Leadership Today Joan Marques, Satinder Dhiman, 2016-08-24 This textbook provides a clear understanding of leadership needs in today's business world, explained within the scope of hard and soft leadership skills. It captures qualities and skills such as spirituality, empathy, moral behavior, mindfulness, empathy, problem solving, self-confidence, ambition, knowledge, global understanding, and information technology. This text explains and provides guidelines for the implementation of each skill and includes examples from contemporary and historical leaders inviting the reader to consider each quality and engage in self-reflection. This book deviates from excessive theoretical descriptions presenting a timely, hands-on approach to leadership. Featuring contributions from academics and professionals from around the world, this text will be of interest to students, researchers, professionals in business and leadership who aspire to lead beyond their immediate environment.

Animal Behaviour Peter M. Kappeler, 2022-01-26 This textbook presents all basic principles of animal behaviour in a clear and concise manner and illustrates them with up-to-date examples. Emphasis is placed on behavioural biology as an integrative discipline of organismic biology, focusing on the adaptive value of behaviours that facilitate resource access, predator avoidance and reproductive success and underlie parental care, all within

a comprehensive presentation of social complexity. This new textbook provides a rich resource for students (and teachers) from a wide range of life science disciplines.

Come Fly with Me Jodi Peckman, 2024-09-10 A wistful love letter to the joys of flying and the fun, fashion, and glamour that go with it. Now, more than ever, nothing captures our yearning for travel, freedom, glamour, and adventure than the fantasy of flying away from it all. From Frank Sinatra dressed to the nines in the golden age of Pan Am to celebrities snapped in luxury leisurewear in the lounges today, airports have always afforded the most glamorous glimpses into that most enviable aspect of celebrity life--jet-setting in style. Curated by the renowned photo editor Jodi Peckman, Come Fly with Me is a love letter to the most longed-for escape, told through evocative images of the icons who've made the airport their runway. From John and Yoko waving from the airstairs to Rihanna bustling incognito through the halls, and from Muhammad Ali's crisp-pressed suits to Miley Cyrus's playful onesies, this is a whimsical and welcome reminder when we need it most of the joys of travel.

The Modern Synthesis Thomas E. Dickins, 2021-11-12 This book is about evolutionary theory. It deals with aspects of its history to focus upon explanatory structures at work in the various forms of evolutionary theory - as such this is also a work of philosophy. Its focus lies on recent debates about the Modern Synthesis and what might be lacking in that synthesis. These claims have been most clearly made by those calling for an Extended Evolutionary Synthesis. The author argues that the difference between these two positions is the consequence of two things. First, whether evolution is considered as solely a population level phenomenon or also a theory of form. Second, the use of

information concepts. In this book Darwinian evolution is positioned as a general theory of evolution, a theory that gave evolution a technical meaning as the statistical outcome of variation, competition, and inheritance. The Modern Synthesis (MS) within biology, has a particular focus, a particular architecture to its explanations that renders it a special theory of evolution. After providing a history of Darwinian theory and the MS, recent claims and exhortations for an Extended Evolutionary Synthesis (EES) are examined that see the need for the inclusion of non-genetic modes of inheritance and also developmental processes. Much of this argument is based around claims that the MS adopts a particular view of information that has privileged the gene as an instructional unit in the emergence of form. The author analyses the uses of information and claims that neither side of the debate explicitly and formally deals with this concept. A more formal view of information is provided which challenges the EES claims about the role of genes in MS explanations of form whilst being consilient with their own interests in developmental biology. It is concluded that the MS implicitly assumed this formal view of information whilst using information terms in a colloquial manner. In the final chapter the idea that the MS is an informational theory that acts to corral more specific phenomenal accounts, is mooted. As such the book argues for a constrained pluralism within biology, where the MS describes those constraints.

Encyclopedia of Evolutionary Psychological Science Todd K. Shackelford, Viviana A. Weekes-Shackelford, 2021-03-20 This comprehensive, twelve volume reference work reflects the interdisciplinary influences on evolutionary psychology and serves as a major

resource for its history, scientific contributors and theories. It draws on biology, cognitive science, anthropology, psychology, economics, computer science and paleoarchaeology to provide a multifaceted picture of behavioral adaptation in humans and how it adds to our academic and clinical understanding. Edited by a noted figure in evolutionary psychology, with many seminal and renowned contributors, this encyclopedia offers the full breadth of an area that is the forefront of behavioral thinking and investigation.

Spirituality in the Workplace Joan Marques,Satinder Dhiman,Richard King,2007 Provides the tools to make your work experience a gratifying one. A common misconception equates workplace spirituality with religion in the workplace; this sets the record straight, providing a practical definition of spirit at work and explaining its benefits for employees, managers, the organization, the societies in which the organization operates, and the world at large. Whether you are a leader, a manager, or an employee who cares about the people and the place you surround yourself with, you'll find the broad focus presented here useful for improving your work and your life.--From publisher description.

The Unpredictable Jessica Sorensen,2017-08-18 EnsleyUp until a few days ago, I thought my life was ordinary. But nothing is what it seems. Evil lurks everywhere. And I can either run or fight back.Luckily, I'm not in this alone. I have my friends. And maybe, just maybe, Carter.CarterI can't stop thinking about Ensley. So when I learn her life is in danger, I rush to warn her, even though it means going against my father. But I have to get her to trust me first, which means confessing the truth about everything and fighting back against the evil that controls my life.

Empirically Engaged Evolutionary Ethics Johan De Smedt,Helen De Cruz,2021-05-04 A growing body of evidence from the sciences suggests that our moral beliefs have an evolutionary basis. To explain how human morality evolved, some philosophers have called for the study of morality to be naturalized, i.e., to explain it in terms of natural causes by looking at its historical and biological origins. The present literature has focused on the link between evolution and moral realism: if our moral beliefs enhance fitness, does this mean they track moral truths? In spite of the growing empirical evidence, these discussions tend to remain high-level: the mere fact that morality has evolved is often deemed enough to decide questions in normative and meta-ethics. This

volume starts from the assumption that the details about the evolution of morality do make a difference, and asks how. It presents original essays by authors from various disciplines, including philosophy, anthropology, developmental psychology, and primatology, who write in conversation with neuroscience, sociology, and cognitive psychology.

The Evolving Psyche of Law in Europe Magdalena Smieszek, 2021-06-04 The book applies an interdisciplinary analytical framework, based on social psychology theories of inclusion and exclusion, to a discussion of legal discourse and the development of legal frameworks in Europe concerning migrants, asylum seekers, refugees, and European citizens. It adopts a psycho-historical perspective to discuss the evolution of international and European law with regard to the rights of citizens and asylum-seeking non-citizens, from the law's inception following the Second World War up to present-day laws and policies. The book reveals the embracing of a European identity based on human rights as the common feature in European treaties and institutions, one that is focused on European citizens and has inclusionary objectives. However, a cognitive dissonance can also be found, as this common identity-making runs counter to national proclivities, as well as securitized, threat-perception-oriented perspectives that can produce exclusionary manifestations concerning persons seeking asylum. In particular, a view of inclusion and exclusion via legal categorizations of status, as well as distributions of social and economic rights, draws attention to the links between social psychology and international law. What emerges in the analysis: a process of creating value is present both at its psychological roots and the expressions of value in the law. Fundamentally speaking, the emergence of laws and policies that center on human beings and human dignity, when understood from

a psychological and emotion-based perspective, has the potential to transcend the dissonances identified.

Networks in the Global World V Artem Antonyuk, Nikita Basov, 2021-02-19 This proceedings book presents state-of-the-art developments in theory, methodology, and applications of network analysis across sociology, computational science, education research, literature studies, political science, international relations, social media research, and urban studies. The papers comprising this collection were presented at the Fifth 'Networks in the Global World' conference organized by the Centre for German and European Studies of St. Petersburg University and Bielefeld University and held on July 7-9, 2020. This biannual conference series revolves around key interdisciplinary issues in the focus of network analysts, such as the multidimensional approach to social reality, translation of theories and methods across disciplines, and mixing of data and methods. The distinctive features of this book are the emphasis on in-depth linkages between theory, method, and applications, the blend of qualitative and quantitative methods, and the joint consideration of different network levels, types, and contexts. The topics covered by the papers include interrelation of social and cultural structures, constellations of power, and patterns of interaction in areas ranging from various types of communities (local, international, educational, political, and so on) to social media and literature. The book is useful for practicing researchers, graduate and postgraduate students, and educators interested in network analysis of social relations, politics, economy, and culture. Features that set the book apart from others in the field: · The book offers a unique cross-disciplinary blend of computational and ethnographic network analyses applied to a

diverse spectrum of spheres, from literature and education to urban planning and policymaking. · Embracing conceptual, methodological, and empirical works, the book is among the few in network analysis to emphasize connections between theory, method, and applications. · The book brings together authors and empirical contexts from all over the globe, with a particular emphasis on European societies.

The Annenbergs John E. Cooney, 1982 This is the colorful and dramatic biography of two of America's most controversial entrepreneurs: Moses Louis Annenberg, 'the racing wire king, ' who built his fortune in racketeering, invested it in publishing, and lost much of it in the biggest tax evasion case in United States history; and his son, Walter, launcher of TV Guide and Seventeen magazines and former ambassador to Great Britain.--Jacket.
