Spiders of the Eastern United States W. Mike Howell, Ronald L. Jenkins, 2004 Spiders of the Eastern United States: A Photographic Guide fills the void for a photographic identification guide to commonly encountered eastern U.S. spiders. Although not a taxonomic key or scientific treatise, this welcome book contains a wealth of information not seen elsewhere. After a brief introduction to spider anatomy, silk and webs, spider ecology, and classification, the book covers descriptions of families and common species. For each family, there are representative species with identifying characteristics, ecology and behavior, size, and one or more photos are provided. 363 pages, color photos throughout.

Photography on the Color Line Shawn Michelle Smith, 2004-06-07 Through a rich interpretation of the remarkable photographs W. E. B. Du Bois compiled for the American Negro Exhibit at the 1900 Paris Exposition, Shawn Michelle Smith reveals the visual dimension of the color line that Du Bois famously called "the problem of the twentieth century." Du Bois's prize-winning exhibit consisted of three albums together containing 363 black-and-white photographs, mostly of middle-class African Americans from Atlanta and other parts of Georgia. Smith provides an extensive analysis of the images, the antiracist message Du Bois conveyed by collecting and displaying them, and their connection to his critical thought. She contends that Du Bois was an early visual theorist of race and racism and demonstrates how such an understanding makes the important concepts he developed—including double consciousness, the color line, the Veil, and second sight—available to visual culture and African American studies scholars in powerful new ways. Smith reads Du Bois's photographs in relation to other turn-of-the-century images such as scientific typologies, criminal mugshots, racist caricatures, and lynching photographs. By juxtaposing these images with reproductions from Du Bois's exhibition archive, Smith shows how Du Bois deliberately challenged racist representations of African Americans. Emphasizing the importance of comparing multiple visual archives, *Photography on the Color Line* reinvigorates understandings of the stakes of representation and the fundamental connections between race and visual culture in the United States.

The Photographic Experience, 1839-1914: Images and Attitudes, The Photographic Experience deals with episodes and issues relating to the spread and practice of photography from its beginnings to World War I. Bridget and Heinz Henisch concern themselves with the reception accorded to the new art by professionals, amateurs, and the general public. They examine reactions to the new invention in the press, literature, poetry, music, and fashion; the response of intellectuals and painters; and the beliefs held by prominent photographers concerning the nature of the medium and its mission. With a wide array of images - many never before published - they illustrate the photograph's use as a record of public and private moments in life.
