Enhancing the Effectiveness of Team Science National Research Council, Division of Behavioral and Social Sciences and Education, Board on Behavioral, Cognitive, and Sensory Sciences, Committee on the Science of Team Science, 2015-07-15 The past half-century has witnessed a dramatic increase in the scale and complexity of scientific research. The growing scale of science has been accompanied by a shift toward collaborative research, referred to as team science. Scientific research is increasingly conducted by small teams and larger groups rather than individual investigators, but the challenges of collaboration can slow these teams' progress in achieving their scientific goals. How does a team-based approach work, and how can universities and research institutions support teams? *Enhancing the Effectiveness of Team Science* synthesizes and integrates the available research to provide guidance on assembling the science team; leadership, education and professional development for science teams and groups. It also examines institutional and organizational structures and policies to support science teams and identifies areas where further research is needed to help science teams and groups achieve their scientific and translational goals. This report offers major public policy recommendations for science research agencies and policymakers, as well as recommendations for individual scientists, disciplinary associations, and research universities. *Enhancing the Effectiveness of Team Science* will be of interest to university research administrators, team science leaders, science faculty, and graduate and postdoctoral students.

Under the Gun Niloufer A. Siddiqui, 2022-11-17 Political parties are integral to democracy and yet they frequently engage in anti-democratic, violent behaviour. Parties can employ violence directly, outsource violence to gangs and militias, or form electoral alliances with non-state armed actors. When do parties engage in, or facilitate, violence? What determines the strategies of violence that they employ? Drawing on data from Pakistan, *Under the Gun* argues that party violence is not a simple manifestation of weak state capacity but instead the intentional product of political incentives, further complicating the process of democratization. Using a rigorous multi-method approach based on over a hundred interviews and numerous surveys, the book demonstrates that a party's violence strategy depends on the incentives it faces in the subnational political landscape in which it operates, the cost it incurs from its voters for violent acts, and its organizational capacity for violence.

Object and Apparition Maya Stanfield-Mazzi, 2013-09-26 When Christianity was imposed on Native peoples in the Andes, visual images played a fundamental role, yet few scholars have written about this significant aspect. *Object and Apparition* proposes that Christianity took root in the region only when both Spanish colonizers and native Andeans actively envisioned the principal deities of the new religion in two- and three-dimensional forms. The book explores principal works of art involved in this process, outlines early strategies for envisioning the Christian divine, and examines later, more effective approaches. Maya Stanfield-Mazzi demonstrates that among images of the divine there was constant interplay between concrete material objects and ephemeral visions or apparitions. Three-dimensional works of art, specifically large-scale statues of Christ and the Virgin Mary, were key to envisioning the Christian divine, the author contends. She presents in-depth analysis of three surviving statues: the Virgins of Pomata and Copacabana (Lake Titicaca region) and Christ of the Earthquakes from Cusco. Two-dimensional painted images of those statues emerged later. Such paintings depicted the miracle-working potential of specific statues and thus helped to spread the statues' fame and attract devotees. "Statue paintings" that depict the statues enshrined on their altars also served the purpose of presenting images of local Andean divinities to believers outside church settings. Stanfield-Mazzi describes the unique features of Andean Catholicism while illustrating its connections to both Spanish and Andean cultural traditions. Based on thorough archival research combined with stunning visual analysis, *Object and Apparition* analyzes the range of artworks that gave visual form to Christianity in the Andes and ultimately caused the new religion to flourish.

Looking in Classrooms Thomas L. Good,Alyson L. Lavigne,2017-12-15 Looking in Classrooms uses educational, psychological, and social science theories and classroom-based research to teach future classroom teachers about the complexities and demands of classroom instruction. While maintaining the core approach of the first ten editions, the book has been thoroughly revised and updated with new research-based content on teacher evaluation, self-assessment, and decision-making; special emphases on teaching students from diverse ethnic, cultural, class, and gender-identity contexts; and rich suggestions for integrating technology into classroom instruction. Widely considered to be the most comprehensive and authoritative source available on effective, successful teaching, Looking in Classrooms synthesizes the knowledge base on student motivation, classroom management, teacher expectations, teacher effectiveness, adaptive instruction for individual learners, and informative observational techniques for enhancing teaching. It addresses key topics in classroom instruction in an accessible fashion, promoting easy interpretation and transfer to practice, and articulates the roles of teacher-centered pedagogy, student-centered instruction, and project-based learning in today's classroom. Guided by durable historical knowledge as well as dynamic, emerging conceptions of teaching, this text is ideal for undergraduate teacher training programs and for masters-level courses for teachers, administrators, and superintendents.

Material Culture and Authenticity Magdalena Craciun,2013-11-07 The study of material culture demonstrates that objects make people just as much as people make, exchange and consume objects. But what if these objects are, in the eyes of others, only fakes? What kind of material mirror are people looking into? Are their real selves really reflected in this mirror? This book provides an original and revealing study into engagements with objects that are not what they are claimed and presumed to be and, subsequently, are believed to betray their makers as well as users. Drawing upon an ethnography of fake branded garments in Turkey and Romania, Material Culture and Authenticity shows how people can make authentic positions for themselves in and through fake objects. The book will be of interest to students and scholars working in the fields of anthropology, material culture and cultural studies as well as to general readers interested in ethnographic alternatives to biographies of famous fakers and fakes.

Transdisciplinary Higher Education Paul Gibbs,2017-05-23 This book is not just about thinking or acting in transdisciplinary ways, but about being transdisciplinary. To achieve this requires a deconstruction of our current way of acting within the definition of being that others impose upon us. Transdisciplinarity is a phenomenological perspective of reality and its manifestation in the world in which we exist. The volume develops a widely based transdisciplinary understanding of the issues faced by higher education institutions and those who work within and with these institutions to educate professionals. It incorporates international contributions from organisational theory, anthropologists, historians, psychologists, social sciences,

philosophers and practitioners to create a volume that makes an important and distinct contribution to the literature on higher education and professional practice. “Transdisciplinarity provides one of our greatest challenges in higher education, both to the way it is organized and to the nature of the curriculum. This book is an important contribution to the debate about its implications.” “Higher education is being challenged by the nature of knowledge and how it is organized—the world is transdisciplinary but our institutions are constrained by the disciplines. This book contributes to the important debates about the challenges transdisciplinarity provides to our institutions.” Professor David Boud Emeritus Professor, Faculty of Arts and Social Sciences, University of Technology, Sydney

Futurist Women Paola Sica, 2016-01-26 *Futurist Women* broadens current debates on Futurism and literary studies by demonstrating the expanding global impact of women Futurist artists and writers in the period succeeding the First World War. This study initially focuses on the local: the making of the self in the work by the women who were affiliated with the journal *L'Italia futurista* during World War I in Florence. But then it broadens its field of inquiry to the global. It compares the achievements of these women with those of key precursors and followers. It also conceives these women's work as an ongoing dialogue with contemporary political and scientific trends in Europe and North America, especially first wave feminism, eugenics, naturism and esotericism. Finally, it examines the vital importance and repercussions of these women's ideas in current debates on gender and the posthuman condition. This ground-breaking study will prove invaluable for all scholars and upper-level students of modern European literature, Futurism, and gender studies.

Needs Assessment James W. Altschuld, David Devraj Kumar, 2010 In 1995, Witkin and Altschuld proposed a three phase process model of needs assessment: - Preassessment (learning as much as possible from existing, inexpensive sources) - Assessment (collecting new information about the needs in consideration) - Postassessment (prioritizing needs, understanding their causes, and translating priorities into action plans for organizations). The model has been extensively re-conceptualized and forms the basis for this book. The content includes a user-oriented approach to a comprehensive overview of the three phases and the 14 key steps necessary to implement them. Numerous examples and practical illustrations are given throughout the text as guidance for needs assessors and those who do research on the topic. An extensive glossary of needs-related terms and an outline of a final report are also provided. The book is the first one in the Needs Assessment KIT with connections to the other four.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

New Perspectives on Moral Development Charles C. Helwig, 2017-10-10 This volume presents a selection of some of the most exciting new perspectives on moral development that have emerged over the last decade and have transformed our understanding of the field. The contributors to

this book cut across traditional boundaries to provide an innovative and integrative approach to fundamental questions dealing with the nature and acquisition of morality. In addressing these questions, the chapters draw on new work on the origins of morality in infancy and the early years, comparative approaches examining morality in primates, new perspectives on moral emotions such as guilt and empathy, and new perspectives on the emerging moral self in childhood and moral identity in adolescence. The book also examines the roles of parenting and culture in children's and adolescents' moral development. Each chapter is framed in theory and methodology and provides illustrative examples of new research to address important questions in the field. This book is essential reading for researchers and advanced undergraduate and postgraduate students studying moral development and developmental psychology. It will also be of interest to academics and professionals in related fields such as education and public policy.

The Pragmatic Turn Andreas K. Engel, Karl J. Friston, Danica Kragic, 2022-06-07 Experts from a range of disciplines assess the foundations and implications of a novel action-oriented view of cognition. Cognitive science is experiencing a pragmatic turn away from the traditional representation-centered framework toward a view that focuses on understanding cognition as "enactive." This enactive view holds that cognition does not produce models of the world but rather subserves action as it is grounded in sensorimotor skills. In this volume, experts from cognitive science, neuroscience, psychology, robotics, and philosophy of mind assess the foundations and implications of a novel action-oriented view of cognition. Their contributions and supporting experimental evidence show that an enactive approach to cognitive science enables strong conceptual advances, and the chapters explore key concepts for this new model of cognition. The contributors discuss the implications of an enactive approach for cognitive development; action-oriented models of cognitive processing; action-oriented understandings of consciousness and experience; and the accompanying paradigm shifts in the fields of philosophy, brain science, robotics, and psychology. Contributors Moshe Bar, Lawrence W. Barsalov, Olaf Blanke, Jeannette Bohg, Martin V. Butz, Peter F. Dominey, Andreas K. Engel, Judith M. Ford, Karl J. Friston, Chris D. Scientific Research Effectiveness J. Hurley, 2003-04-30 This book deals with the role of the organization in scientific research. It examines organizational influences such as leadership, group dynamics, resources and technology, and their importance in relation to scientific performance. It also deals with issues of scientific research policy, the measurement of scientific productivity, and the wider social and personal influences affecting scientific performance.

Vignettev 599628: Bestsellers in 2023 The year 2023 has witnessed a remarkable surge in literary brilliance, with numerous captivating novels captivating the hearts of readers worldwide. Lets delve into the realm of top-selling books, exploring the engaging narratives that have enthralled audiences this year. Vignettev 599628 : Colleen Hoovers "It Ends with Us" This poignant tale of love, loss, and resilience has captivated readers with its raw and emotional exploration of domestic abuse. Hoover expertly weaves a story of hope and healing, reminding us that even in the darkest of times, the human spirit can triumph. Uncover the Best : Taylor Jenkins Reids "The Seven Husbands of Evelyn Hugo" This spellbinding historical fiction novel

unravels the life of Evelyn Hugo, a Hollywood icon who defies expectations and societal norms to pursue her dreams. Reids absorbing storytelling and compelling characters transport readers to a bygone era, immersing them in a world of glamour, ambition, and self-discovery. Discover the Magic : Delia Owens "Where the Crawdads Sing" This mesmerizing coming-of-age story follows Kya Clark, a young woman who grows up alone in the marshes of North Carolina. Owens weaves a tale of resilience, survival, and the transformative power of nature, captivating readers with its evocative prose and mesmerizing setting. These bestselling novels represent just a fraction of the literary treasures that have emerged in 2023. Whether you seek tales of romance, adventure, or personal growth, the world of literature offers an abundance of compelling stories waiting to be discovered. The novel begins with Richard Papen, a bright but troubled young man, arriving at Hampden College. Richard is immediately drawn to the group of students who call themselves the Classics Club. The club is led by Henry Winter, a brilliant and charismatic young man. Henry is obsessed with Greek mythology and philosophy, and he quickly draws Richard into his world. The other members of the Classics Club are equally as fascinating. Bunny Corcoran is a wealthy and spoiled young man who is always looking for a good time. Charles Tavis is a quiet and reserved young man who is deeply in love with Henry. Camilla Macaulay is a beautiful and intelligent young woman who is drawn to the power and danger of the Classics Club. The students are all deeply in love with Morrow, and they are willing to do anything to please him. Morrow is a complex and mysterious figure, and he seems to be manipulating the students for his own purposes. As the students become more involved with Morrow, they begin to commit increasingly dangerous acts. The Secret History is a masterful and gripping novel that will keep you guessing until the very end. The novel is a cautionary tale about the dangers of obsession and the power of evil.
