Christian Contours Douglas S. Huffman,2012 What does it mean to think and live Christianly in a world of competing worldviews? Christian Contours answers this question by inviting readers to consider the understanding of reality proposed by the Bible. Though it is easy to divide life into separate compartments (religious and secular, theological and practical), faith invites us to view all of life in the light of that Biblical understanding. Presenting a clear, compelling case for unity in essential Christian tenets, the authors of Christian Contours guide the reader through developing, internalizing, and articulating a biblical worldview. This robust worldview enables the Christian to be a critically-thinking participant in culture and to be a faithful disciple of Christ with both heart and mind.

Discrimination and Disparities Thomas Sowell,2019-03-05 An enlarged edition of Thomas Sowell's brilliant examination of the origins of economic disparities Economic and other outcomes differ vastly among individuals, groups, and nations. Many explanations have been offered for the differences. Some believe that those with less fortunate outcomes are victims of genetics. Others believe that those who are less fortunate are victims of the more fortunate. Discrimination and Disparities gathers a wide array of empirical evidence to challenge the idea that different economic outcomes can be explained by any one factor, be it discrimination, exploitation, or genetics. This revised and enlarged edition also analyzes the human consequences of the prevailing social vision of these disparities and the policies based on that vision--from educational disasters to widespread crime and violence.

Tectonic Evolution, Collision, and Seismicity of Southwest Asia Rasoul Sorkhabi,2017-12-21 Southwest Asia is one of the most remarkable regions on Earth in terms of active faulting and folding, large-magnitude earthquakes, volcanic landscapes, petroliferous foreland basins, historical civilizations as well as geologic outcrops that display the protracted and complex 540 m.y. stratigraphic record of Earth's Phanerozoic Era. Emerged from the birth and demise of the Paleo-Tethys and Neo-Tethys oceans, southwest Asia is currently the locus of ongoing tectonic collision between the Eurasia-Arabia continental plates. The region is characterized by the high plateaus of Iran and Anatolia fringed by the lofty ranges of Zagros, Alborz, Caucasus, Taurus, and Pontic mountains; the region also includes the strategic marine domains of the Persian Gulf, Gulf of Oman, Caspian, and Mediterranean. This 19-

chapter volume, published in honor of Manuel Berberian, a preeminent geologist from the region, brings together a wealth of new data, analyses, and frontier research on the geologic evolution, collisional tectonics, active deformation, and historical and modern seismicity of key areas in southwest Asia.

Thule Eskimo Prehistory along Northwestern Hudson Bay Allen Papin McCartney, 1977-01-01 Ten Thule house ruins were excavated during 1968 and 1969 at Silumiut, Kamarvik, and Igluligardjuk, major winter settlements along Roes Welcome Sound and northwestern Hudson Bay. Radiocarbon dating places the occupation of these sites at the end of the twelfth century A.D. This work expands Mathiasen's original investigation of Thule culture southward from Repulse Bay.

Labour Lines and Colonial Power Victoria Stead, Jon Altman, 2019-08-16 Today, increases of so-called 'low-skilled' and temporary labour migrations of Pacific Islanders to Australia occur alongside calls for Indigenous people to 'orbit' from remote communities in search of employment opportunities.

These trends reflect the persistent neoliberalism within contemporary Australia, as well as the effects of structural dynamics within the global agriculture and resource extractive industries. They also unfold within the context of long and troubled histories of Australian colonialism, and of complexes of race, labour and mobility that reverberate through that history and into the present. The contemporary labour of Pacific Islanders in the horticultural industry has sinister historical echoes in the ‘blackbirding’ of South Sea Islanders to work on sugar plantations in New South Wales and Queensland in the late nineteenth and early twentieth centuries, as well as in wider patterns of labour, trade and colonisation across the Pacific region. The antecedents of contemporary Indigenous labour mobility, meanwhile, include forms of unwaged and highly exploitative labouring on government settlements, missions, pastoral stations and in the pearling industry. For both Pacific Islanders and Indigenous people, though, labour mobilities past and present also include agentive and purposeful migrations, reflective of rich cultures and histories of mobility, as well as of forces that compel both movement and immobility. Drawing together historians, anthropologists, sociologists and geographers, this book critically explores experiences of labour mobility by Indigenous peoples and Pacific Islanders, including Māori, within Australia. Locating these new expressions of labour mobility within historical patterns of movement, contributors interrogate the contours and continuities of Australian coloniality in its diverse and interconnected expressions.

Legalizing Prostitution Ronald Weitzer,2012 While sex work has long been controversial, it has become even more contested over the past decade as laws, policies, and enforcement practices have become more repressive in many nations, partly as a result of the ascendancy of interest groups committed to the total abolition of the sex industry. At the same time, however, several other nations have recently decriminalized prostitution. *Legalizing Prostitution* maps out the current terrain. Using America as a backdrop, Weitzer draws on extensive field research in the Netherlands, Belgium, and Germany to illustrate alternatives to American-style criminalization of sex workers. These cases are then used to develop a roster of “best practices” that can serve as a model for other nations considering legalization. *Legalizing Prostitution* provides a theoretically grounded comparative analysis of political dynamics, policy outcomes, and red-light landscapes in nations where prostitution has been legalized and regulated by the government, presenting a rich and novel portrait of the multifaceted world of legal sex for sale.

Crossing the Quality Chasm Institute of Medicine, Committee on Quality of Health Care in America, 2001-08-19 Second in a series of publications from the Institute of Medicine's Quality of Health Care in America project Today's health care providers have more research findings and more technology available to them than ever before. Yet recent reports have raised serious doubts about the quality of health care in America. Crossing the Quality Chasm makes an urgent call for fundamental change to close the quality gap. This book recommends a sweeping redesign of the American health care system and provides overarching principles for specific direction for policymakers, health care leaders, clinicians, regulators, purchasers, and others. In this comprehensive volume the committee offers: A set of performance expectations for the 21st century health care system. A set of 10 new rules to guide patient-clinician relationships. A suggested organizing framework to better align the incentives inherent in payment and accountability with improvements in quality. Key steps to promote evidence-based practice and strengthen clinical information systems. Analyzing health care organizations as complex systems, Crossing the Quality Chasm also documents the causes of the quality gap, identifies current practices that impede quality care, and explores how systems approaches can be used to implement change.

A Dream Denied Michaela Soyer, 2016-07-12 Young minority men are often portrayed in popular media as victims of poverty and discrimination. *A Dream Denied* delves deeper, investigating the social and cultural implications of the "American dream" narrative for young minority men in the juvenile justice systems in Boston and Chicago. This book connects young male offenders' cycles of desistance and recidivism with normative assumptions about success and failure in American society, exposing a tragic disconnect between structural reality and juvenile justice policy. This book challenges us to reconsider how American society relates to its most vulnerable members, how it responds to their personal failures, and how it promises them a

better future.
