Photography on the Color Line Shawn Michelle Smith,2004-06-07 Through a rich interpretation of the remarkable photographs W. E. B. Du Bois compiled for the American Negro Exhibit at the 1900 Paris Exposition, Shawn Michelle Smith reveals the visual dimension of the color line that Du Bois famously called “the problem of the twentieth century.” Du Bois’s prize-winning exhibit consisted of three albums together containing 363 black-and-white photographs, mostly of middle-class African Americans from Atlanta and other parts of Georgia. Smith provides an extensive analysis of the images, the antiracist message Du Bois conveyed by collecting and displaying them, and their connection to his critical thought. She contends that Du Bois was an early visual theorist of race and racism and demonstrates how such an understanding makes the important concepts he developed—including double consciousness, the color line, the Veil, and second sight—available to visual culture and African American studies scholars in powerful new ways. Smith reads Du Bois’s photographs in relation to other turn-of-the-century images such as scientific typologies, criminal mugshots, racist caricatures, and lynching photographs. By juxtaposing these images with reproductions from Du Bois’s exhibition archive, Smith shows how Du Bois deliberately challenged racist representations of African Americans. Emphasizing the importance of comparing multiple visual archives, *Photography on the Color Line* reinvigorates understandings of the stakes of representation and the fundamental connections between race and visual culture in the United States.

Spiders of the Eastern United States W. Mike Howell,Ronald L. Jenkins,2004 *Spiders of the Eastern United States: A Photographic Guide* fills the void for a photographic identification guide to commonly encountered eastern U.S. spiders. Although not a taxonomic key or scientific treatise, this welcome book contains a wealth of information not seen elsewhere. After a brief introduction to spider anatomy, silk and webs, spider ecology, and classification, the book covers descriptions of families and common species. For each family, there are representative species with identifying characteristics, ecology and behavior, size, and one or more photos are provided. 363 pages, color photos throughout.

A Photographic History of North Carolina in the Civil War Richard B. McCaslin,1997 Centering on the common soldier, *Portraits of Conflict: A Photographic History of North Carolina in the Civil War*, the sixth in the University of Arkansas Press's award-winning series, tells the stories of the actual people, rich and poor, whose lives were changed forever by the nation's great drama.

Clarence H. White and His World Anne McCauley,2017-01-01 Restoring a gifted art photographer to his place in the American canon and, in the process, reshaping and expanding our understanding of early 20th-century American photography Clarence H. White (1871–1925) was one of the most influential art photographers and teachers of the early 20th century and a founding member of the Photo-Secession. This beautiful publication offers a new appraisal of White’s contributions, including his groundbreaking aesthetic experiments, his commitment to the ideals of American socialism, and his embrace of the expanding fields of photographic book and fashion illustration, celebrity portraiture, and advertising. Based on extensive archival research, the book challenges the idea of an abrupt rupture between prewar, soft-focus idealizing photography and postwar “modernism” to paint a more nuanced picture of American culture in the Progressive era. *Clarence H. White and His World* begins with the artist’s early work in Ohio, which shares with the nascent Arts and Crafts movement the advocacy of hand production, closeness to nature, and the simple life. White’s involvement with the Photo-Secession and his move to New York in 1906 mark a shift in his production, as it grew to encompass commercial portraiture and an increasing commitment to teaching, which ultimately led him to establish the first institutions in America to combine instruction in both technical and aesthetic aspects of photography. The book also incorporates new formal and scientific analysis of White’s work and techniques, a complete exhibition record, and many unpublished illustrations of the moody outdoor scenes and quiet images of domestic life for which he was revered.
