The Geobiology and Ecology of Metasequoia Ben A. LePage,Christopher J. Williams,Hong Yang,2005-07-22 The plant fossil record indicates that the genus Metasequoia was widely distributed throughout the Northern Hemisphere from the early Late Cretaceous to the Plio-Pleistocene. Today the genus has shrunk to one species with approximately 5,000 mature individuals in southeastern China's Xiaohu Valley. This book distills the current understanding of the biology, ecology and physiology of fossil and living Metasequoia, current research directions and problems that remain unresolved.

Dusty Earthlings John Mustol,2012-08-20 The Lord God formed a man from the dust of the ground . . . (Gen 2:7). Made of dust, we humans are thoroughly physical beings. We are dusty earthlings. As such, we are also ecological beings, or rather eco-physical beings, firmly embedded in and dependent upon God's earthly ecosystems that support and provide for us and constitute our earthly home. Today we are living in ways that are damaging our home. As Christian dusty earthlings, we are called to oversee God's earthly creation and to follow Jesus Christ--God incarnated as a dusty earthling. How do we do this in the face of the array of ecological problems we face today? How can we obey the ecological principles and limits that govern all of life on God's good earth? I suggest that the virtues of humility, voluntary self-limitation, and the principles of kenosis and justice will help as we seek to follow Jesus as dusty earthlings in today's world.

Position, Navigation, and Timing Technologies in the 21st Century, Volumes 1 and 2 Y. Jade Morton,Frank van Diggelen,James J. Spilker, Jr.,Bradford W. Parkinson,Sherman Lo,Grace Gao,2020-12-17 Covers the latest developments in PNT technologies, including integrated satellite navigation, sensor systems, and civil applications Featuring sixty-four chapters that are divided into six parts, this two-volume work provides comprehensive coverage of the state-of-the-art in satellite-based position, navigation, and timing (PNT) technologies and civilian applications. It also examines alternative navigation technologies based on other signals-of-opportunity and sensors and offers a comprehensive treatment on integrated PNT systems for consumer and commercial applications. Volume 1 of Position, Navigation, and Timing Technologies in the 21st Century: Integrated Satellite Navigation, Sensor Systems, and Civil Applications contains three parts and focuses on the satellite navigation systems, technologies, and engineering and scientific applications. It starts with a historical perspective of GPS development and other related PNT development. Current global and regional navigation satellite systems (GNSS and RNSS), their inter-operability, signal quality monitoring, satellite orbit and time synchronization, and ground- and satellite-based augmentation systems are examined. Recent progresses in satellite navigation receiver technologies and challenges for operations in multipath-rich urban environment, in handling spoofing and interference, and in ensuring PNT integrity are addressed. A section on satellite navigation for engineering and scientific applications finishes off the volume. It looks at PNT using various radio signals-of-opportunity, atomic clock, optical, laser, magnetic field, celestial, MEMS and inertial sensors, as well as the concept of navigation from Low-Earth Orbiting (LEO) satellites. GNSS-INS integration, neuroscience of navigation, and animal navigation are also covered. The volume finishes off with a collection of work on contemporary PNT applications such as survey and mobile mapping, precision agriculture, wearable systems, automated driving, train control, commercial unmanned aircraft systems, aviation, and navigation in the unique Arctic environment. In addition, this text: Serves as a complete reference and handbook for professionals and students interested in the broad range of PNT subjects Includes chapters that focus on the latest developments in GNSS and other navigation sensors, techniques, and applications Illustrates interconnecting relationships between various types of technologies in order to assure more protected, tough, and accurate PNT Position, Navigation, and Timing Technologies in the 21st Century: Integrated Satellite Navigation, Sensor Systems, and Civil Applications will appeal to all industry professionals, researchers, and academics involved with the science, engineering, and applications of position, navigation, and timing technologies. pnt21book.com

In the Midst of Much-Doing Charles R. Ringma,2023-05-31 How are we to sustain activism and compassion amidst the never-ending crises of the twenty-first century? While the concern for social justice is deeply biblical, cynicism, burnout, and despair are all too common side effects when action is divorced from contemplation. To effectively serve as the hands and feet of Jesus, the church must attend to the revitalization of its inner life through the spiritual practices which feed, support, and sustain the work of the kingdom. Rather than the fragmentation and dualism that have led denominations to choose between prayer and service, evangelization and justice, the church must integrate heart, mind, and body in order to fulfil its calling to transform the world from within. Drawing from Scripture and a wide range of Christian traditions – from the monastic to the evangelical – this book inspires its readers to integrate spiritual renewal and prophetic witness for the glory of God and the good of his creation.
