Robert Browning

Telling Children's Stories Michael Cadden,2010 The most accessible approach yet to children's literature and narrative theory,Telling Children's Storiesis a comprehensive collection of never-before-published essays by an international slate of scholars that offers a broad yet in-depth assessment of narrative strategies unique to children's literature. The volume is divided into four interrelated sections: Genre Templates and Transformations, Approaches to the Picture Book, Narrators and Implied Readers, and Narrative Time. Mike Cadden's introduction considers the links between the various essays and topics, as well as their connections with such issues as metafiction, narrative ethics, focalization, and plotting. Ranging in focus from picture books to novels such asTo Kill a Mockingbird, from detective fiction for children to historical tales, from new works such as the Lemony Snicket series to classics likeTom's Midnight Garden, these essays explore notions of montage and metaphor, perspective and subjectivity, identification and time. Together, they comprise a resource that will interest and instruct scholars of narrative theory and children's literature, and that will become critically important to the understanding and development of both fields.
