The Cultural Influence on Mass Customization
Carolyn Wabia, 2020-08-11 This thesis empirically proves a cultural influence on mass customization - the personalization of mass products towards individual tastes - a topic of increasing importance in today's international markets. Based on quantitative research, the author observes differences in preferences among German and Chinese participants for varying product groups and mass customization stages. Contrasts in willingness-to-pay for mass-customized goods are explored and the investigated cultural influence is attributed to specific cultural dimensions.

Metabolic Phenotyping in Personalized and Public Healthcare Jeremy Nicholson, Ara Darzi, Elaine Holmes, John C. Lindon, 2016-02-11 Metabolic Phenotyping in Personalized and Public Healthcare provides information on the widespread recognition that a personalized or stratified approach to patient treatment may offer a more efficient and effective healthcare solution than phenotype-led approaches. In order to achieve that objective, a deep personal description is required at the level of the genome, proteome, metabolome, or preferably a combination of these aided by technology. This book, edited and written by the outstanding

luminaries of this evolving field, evaluates metabolic profiling and its uses across personalized and population healthcare, while also covering the advent of new technology fields, such as surgical metabonomics. In addition, the text presents specific examples of where this technology has been used clinically and with efficacy, pointing towards a framework and protocol for usage as it hits the clinical mainstream. Translates the conjunction of new surgical tools for intraoperative, real-time, metabolite evaluation and direct analysis of biofluid samples into novel options for augmented clinical decision-making Discusses longitudinal sampling from individual patients for stratified medicine Covers high resolution analytical spectroscopy and sophisticated computational modelling for prediction of adverse reactions in critical care scenarios, prognostic evaluation of cancer from biofluidism, and prognostic prediction of metabolism or response of patients to pharmaceutical interventions Encapsulates recent technology options for broader population profiling considerations, in particular, the metabolome-wide association studies (MWAS) that aid the translational researcher in identifying metabolic patterns associated with disease Foreword written by Professor Dame Sally Davies who is the Chief Medical Officer for England

Highly Commended 2013 BMA Medical Book Award for Medicine More than 100 chapters, from leading researchers, review the many impacts of genomic discoveries in

clinical action, including 63 chapters new to this edition Discusses state-of-the-art genome technologies, including population screening, novel diagnostics, and gene-based therapeutics Wide and inclusive discussion encompasses the formidable ethical, legal, regulatory and social challenges related to the evolving practice of genomic medicine Clearly and beautifully illustrated with 280 color figures, and many thousands of references for further reading and deeper analysis

Intelligent User Interfaces: Adaptation and Personalization Systems and Technologies Mourlas, Constantinos, Germanakos, Panagiotis, 2008-09-30 This book identifies solutions and suggestions for the design and development of adaptive applications and systems that provides more usable and qualitative content and services adjusted to the needs and requirements of the various users-- Provided by publisher.

Advances in Semantic Media Adaptation and Personalization Marios C. Angelides, Phivos Mylonas, Manolis Wallace, 2009-03-17 The emergence of content- and context-aware search engines, which not only personalize searching and delivery but also the content, has caused the emergence of new infrastructures capable of end-to-end ubiquitous transmission of personalized multimedia content to any device on any network at any time. Personalizing and adapting content requires processing of content and recognizing patterns in users' behaviour on the other. Personalizing and adapting the semantic content of multimedia enables applications to make just-in-time

intelligent decisions regarding this content, which in turn makes interaction with the multimedia content an individual and individually rewarding experience. Highlighting the changing nature of the field, *Advances in Semantic Media Adaptation and Personalization, Volume Two* discusses the state of the art, recent advances, and future outlooks for semantic media adaptation and personalization. Topics include: Collaborative Content Modeling Automatic Content Feature Extraction to Content Models Semantic Languages for Content Description Video Content Adaptation Adaptive Video Content Retrieval Content Similarity Detection Personalized Content Podcasting Adaptive Web Interaction As content and service providers recognize the value of new services and new markets, they will invest in technologies that adapt and personalize content. Industry, in response, has released new standards such as MPEG-7, MPEG21, and VC-1 that enable propagation of semantic media, adaptation, and personalization. Consequently, a broad range of applications are emerging across many industry sectors, such as music, film, games, television, and sports. Bringing together insight from researchers and practitioners, this book provides a sampling of the latest thinking in the field.

Routledge Handbook of Political Advertising

Christina Holtz-Bacha, Marion R. Just, 2017-02-24

This Handbook provides the most comprehensive overview of the role of electoral advertising on television and new forms of advertising in countries from all parts of the world currently available. Thematic chapters address advertising effects, negative ads, the perspective of practitioners and gender role. Country chapters summarize research on issues including political and electoral systems; history of ads; the content of ads; reception and effects of ads; regulation of political advertising on television and the Internet; financing political advertising; and prospects for the future. The Handbook confirms that candidates spend the major part of their campaign budget on television advertising. The US enjoys a special situation with almost no restrictions on electoral advertising whereas other countries have regulation for the time, amount and sometimes even the content of electoral advertising or they do not allow television advertising at all. The role that television advertising plays in elections is dependent on the political, the electoral and the media context and can generally be regarded as a reflection of the political culture of a country. The Internet is relatively unregulated and is the channel of the future for political advertising in many countries
