop on Data Mining and Mathematical Programming (October 10-13, 2006, Montreal) and will be a valuable scientific source of information to faculty, students, and researchers in optimization, data analysis and data mining, as well as people working in computer science, engineering and applied mathematics.

The Universal Exposition of 1904 David Rowland Francis,1913

Exploring Expertise James Fleck, Wendy Faulkner, Robin Williams,2016-07-27 The growing social and economic significance of expertise is reflected in popular suggestions that we are moving into a post-industrial 'knowledge society'. The subject of expertise is becoming recognised in a range of scholarly disciplines ranging from science and technology, psychology, computing and artificial intelligence through to management and organisational behaviour. Exploring Expertise brings together some of these diverse understandings of the character and implications of expertise, and demonstrates through a set of empirical case studies how expertise means different things to different groups, how it is constructed differently in different settings, and the consequences of this process for relations between 'members' of the knowledge society and those 'on the outside'. The book includes case study material ranging from a hospital ward to a factory to a nuclear weapons

facility.

Castellani and Italian Archaeological Jewelry Susan Weber Soros,Stefanie Walker,Bard Graduate Center for Studies in the Decorative Arts,2004-01-01 During the nineteenth century in Rome, three generations of the Castellani family created what they called "Italian archaeological jewelry," which was inspired by the precious Etruscan, Roman, Greek, and Byzantine antiquities being excavated at the time. The Castellani jewelry consisted of finely wrought gold that was often combined with delicate and colorful mosaics, carved gemstones, or enamel. This magnificent book is the first to display and discuss the jewelry and the family behind it. International scholars discuss the life and work of the Castellani, revealing the wide-ranging aspects of the family's artistic and cultural activities. They describe the making and marketing of the jewelry, the survey collection of all periods of Italian jewelry on display in the Castellani's palatial store, and the Castellani's activities in the trade of antiquities, as they sponsored excavations, and restored, dealt, and exhibited antiques. They also recount the family's involvement in the cultural and political life of their city and country.

Managing Technology in Society Arie Rip,Thomas J. Misa,Johan Schot,1995 A fateful conceptual gap separates the policy makers and managers charged with promoting technology, and the risk and technology assessors responsible for controlling it. This hampers the effective use of many new technologies, and prevents the development of others. The strategy of constructive technology assessment (CTA) addresses this gap through facilitating societal learning processes, and proposing a shared responsibility for the promotion and control of new technologies. Combining analysis of both cases and concepts, *Managing Technology in Society* confronts the underdevelopment of innovative potential for achieving goals of wealth, sustainability and safety. Factors that block change, as well as conditions for successful learning are identified in a wide-ranging selection of cases that encompass biotechnology, clean technologies, information and medical technologies. The contributors build on the convergence of recent theories on technical change within economics, sociology and the history of technology, to offer suggestions for CTA action, and so create a new paradigm of managing technology in society.--BOOK JACKET.Title Summary field provided by Blackwell North America, Inc. Science, Technology, and Democracy Daniel Lee Kleinman,2000-09-28 Activists, scientists, and scholars in the social sciences and humanities explore in productive dialogue what it means to democratize science and technology. The contributors consider what role lay people can have in a realm traditionally restricted to experts, and examine the socio-economic and ideological barriers to creating a science oriented more toward human needs. Included are several case studies of efforts to expand the role of citizens—including discussions of AIDS treatment activism, technology consensus conferences in Europe and the United States, the regulation of nuclear materials processing and disposal, and farmer networks in sustainable agriculture—and examinations of how the Enlightenment premises of modern science constrain its field of vision. Other chapters suggest how citizens can interpret differing opinions within scientific communities on issues of clear public relevance. Contributors include Steven Epstein, Sandra Harding, Neva Hassanein, Louise Kaplan, Daniel Lee Kleinman, Daniel Sarewitz, Stephen H. Schneider, and Richard E. Sclove.

Shaping Technology, Guiding Policy Knut H. Sørensen,Robin Williams,2002 This text evolved from the European COST A4 Action on the Social Shaping of Technology 1991-9, a coordinated effort of national scientific and technical research conducted on a European level. In this collection of 13 essays, 15 international scholars explore several issues regarding social shaping technology (SST), including the development of SST as a research area; the main concepts and approaches emerging within the area of SST; the new explanatory frameworks, concepts and tools which have recently emerged; and how these findings contribute to policy and public and commercial intervention

around technological innovation. For academics and researchers in science and technology studies, technology policy, and the management of technology, and for technology policymakers and practitioners. Annotation copyrighted by Book News, Inc., Portland, OR

New Modes of Governance Catherine Lyall,2017-09-08 In modern global economies, how can we govern science, technology, risk and the environment more effectively? As the pace of innovation has increased, the governance agenda has, itself, been changing; policy-making is in a state of flux and governments are stressing the need for more integrated or joined up policies to deal with new orders of complexity. This timely book describes the new approaches to policy for science, technology, risk and the environment in the context of this modern governance agenda. The authors examine the extent to which governance is integrated, where gaps exist and where further integration might be helpful for a range of policy areas. The interdisciplinary approach bridges scientific, technical and socio-economic research at global, European, UK and regional levels. *New Modes of Governance* will be a valuable resource for academics, policy-makers, regulators, and science and industry communities involved in innovation.
