Abdominal Angiography Werner Wenz, 2012-12-06 The brilliant yet simple idea of introducing a catheter percutaneously into an artery, without first dissecting it free, using a flexible guide wire, has led to a truly revolutionary breakthrough in abdominal x-ray diagnosis (SELDINGER, 1953). In the meantime, methods and techniques for injecting contrast media into various vessels have become largely standardized; innumerable publications have appeared which deal with every conceivable aspect of angiographic technique and interpretation. This volume is designed to present our experience with abdominal angiography. We deliberately refrained from any systematic discussion of the genitourinary tract, which has been adequately dealt with in the literature, also with respect to angiographic findings. Our interest in the retroperitoneal region is based mainly on its significance in differential diagnosis. In ten years of angiographic activity, our Department had made successful use of a simple technique which appears suitable also for smaller hospitals. We wish to point out its diagnostic potential and, at the same time, to outline its limitations. Our experience embraces 2804 abdominal angiograms, which we have classified according to clinical and morphologic anatomical criteria. Their diagnostic interpretation has been compared with the surgical or histopathological results. This may help others to avoid errors of the type which we discovered in our own work. Angiographic diagnosis requires not only familiarity with normal radiographic anatomy, but also specific knowledge of angiographic pathomorphology. We have tried to identify those features which typify the individual findings and to derive therefrom valid generalizations with the aid of simple sketches.

Sustainable Polymer Composites and Nanocomposites Inamuddin, Sabu Thomas, Raghvendra Kumar Mishra, Abdullah M. Asiri, 2019-02-01 This book presents emerging economical and environmentally friendly polymer composites that are free of the side effects observed in traditional composites. It focuses on eco-friendly composite materials using granulated cork, a by-product of the cork industry; cellulose pulp from the recycling of paper residues; hemp fibers; and a range of other environmentally friendly materials procured from various sources. The book presents the manufacturing methods, properties and characterization techniques of these eco-friendly composites. The respective chapters address classical and recent aspects of eco-friendly polymer composites and their chemistry, along with practical applications in the biomedical, pharmaceutical, automotive and other sectors. Topics addressed include the fundamentals, processing, properties, practicality, drawbacks and advantages of eco-friendly polymer composites. Featuring contributions by experts in the field with a variety of backgrounds and specialties, the book will appeal to researchers and students in the fields of materials science and environmental science. Moreover, it fills the gap between research work in the laboratory and practical applications in related industries.

Management of Atopic Dermatitis Erica A. Fortson, Steven R. Feldman, Lindsay C. Strowd, 2017-10-24 This book is designed to provide a foundation of knowledge regarding the epidemiology, pathogenesis, and clinical presentation of atopic dermatitis in both pediatric and adult patients. It provides an overview of the mechanism and presentation of atopic dermatitis and focuses on the management methods experienced dermatologists have used to successfully manage atopic dermatitis. This book provides physicians with

insights into the management of atopic dermatitis, such as alternative treatments for pruritus, psychosocial impact on patients and families, assessing patient compliance, and patient resources. This book also: Provides proven strategies for treating atopic dermatitis Helps providers create a treatment plan for their atopic patients Aids physicians in developing techniques for assessing patient compliance Thoroughly addresses the significant economic and psychosocial impact of atopic dermatitis

Ultraviolet Light in Human Health, Diseases and Environment Shamim I. Ahmad,2017-11-08 This book is about the roles and importance of Ultraviolet (UV) light from sun and from man-made UV lamps in our daily life, on health and diseases, also its application in sterilization and treatment. The key words are: reactive oxygen species, DNA damage, UV mutagenicity, skin cancers, polymorphous light eruption, Xeroderma pigmentosum, vitiligo, psoriasis, rheumatoid arthritis, diabetes mellitus, metabolic syndromes, cardiovascular diseases, dermatology, photobiology, photodermatosis, vitamin D synthesis, vitamin D efficiency, water sterilization, blood sterilization, phototherapies, skin tanning and UV dosimeter. The book starts with introduction to UV light and the history of development of UV lamps and its applications. It then moves to describing the interaction of this light with biological components and the production of reactive oxygen species, their roles in cell signaling, cellular defense from foreign invaders, in mutagenesis leading to skin diseases including vitiligo, polymorphous light eruption and various forms of skin cancer. Then it presents the synthesis and importance of UV light and diseases, induced due to the deficiency of vitamin D. Roles of UV light in sterilization, disinfection, phototherapies are depicted in the next part and finally use and abuse of UV light in tanning salon and the availability and importance of use of UV dosimeter are highlighted. The three main focuses of this book are: - Damage to biological systems by UV light leading to certain skin diseases; most importantly skin cancers. - Importance of UV light in the in vivo synthesis of vitamin D when human bodies are exposed to it. - Diseases caused due to the deficiency of vitamin D and the use of UV lamps in phototherapy and sterilization processes. The editor has considerable experience in publishing medical books and has used it critically selecting the matters which will attract the readers from many areas of medical and non-medical fields. It is hoped that the materials presented in this book will give great benefit and will stimulate both novice and expert researchers in the field. The book gives excellent overviews of the current status of research and pointers to the future research achievements. Clinicians, medical general practitioners, technicians and staff working in UV related industries and especially those working in tanning salon should benefit from the information presented in safe handling of this light.

Accounting and Business Valuation Methods Malcolm Howard,2007-11-14 This book is intended to appeal to junior accountants and entrepreneurs who need guidance and practical analytical tools to enable them to develop business plans, raise capital and assess risk. Readers can initiate their own business plans by copying over 200 lines of formulae that create a 5 year plan that includes an earnings statement (or profit and loss account), balance sheet and cash flow statement. It will also appeal to students taking accounting and finance modules that cover basic accounting techniques, ratio analysis,

investment appraisal, as well as company valuation and share valuation. The book demonstrates with four case studies where practice often differs with theory. Chapter 1 covers basic book-keeping, showing how accounts are reconciled and controlled covering topics such as the working capital cycle and negotiating techniques. Chapter 2 deals with basic business planning and how to use ratio analysis (performance, asset management, structure, and investment ratios) to assess company performance. Chapter 3 explains that published accounts are based on a series of judgements and the effect the relatively new international financial reporting standards and legislation such as the Sarbanes-Oxley Act is having on corporate governance. Chapter 4 covers risk assessment and valuing companies. Four case studies bring everything together; how investment trusts are valued, the effect of restructuring on share prices, the difference between serious profit warnings and mere compliance with regulation and hostile takeovers. Via a thorough analysis of published accounts this book will show readers how to: distinguish between mandatory and optional reports; assess the strength of a company's balance sheet; assess the risk factors associated with investment; assess whether or not the market value of a particular company is justified. * examines the difference between mandatory and optional reports * explains how to assess the strength of a company's balance sheet * looks at how to assess whether or not the market value of a particular company is justified

Indiana Highway Cost Allocation and Revenue Attribution Study and Estimation of Travel by Out-Of-State Vehicles Matthew Volovski, Eleni Bardaka, Zhibo Zhang, Bismark Agbelie, Samuel Labi, Kumares C. Sinha, 2015-12-31 This study was commissioned by INDOT to investigate the cost responsibility and revenue contribution of highway users with regard to the upkeep of Indiana's state and local highway infrastructure. For revenues, user and non-user sources were considered. The highway users were represented by the 13 FHWA vehicle classes, and the study was based on 2009-2012 data on expenditures and revenues. The study framework duly recognized the dichotomy between attributable and common costs. For allocating the attributable costs to the vehicle classes, ESALs, AASHTO loading equivalents, and PCEs were used; for allocating common costs, VMT was used. For each vehicle class, the share of revenue contribution was compared to the share of cost responsibility to determine respective equity ratios and thus to ascertain the extent to which vehicles in each class may be currently underpaying or overpaying their cost responsibilities. The study also determined the distribution of fuel purchases and travel by out-of-state vehicles on Indiana's highways; this analysis was required to further refine the results of the cost allocation and to quantify the magnitude of any imbalance between the out-of-state travel and share of consumption on Indiana's infrastructure and the revenue from such out-of-state vehicles. Pavement and bridge expenditures were found to have a dominant share of the overall expenditures on Indiana's highway system. It was determined that the user revenue sources contributed approximately 63.5% of the total state funding for highway expenditures and 36.5% were from non-user revenue sources. The inability of user revenue sources to cover the total highway expenditure and the consequent partial reliance on non-user sources constitute a rather unstable funding situation particularly because the non-user sources are characterized by significant variability. This study found that inequities exist, albeit in varying degrees, among the highway user groups. Of the 13 vehicle classes,

classes 1-4 were found to be overpaying their cost responsibilities while classes 5-13 are underpaying. The results of the equity analysis are generally consistent with those of studies carried out at other states.

Antioxidants in Muscle Foods Eric A. Decker, Cameron Faustman, Clemente J. Lopez-Bote, 2000-02-14 A complete guide to the use of dietary antioxidants in muscle food products Advances in food and animal science have given rise to a variety of nutritional strategies for improving the quality of muscle food products, from livestock to fish. *Antioxidants in Muscle Foods* describes a new methodology in this emerging field, which involves the use of dietary antioxidants to improve meat quality while avoiding exogenous food additives or packaging procedures. Through expert contributions by leading scientists from around the globe, this important book answers questions about the science and technology, benefits, and concerns associated with antioxidant supplementation in muscle foods. Photographs, illustrations, charts, and tables accompany in-depth discussions on: * Oxidative processes in muscle foods * Dietary strategies for improving the oxidative stability of muscle foods * The beneficial impact of vitamin E supplementation on meat quality * Economic and safety implications of nutritionally modified meat * Food industry applications involving meat, poultry, and seafood * Animal nutrition and muscle biochemistry * New areas where nutritional strategies can improve meat quality

Poverty Lines in Theory and Practice Martin Ravallion, 1998-01-01 A poverty line helps focus the attention of governments and civil society on the living conditions of the poor. This paper offers a critical overview of alternative approaches to setting poverty lines. In reviewing the methods found in practice, the paper tries to throw light on, and go some way toward resolving, ongoing debates about poverty measurement, emphasizing those debates which would appear to have greatest bearing on policy discussions.

Electrochemical Processes in Fuel Cells Manfred W. Breiter, 2012-12-06 The necessity for a better understanding of the basic processes that determine the operation of fuel cells became evident during the development of practical units in the last three decades. The search for efficient electrocatalysts in low-temperature fuel cells intensified the general study of the nature and the role of the electrode material. Research on the complex mechanisms of the anodic oxidation of different fuels and of the reduction of molecular oxygen on solid electrodes was stimulated, and the strong influence of adsorbed species on the electrode reaction in question was investigated. Suitable electrolytes had to be found for the high-temperature fuel cells. The use of electrodes with large internal surface lead to the development of models of porous electrode structures and to the mathematical analysis of the operation of these models under certain conditions. While the chapters I to III introduce the reader to the general field of fuel cells, the progress made in the understanding of the basic problems in the electrochemistry of fuel cells since the end of the second world war is reviewed in chapters IV to XVI of this monograph. In contrast, the technological aspects necessary for the development of practical units are not covered here. The open literature published as books or as papers in scientific journals has been considered up to the time of the writing of the final draft of the specific chapter, at least till the end of 1967.

Murder, Inc Sid Feder, Burton B. Turkus, 2015-06-08 *Murder Inc.* by former Brooklyn D.A. Burton B. Turkus and veteran A.P. war correspondent Sid Feder

is the riveting true crime classic that rips the lid off the national crime Syndicate's killing machine that took 1,000 lives nationwide during the 1930's and 40's. In a page-turning non-fiction account that reads like a crime thriller, Turkus and Feder take us behind the scenes with the untold story of how Sicilian gangsters Lucky Luciano, Albert Anastasia and Joe Adonis partnered with Jewish gangsters Meyer Lansky, Bugsy Siegel and Louis Lepke Buchalter to create a multi-million rackets enterprise that included, gambling, prostitution, union corruption and the lucrative murder-for-hire scheme that operated out of the back of a Brooklyn Candy Store. After he was able to turn, Murder Inc.'s chief killer, Abe Kid Twist Reles, Turkus eventually sent Lepke and six other mobsters to the electric chair. This 1951 best seller by Turkus & Feder which has sold more than a million copies worldwide is now available in a new updated edition complete with mug shots and bios of the original gangsters who spilled so much blood from coast to coast. With a new Foreword by five-time Emmy winning former ABC News correspondent and investigative reporter Peter Lance, this edition of Murder Inc. will introduce a new generation of true-crime readers to the most lethal underworld enterprise ever exposed.

Fractional Quantum Mechanics Laskin Nick,2018-05-25 Fractional quantum mechanics is a recently emerged and rapidly developing field of quantum physics. This is the first monograph on fundamentals and physical applications of fractional quantum mechanics, written by its founder. The fractional Schrödinger equation and the fractional path integral are new fundamental physical concepts introduced and elaborated in the book. The fractional Schrödinger equation is a manifestation of fractional quantum mechanics. The fractional path integral is a new mathematical tool based on integration over Lévy flights. The fractional path integral method enhances the well-known Feynman path integral framework. Related topics covered in the text include time fractional quantum mechanics, fractional statistical mechanics, fractional classical mechanics and the α -stable Lévy random process. The book is well-suited for theorists, pure and applied mathematicians, solid-state physicists, chemists, and others working with the Schrödinger equation, the path integral technique and applications of

fractional calculus in various research areas. It is useful to skilled researchers as well as to graduate students looking for new ideas and advanced approaches.

Medical Applications of Liposomes D.D. Lasic,D. Papahadjopoulos,1998-07-22

The development of liposomes as a drug delivery system has fluctuated since its introduction in the late 1960's by A.D. Bangham. While academic research of liposomes as a model membrane system has always flourished, as the exponential growth of papers can testify, the application of these findings to medically useful products has gone through several crises. Following the original optimism in the 70's and early 80's, a period of severe skepticism ensued at the end of the 80's and beginning of the 90's, culminating in a moderate but real optimism in the mid 90's, as a result of a successful launch of the first products in the US and Europe. In this collection of papers, the editors have gathered the most promising ideas, approaches, applications and commercial developments, thereby presenting an up-to-date compilation of the present status of the field. This includes such broad areas as anti-cancer chemotherapy immune stimulation and infectious diseases. Currently, the major areas of progress are in delivery of anti-fungal agents by conventional liposomes or lipid-based carriers and systemic anticancer therapy using long-circulating liposomes. The future applications as characterized by the direction of present day research is in specific targeting and delivery of informational molecules such as DNA plasmids (genes), antisense oligonucleotides or ribozymes. Other future developments may be in topical delivery, vaccination and in diagnostics. Features of this book: • Contributions from almost all the leading labs in the field • Up-to-date, critical reviews bridged by editors' introductions • Organized into a logical framework.
