Regime Change in the Yugoslav Successor States Mieczysław P. Boduszynski, 2010-04-26 In the 1990s, amid political upheaval and civil war, the Socialist Federal Republic of Yugoslavia dissolved into five successor states. The subsequent independence of Montenegro and Kosovo brought the total number to seven. Balkan scholar and diplomat to the region Mieczyslaw P. Boduszynski examines four of those states—Croatia, Slovenia, Macedonia, and the Federal Republic of Yugoslavia—and traces their divergent paths toward democracy and Euro-Atlantic integration over the past two decades. Boduszynski argues that regime change in the Yugoslav successor states was powerfully shaped by both internal and external forces: the economic conditions on the eve of independence and transition and the incentives offered by the European Union and other Western actors to encourage economic and political liberalization. He shows how these factors contributed to differing formulations of democracy in each state. The author engages with the vexing problems of creating and sustaining democracy when circumstances are not entirely supportive of the effort. He employs innovative concepts to measure the quality of and prospects for democracy in the Balkan region, arguing that procedural indicators of democratization do not adequately describe the stability of liberalism in post-communist states. This unique perspective on developments in the region provides relevant lessons for regime change in the larger post-communist world. Scholars, practitioners, and policymakers will find the book to be a compelling contribution to the study of comparative politics, democratization, and European integration.

The Art and Science of HDR Imaging John J. McCann, Alessandro Rizzi, 2011-11-07 Rendering High Dynamic Range (HDR) scenes on media with limited dynamic range began in the Renaissance whereby painters, then photographers, learned to use low-range spatial techniques to synthesize appearances, rather than to reproduce accurately the light from scenes. The Art and Science of HDR Imaging presents a unique scientific HDR approach derived from artists' understanding of painting, emphasizing spatial information in electronic imaging. Human visual appearance and reproduction rendition of the HDR world requires spatial-image processing to overcome the veiling glare limits of optical imaging, in eyes and in cameras. Illustrated in full colour throughout, including examples of fine-art paintings, HDR photography, and multiple exposure scenes; this book uses techniques to study the HDR properties of entire scenes, and measures the range of light of scenes and the range that cameras capture. It describes how electronic image processing has been used to render HDR scenes since 1967, and examines the great variety of HDR algorithms used today. Showing how spatial processes can mimic vision, and render scenes as artists do, the book also: Gives the history of HDR from artists' spatial techniques to scientific image processing Measures and describes the limits of HDR scenes, HDR camera images, and the range of HDR appearances Offers a unique

review of the entire family of Retinex image processing algorithms Describes the considerable overlap of HDR and Color Constancy: two sides of the same coin Explains the advantages of algorithms that replicate human vision in the processing of HDR scenes Provides extensive data to test algorithms and models of vision on an accompanying website www.wiley.com/go/mccannhdr

The History of Croatia and Slovenia Christopher Deliso,2020-11-06 This new addition to Greenwood's Histories of the Modern Nations series provides a comprehensive introduction to the intertwined histories of Croatia and Slovenia, two Balkan nations and former members of the Yugoslav Federation. The recent histories of Croatia and Slovenia have been relatively stable, as both countries have merged successfully into modern Europe. But how did these countries arrive at such a place? The History of Croatia and Slovenia provides factual overviews of these countries' political systems, geographical details, significant individuals, and more. The volume opens with the prehistoric and ancient roots of these states, though this history predates their modern ethnic and linguistic identities as we know them. Chapters cover the Roman period, followed by barbarian waves and the countries' subsequent absorption into the Venetian, Hungarian, and Holy Roman Empires. The modern period of national awakening in the nineteenth century, when the ethno-genesis of modern Croatia and Slovenia began, is covered in great detail. The volume additionally covers subsequent turbulent events such as WWI, WWII, the Holocaust, Communist Yugoslavia, and its civil wars of the 1990s, through the events of 2019. Written in approachable yet scholarly language, this volume is ideal for high school and university students, as well as any reader interested in Balkan or European history.

Bound with Honor Megan Mulry,2015-08-03 Lord Archibald Cambury, Marquess of Camburton, has never wanted for anything . . . except normalcy. Although he adores both of his loving mothers, and his vivacious twin sister with her two husbands, he wants a wife. One wife. Full stop. Is that so much to ask? Miss Selina Ashby appears to be everything Archie has always wanted in a marchioness: demure, soft-spoken, and pretty, with a quick mind and delectable humor. Yes, she is a bit forward, but he chalks that up to youth. Yes, she has a very particular friend in Beatrix Farnsworth, but he chalks that up to loyalty. He is a lord; she is a lady; they are in love. And so they marry. That should be the end of it. But when Archie discovers that his wife is as passionate with her particular friend Beatrix as he is with his particular friend Christopher, his world is shattered. He must decide if Selina's love is big enough for both of them—and whether normalcy is truly more important than the love he feels for both the man and the woman who have become so dear to him.
