Project Feasibility Olivier Mesly,2017-06-01 This book presents a set of tools that will aid in deciding whether a project should go ahead, be improved, or abandoned altogether by pinpointing its vulnerabilities. It offers a review of project feasibility analysis, and more critically, psychodynamic aspects that are often neglected, including how stakeholders interact. It provides a complement to the common techniques used for analyzing technical, financial, and marketing feasibility. The goal is to identify hidden truths and eliminate those gray areas that jeopardize the success of a given project. The focus is on uncovering points of vulnerabilities in four key aspects of a project: People, Power, Processes, and Plan.

Science Fiction Cinema and 1950s Britain Matthew Jones,2017-11-30 This book is open access and available on www.bloomsburycollections.com. It is funded by Knowledge Unlatched. For the last sixty years discussion of 1950s science fiction cinema has been dominated by claims that the genre reflected US paranoia about Soviet brainwashing and the nuclear bomb. However, classic films, such as *Invasion of the Body Snatchers* (1956) and *It Came from Outer Space* (1953), and less familiar productions, such as *It! The Terror from Beyond Space* (1958), were regularly exported to countries across the world. The histories of their encounters with foreign audiences have not yet been told. *Science Fiction Cinema and 1950s Britain* begins this task by recounting the story of 1950s British cinema-goers and the aliens and monsters they watched on the silver screen. Drawing on extensive archival research, Matthew Jones makes an exciting and important intervention by locating American science fiction films alongside their domestic counterparts in their British contexts of release and reception. He offers a radical reassessment of the genre, demonstrating for the first time that in Britain, which was a significant market for and producer of science fiction, these films gave voice to different fears than they did in America. While Americans experienced an economic boom, low immigration and the conferring of statehood on Alaska and Hawaii, Britons worried about economic uncertainty, mass immigration and the dissolution of the Empire. *Science Fiction Cinema and 1950s Britain* uses these and other differences between the British and American experiences of the 1950s to tell a new history of the decade's science fiction cinema, exploring for the first time the ways in which the genre came to mean something unique to Britons.

Biophysics and Neurophysiology of the Sixth Sense Nima Rezaei, Amene Saghaazadeh, 2019-04-26 Multiple senses, like multiple intelligences, are a key to brain variability and therefore human evolution. Besides the traditional five senses (vision, olfaction, gustation, audition, and somatosensory), humans can also perceive the body's own position (the sense of proprioception) and movement (the vestibular sense). Interoception is the feeling one has about the internal physiological conditions of the entire body. Additionally there is a sense of intuition, also known as the sixth sense. Despite their best efforts, researchers are still unable to concur in specifying the nature of the sixth sense; some consider the sense of proprioception as the sixth sense, whereas others prefer to consider that as a part of interoception. This book will provide a scientific system for the human sixth sense using relevant biophysical and neurophysiological evidence. The power of "sixth sense" seems to be underestimated, due to difficulties in defining the concept clearly. According to socioeconomics and neural physics, the sixth sense is that which permits humans to create perception or to enhance the quality of their perception of events. Roughly speaking, the sixth sense engages a metacognitive process through which prior knowledge and the information received from other sensory modalities are synergized. It is not restricted to specific arrow of time and type of mind or to the observer's body, but it considers all arrows of time (past, present, future), types of mind (conscious and unconscious), and physical bodies (self and other). However it is expected that the observer has specific biases towards what happens now or would happen in the future and its relation to himself. Particularly, humans appeal to the sixth sense on the road to achieving success in social competitions and to reduce uncertainty in complex decision making processes. In addition to evidence linking genetic components to the sixth sense submodalities, there have been developed strategies for increasing the quality of perceptions provided by the sixth sense. Meditation, through which individuals try to be detached from the world, increases gamma-band activity and that increased gamma-band activity is found following top-down processing. Therefore it can be inferred that the detachment from the environment may enhance synchronization of the wave functions in favor of strengthening the sixth sense. It can serve as the mechanism of enhancement of the sixth sense in those whose sensory systems are intact, it can also serve as the mechanism of compensation in those who have sensory deficiencies. In the latter case, it in fact encourages creativity in the use of relatively strong senses. This justifies Beethoven's deafness and his great musical creativity or Bramblitt's blindness and his enormous capability to paint and many other similar examples. In summary, the present book is divided into five parts. Part 1 (chapters 1-6) provides information about the system of proprioception and its neurophysiology and biophysics. Part 2 (chapters 7-10) examines the system of interoception. The information provided in these two parts would enable us to move towards the next three parts of the story, aimed at developing a scientific system of the sixth sense. The first chapter of part 3 begins with concepts and uses them to arrive at reasonable conclusion that there must be a sense that requires multistep information processing and that is separate from the sense of proprioception and the sense of interoception. Such sense is commonly known as the sixth sense. However it should be re-numbered because the sense of proprioception is already known as the sixth sense. The second chapter of this part is to draw neurocircuitry that innervates the sixth sense in the mind of a man, while the third chapter would address the questions whether the sixth sense system requires an optimal competence or consciousness of mind to function properly and if so which is the optimal state: conscious or unconscious and competence or incompetence. In the fourth chapter of this part, we will focus on the self-other mergence as a pivotal step of the sixth sense system. The next chapter would be of great interest to neurobiologists. It talks about that the human sixth sense of the unseen world, either the unseen arrow of time or the unseen events, requires creativity and therefore the human sixth sense should be considered a source of creativity, variability and thus evolution. In the sixth chapter, the sixth sense is viewed as

an economic activity stimulated by social environments. This chapter arisen from the fact that humans are full of enthusiasm to heighten their sixth sense and its accuracy and that they owe their enthusiasm largely to achieving the best possible profit and in other words to wining intense competitions in their life holds mainly on the concept of elasticity. Finally this part is finished by an amazing discussion on the art of the sixth sense. The first chapter of part 4 discusses physical theories that support the existence of sixth sense in the universe. The next chapter is to apply the Bayes' theory to the sixth sense, leading to the conclusion that the sixth sense improves multisensory integration through optimizing uncertainty of information received from other sensory modalities. Chapter three in this part would address whether relative timing is applicable to the sixth sense like other senses. The last part of book aimed at directly discussing the sixth sense into the context of human health and behavior is organized into four chapters. The first chapter is to discuss neurodevelopmental changes in the sixth sense, while the second and third ones will discuss that in relation to psychiatric and neurological disorders. The most striking question how much power the sixth sense the sixth sense have over human health and behavior is addressed in the fourth chapter of this part and final chapter of book, which will be prepared using neural network models and sophisticated portraits possible for the system of sixth sense.

Flagship Universities in Africa Damtew Teferra,2017-06-26 This book advances an in-depth, comprehensive analysis of flagship universities in Africa – the largest, most selective, and most prestigious universities on the continent. The book draws on a range of country-specific case-studies, including Botswana, Egypt, Ethiopia, Ghana, Kenya, Mauritius, Nigeria, Senegal, Tanzania and Zambia, to explore a range of issues associated with flagship universities and their role in higher education in Africa. . Newly-established institutions in new nation states, and states emerging from conflict, often rely on these flagship universities to train their academics, and build their intelligentsia; flagship universities are thus capacity-builders and trend-setters in their respective countries and sub-regions. This volume brings together a range of scholars to celebrate the impact, influence and contributions of African universities, not only within Africa, but across the globe The book will be of great significance to students and researchers in the field of education, particularly those with an interest in sociology and politics of higher education.

SQL Server Backup and Restore Shawn McGehee,2012 A database administrator's duties include ensuring that a database can be restored and recovered in the event of error or disaster. This book discusses how to perform backup and restore operations using SQL Server Management Studio (SSMS), basic T-SQL scripts and Red Gate's SQL Backup tool. Capturing backups using SSMS or simple scripts is fine for one-off backup operations, but any backups that form part of the recovery strategy for any given database must be automated with some built-in checks that, for example, alert the responsible database administrator immediately if a problem arises. The tool of choice in this book for backup automation is Red Gate SQL Backup. Building an automated solution will take a lot of work, but this book offers some advice on possible options, such as PowerShell scripting, T-SQL scripts and SQL Server Agent jobs. --

Culture and Tourism in a Smart, Globalized, and Sustainable World Vicky Katsoni,Ciná van Zyl,2021-06-21 This book gathers the proceedings of the 7th International Conference, with the theme "Culture and Tourism in a Smart, Globalized and Sustainable World," held on Hydra Island, Greece, on June 17-19, 2020, published with the support of the International Association of Cultural and Digital Tourism. Highlighting the contributions made by numerous writers to the advancement of tourism research, this book presents a critical academic discourse on sustainable practices in the smart tourism context, improving readers' understanding of, and stimulating future debates in, this

critical area. In addition to the knowledge economy and the concept of smart destinations, the book addresses new modes of tourism management and development, as well as emerging technologies, including location-based services, the Internet of things, smart cities, mobile services, gamification, digital collections and the virtual visitor, social media, social networking, and augmented reality.
