*Sociology for Human Rights* David L. Brunnsma, Keri E. Iyall Smith, Brian K. Gran, 2019-07-19 As sociologists deepen their examinations of human rights in their teaching, research, and thinking, it is essential that such work is conducted in a manner that is both mindful and critical of the knowledge we are building upon in sociology and human rights. As the authors of this volume reveal, creating sociological knowledge that examines human rights for the expansion of human rights is something that sociologists are well equipped to undertake, whether through the use of mathematics, comparative-historical analysis, the study of emotions, conversations, or social psychology. In these chapters you will find the roots of the study of human rights deep within sociological research and thinking as well as emerging techniques that will push the discipline as it seeks to expand understanding of human rights together with so many other aspects of the social condition.

*The Ortho Problem Solver* Michael Daman Smith, 1989 The most up-to-date solutions, from non-chemical to recommended chemical controls, for more than 3,000 plant problems and North American home pests.

*Healthy at Work* Markus Wiencke, Mirella Cacace, Sebastian Fischer, 2016-08-26 This book aims at exploring the link between corporate and organizational culture, public and private policies, leadership and managerial skills or attitudes, and the successful implementation of work-related healthcare in Europe. Therefore it brings together a wide range of empirical and theoretical contributions from occupational health, management, psychology, medicine, economics, and (organizational) sociology to address the question of how to sustainably promote occupational health. Such important questions are explored as: What aspects of a corporate culture can be associated with health issues? How does leadership style affect the health of employees? How are health-related decisions in the workplace affected by the political environment? To what extent are interventions influenced by corporate culture, leadership and public policy? How can we make such interventions sustainable?
