Rose's Vintage Kayte Nunn, 2016-04-18 With her heart in tatters after a relationship break-up, Rose Bennett swaps her hometown of London for the sunny shores of Australia – but she arrives to find the Shingle Valley shrouded in winter. As the weather improves, Rose starts to unlock the secrets of the valley – from bonfire ceremonies and wine-making traditions to eccentric locals and their histories. Despite herself, Rose starts to fall in love: with the valley, the wines, the two children she's helping to look after – and with the handsome and brilliant Mark Cameron, owner of the troubled Kalkari Wines estate. What will happen when Mark's estranged wife, the tempestuous Isabella, returns? Will Rose find a future in the Shingle Valley, or will she be forced to leave? 'Some books, like wine can be sipped - but I had to gulp this novel down! It was delicious!' – Rachael Treasure

Stem Cell Research and Therapeutics Yanhong Shi, Dennis Clegg, 2008-07-15 This book is an updated reference for one of the most exciting field of biomedical researches- Stem Cell Research and its therapeutic applications. Stem cell research holds great promise for the treatment of many human diseases that currently lack effective therapies. Democracy and Globalization Josep M. Colomer,Ashley L. Beale,2020-06-02 As democracy is disrupted by globalization, the solution is to globalize democracy. This book explores the causes of the current crisis of democracy and advocates new ways for more representative, effective, and accountable governance in an interdependent world. Part 1 analyzes the split of the middle class and the subsequent political polarization which underlies people's dissatisfaction with the way democracy works in developed countries. It also addresses the role of political emotions, including disappointments about unmet expectations, anger incited from opposition candidates, fear induced from government, and hope wrapping up new proposals for reform and change. In Part 2, the authors argue that a more effective governance would require reallocations of power at local, national, continental and global levels with innovative combinations of direct democracy,

representative government, and rule by experts. This book will be of interest to students and scholars of political science, comparative politics, international relations, political economy and democratic theory, as well as general readers interested in politics and current events.

Using Fiscal Policy and Public Financial Management to Promote Gender Equality Janet G. Stotsky, 2020-01-27 This book examines how fiscal policy and management can promote gender equality in developing as well as developed countries. Providing an international look at gender budgeting, it draws on countries at different levels of development, with an emphasis on low-income developing countries. It introduces the reader to the main trends in gender equality, the key ideas and rationale of gender budgeting from a fiscal policy perspective and where gender budgeting fits into public financial management. It offers case studies and other empirical evidence from developing, emerging, and developed countries on what works in using fiscal policy and public financial management to narrow gender gaps in education, health care, access to infrastructure, and economic empowerment. It also provides policy recommendations appropriate to countries at different levels of development. The reader will gain an understanding of how fiscal policy and public financial management can contribute to gender equality and women's advancement. The book provides a well-grounded set of conclusions and policy recommendations, drawn from evaluation of the evidence. The focus is on low-income developing countries but is combined with a well-rounded look at developing countries, more generally, emerging markets, and developed countries as well. This book will be a valuable resource for economists and policy makers, particularly those in developing countries still grappling with large disparities between women and men. It will also prove useful to researchers and those who provide technical assistance and aid to countries on fiscal policies and tools for gender equality.

Literary Twinship from Shakespeare to the Age of Cloning

Wieland Schwanebeck, 2020-01-06 Unlike previous efforts that have only addressed literary twinship as a footnote to the doppelgänger motif, this book makes a case for the complexity of literary twinship across the literary spectrum. Shortlisted for the ESSE Book Award 2022 (Literatures in the English Language), it shows how twins have been instrumental to the formation of comedies of mistaken identity, the detective genre, and dystopian science fiction. The individual chapters trace the development of the category of twinship over time, demonstrating how the twin was repeatedly (re-)invented as a cultural and pathological type when other discursive fields constituted themselves, and how its literary treatment served as the battleground for ideological disputes: by setting the stage for debates regarding kinship and reproduction, or by partaking in discussions of criminality, eugenic greatness, and 'monstrous births'. The book addresses nearly 100 primary texts, including works of Mary Elizabeth Braddon, Wilkie Collins, Charles Dickens, Arthur Conan Doyle, Aldous Huxley, Christopher Priest, William Shakespeare, and Zadie Smith.

The Scheldt Question S T Bindoff, Taylor & Francis

Group, 2021-07 When originally published in 1945 this book was the first to give a detailed account, based largely upon original sources, of the 'Scheldt Question' from its medieval origins to the settlement of 1839 and to set it against an adequate background of political and economic history. The river Scheldt, the waterway giving access to the port of Antwerp which was so much in the news during the Allied liberation of Belgium and Holland was for centuries the subject of an international question in which all the leading states of Europe were at different times involved. The later part of the book is based on archival researches including the private papers of Lord Palmerston.

Translingual Identities and Transnational Realities in the U.S.

College Classroom Heather Robinson, Jonathan Hall, Nela Navarro, 2020-02-18 Exploring the roles of students' pluralistic

linguistic and transnational identities at the university level, this book offers a novel approach to translanguaging by highlighting students' perspectives, voices, and agency as integral to the subject. Providing an original reconsideration of the impact of translanguaging, this book examines both transnationality and translanguality as ubiquitous phenomena that affect students' lives. Demonstrating that students are the experts of their own language practices, experiences, and identities, the authors argue that a proactive translanguing pedagogy is more than an openness to students' spontaneous language variations. Rather, this proactive approach requires students and instructors to think about students' holistic communicative repertoire, and how it relates to their writing. Robinson, Hall, and Navarro address students' complex negotiations and performative responses to the linguistic identities imposed upon them because of their skin color, educational background, perceived geographical origin, immigration status, and the many other cues used to minoritize them. Drawing on multiple disciplinary discourses of language and identity, and considering the translanguing practices and transnational experiences of both U.S. resident and international students, this volume provides a nuanced analysis of students' own perspectives and self-examinations of their complex identities. By introducing and addressing the voices and self-reflections of undergraduate and graduate students, the authors shine a light on translanguing and transnational identities and positionalities in order to promote and implement inclusive and effective pedagogies. This book offers a unique yet essential perspective on translanguality and transnationality, and is relevant to instructors in writing and language classrooms; to administrators of writing programs and international student support programs; and to graduate students and scholars in language education, second language writing, applied linguistics, and literacy studies.

Geography and Soil Properties A.F. Pitty, 2020-05-11 This

book, first published in 1978, provides a comprehensive guide to soil properties in any major world region. 101 Management Models Marijn Mulders, 2019-11-08 Management models: many students will come across them in their studies, yet it is only when actually working with them that the function and benefit of management models are revealed. 101 Management Models gives a comprehensive overview of traditional models as well as innovations in management models. To allow quick access to the models, several indexes are provided, arranged by objective, discipline and author. All models are discussed in a transparent format: the fundamentals of the management model; its application; the result; the pitfalls. This intuitive and accessible textbook will be useful for all students of management - particularly those coming at the topic from another background such as economics or engineering and is supported by a companion website:

Population Geography Mohammad Izhar Hassan, 2020-04-28

This book studies the origins and development of population geography as a discipline. It explores the key concepts, tools and statistical and demographic techniques that are widely employed in the analysis of population. The chapters in this book: Provide a comprehensive geographical account of population attributes in the world, with a particular focus on India; Study the three major components of population change – fertility, mortality and migration – that have remained somewhat neglected in the study of human geography so far; Examine the salient social, demographic and economic characteristics of population, along with topics such as size, distribution and growth of population; Discuss major population theories, policies and population–development–environment interrelations, thus marking a significant departure from the traditional pattern-oriented approach. Well supplemented with figures, maps and tables, this key text will be an indispensable read for students, researchers and teachers of human geography, demography, anthropology, sociology, economics and population studies.

Public Relations Crisis Communication Lisa Anderson-

Meli, Swapna Koshy, 2020-01-02 This book explores the definition, nature and context of public relations crises; it also examines and defines the main elements of public relations crises and positions it in the context of the current communication sphere. Public Relations Crisis Communication: A New Model investigates existing group communication theories, including organizational culture, critical theory of organizations, media ecology, public rhetoric, and cross-cultural communication theory to establish their relevance in the context of the new model of public relations crisis. Key concepts from existing public relations crisis theory are also discussed and validated in order to establish prevailing thought. Through a case study of Malaysia Airlines MH370, involving a textual analyses of press communications on the Malaysia Airlines

website, this book scrutinises prevailing theory and definitions. Most valuably, this book proposes a new definition and model of public relations crisis, alongside a suggested extension to existing crisis communication theory in the form of a hierarchy of publics to be addressed during crises. This will help to address divergent publics with differing priorities in public relations crisis communication. This book is of interest to students, teachers, researchers and practitioners of public relations, communication, media and marketing, as well as professionals in the aviation industry and international relations.

Toward a Social Psychoanalysis Lynne Layton, 2020-02-26
Frantz Fanon, Erich Fromm, Pierre Bourdieu, and Marie Langer are among those activists, clinicians, and academics who have called for a social psychoanalysis. For over thirty years, Lynne Layton has heeded this call and produced a body of work that examines unconscious process as it operates both in the social world and in the clinic. In this volume of Layton's most important papers, she expands on earlier theorists' ideas of social character by exploring how dominant ideologies and culturally mandated, hierarchical identity prescriptions are lived in individual and relational conflict. Through clinical and cultural examples, Layton describes how enactments of what she calls 'normative unconscious processes' reinforce cultural inequalities of race, sex, gender, and class both inside and outside the clinic, and at individual, interpersonal, and institutional levels. Clinicians, academics, and activists alike will find here a deeper understanding of the power of unconscious process, and are called on to envision and enact a progressive future in which vulnerability and interdependency are honored and systemic inequalities dismantled.

Cybercrime Investigations John Bandler, Antonia Merzon, 2020-06-22
Cybercrime continues to skyrocket but we are not combatting it effectively yet. We need more cybercrime investigators from all backgrounds and working in every sector to conduct effective investigations. This book is a comprehensive

resource for everyone who encounters and investigates cybercrime, no matter their title, including those working on behalf of law enforcement, private organizations, regulatory agencies, or individual victims. It provides helpful background material about cybercrime's technological and legal underpinnings, plus in-depth detail about the legal and practical aspects of conducting cybercrime investigations. Key features of this book include: Understanding cybercrime, computers, forensics, and cybersecurity Law for the cybercrime investigator, including cybercrime offenses; cyber evidence-gathering; criminal, private and regulatory law, and nation-state implications Cybercrime investigation from three key perspectives: law enforcement, private sector, and regulatory Financial investigation Identification (attribution) of cyber-conduct Apprehension Litigation in the criminal and civil arenas. This far-reaching book is an essential reference for prosecutors and law enforcement officers, agents and analysts; as well as for private sector lawyers, consultants, information security professionals, digital forensic examiners, and more. It also functions as an excellent course book for educators and trainers. We need more investigators who know how to fight cybercrime, and this book was written to achieve that goal. Moving Boundary PDE Analysis William Schiesser, 2019-05-29 Mathematical models stated as systems of partial differential equations (PDEs) are broadly used in biology, chemistry, physics and medicine (physiology). These models describe the spatial and temporal variations of the problem system dependent variables, such as temperature, chemical and biochemical concentrations and cell densities, as a function of space and time (spatiotemporal distributions). For a complete PDE model, initial conditions (ICs) specifying how the problem system starts and boundary conditions

(BCs) specifying how the system is defined at its spatial boundaries, must also be included for a well-posed PDE model. In this book, PDE models are considered for which the physical boundaries move with time. For example, as a tumor grows, its boundary moves outward. In atherosclerosis, the plaque formation on the arterial wall moves inward, thereby restricting blood flow with serious consequences such as stroke and myocardial infarction (heart attack). These two examples are considered as applications of the reported moving boundary PDE (MBPDE) numerical method (algorithm). The method is programmed in a set of documented routines coded in R, a quality, open-source scientific programming system. The routines are provided as a download so that the reader/analyst/researcher can use MFPDE models without having to first study numerical methods and computer programming.

U.S. Policy Toward Eastern Europe and the Soviet Union

Robert F Byrnes, Taylor & Francis Group, 2021-12-13
This volume consists of a collection of essays written by Professor Byrnes between 1956 and 1988. The papers vary considerably in focus and include policy issues that were significant at the time, with the Cold War analyses around the post-war containment theory. In addition, there is a consistent viewpoint and argument in Byrnes reflections on East-West relations. A central theme throughout the collection is the essential correctness of U.S. foreign policy toward the Soviet Union and Eastern Europe between 1946 and 1988.

Women, Families and the British Army 1700-1880 Jennine Hurl-Eamon, Lynn MacKay, 2020
This series concentrates on women and the soldiers in the ranks whose lives they shared, assembling a wide body of evidence of their romantic entanglements and domestic concerns. The new military history of recent decades has demanded a broadening of the source base beyond elite accounts or those that concentrate solely on battlefield experiences. Armies did not operate in isolation, and men's family ties influenced the course of events in a variety of ways. Campfollowing women and children occupied a liminal space in campaign life. Those who

travelled on the strength of the army received rations in return for providing services such as laundry and nursing, but they could also be grouped with prostitutes and condemned as a 'burden' by officers. Parents, wives, and offspring left behind at home remained in soldiers' thoughts, despite an army culture aimed at replacing kin with regimental ties. Soldiers' families' suffering, both on the march and back in Britain, attracted public attention at key points in this period as well. This series provides, for the first time in one place, a wide body of texts relating to common soldiers' personal lives: the women with whom they became involved, their children, and the families who cared for them. It brings hitherto unpublished material into print for the first time, and resurrects accounts that have not been in wide circulation since the nineteenth century. The collection combines the observations of officers, government officials and others with memoirs and letters from men in the ranks, and from the women themselves. It draws extensively on press accounts, especially in the nineteenth century. It also demonstrates the value of using literary depictions alongside the letters, diaries, memoirs and war office papers that form the traditional source base of military historians. This fifth volume covers The Crimean War (1854-56).

Human Rights Education for Psychologists Polli

Hagenaars, Marlena Plavšić, Nora Sveaass, Ulrich Wagner, Tony Wainwright, 2020-03-12 This ground-breaking book is designed to raise awareness of human rights implications in psychology, and provide knowledge and tools enabling psychologists to put a human rights perspective into practice. Psychologists have always been deeply engaged in alleviating the harmful consequences human rights violations have on individuals. However, despite the fundamental role that human rights play for professional psychology and psychologists, human rights education is underdeveloped in psychologists' academic and vocational training. This book, the first of its kind, looks to change this, by: raising awareness among professional psychologists, university

teachers and psychology students about their role as human rights promoters and protectors providing knowledge and tools enabling them to put a human rights perspective into practice providing texts and methods for teaching human rights. Featuring chapters from leading scholars in the field, spanning 18 countries and six continents, the book identifies how psychologists can ensure they are practising in a responsible way, as well as contributing to wider society with a clear knowledge of human rights issues in relation to culture, gender, organisations and more. Including hands-on recommendations, case studies and discussion points, this is essential reading for professional psychologists as part of continuing professional development and those in training and taking psychology courses.
