*Ethical Considerations for Research Involving Prisoners* Committee on

Ethical Considerations for Revisions to DHHS Regulations for Protection of Prisoners Involved in Research, Board on Health Sciences Policy, Institute of Medicine, 2007-01-22 In the past 30 years, the population of prisoners in the United States has expanded almost 5-fold, correctional facilities are increasingly overcrowded, and more of the country's disadvantaged populations—racial minorities, women, people with mental illness, and people with communicable diseases such as HIV/AIDS, hepatitis C, and tuberculosis—are under correctional supervision. Because prisoners face restrictions on liberty and autonomy, have limited privacy, and often receive inadequate health care, they require specific protections when involved in research, particularly in today's correctional settings. Given these issues, the Department of Health and Human Services' Office for Human Research Protections commissioned the Institute of Medicine to review the ethical considerations regarding research involving prisoners. The resulting analysis contained in this book, *Ethical Considerations for Research Involving Prisoners*, emphasizes five broad actions to provide prisoners involved in research with critically important protections: • expand the definition of prisoner; • ensure universally and consistently applied standards of protection; • shift from a category-based to a risk-benefit approach to research review; • update the ethical framework to include collaborative responsibility; and • enhance systematic oversight of research involving prisoners.

*Parks, Recreation, and Open Space* Alexander Garvin, 2000 What, exactly, is a park? What role have parks played in cities, and what will they need to be in the new economics and society of 21st century America? To answer these questions, noted planner and planning educator Alexander Garvin first describes the parks agenda of Frederick Law Olmsted, which dominated the design of American parks for over a century, until the last 50 years of suburbanization so radically changed the nation's landscape and society. Parks and open space, once thought of as essential to public life and an important government responsibility, are now often regarded as amenities that can be done without. In order to develop a new agenda that fits the economics, needs, and expectations of Americans in this century, Garvin studied the details of successful parks and open space projects throughout the country. He distilled a set of principles to guide the actions of public and private leaders in all aspects of park, recreation, and open space development. His ideas--many of which challenge existing practices and conventional wisdom--fit new times and circumstances in America. This beautiful report is extensively illustrated with plan drawings and the author's own color photographs of parks across America. *Parks, Recreation, and Open Space* was sponsored in part by the City Parks Forum (CPF), a fellowship of mayors, their park advisors, and community leaders that encourages collaboration and exchange of ideas about the role of parks in

communities. The CPF is administered by the American Planning Association and supported in part by the Wallace-Reader's Digest Funds and the Doris Duke Charitable Foundation. It is the first in a series of three reports by the City Parks Forum. The second report is Parks and Economic Development (PAS 502) by John L. Crompton.
