Learning Science in Informal Environments National Research Council, Division of Behavioral and Social Sciences and Education, Center for Education, Board on Science Education, Committee on Learning Science in Informal Environments, 2009-05-27 Informal science is a burgeoning field that operates across a broad range of venues and envisages learning outcomes for individuals, schools, families, and society. The evidence base that describes informal science, its promise, and effects is informed by a range of disciplines and perspectives, including field-based research, visitor studies, and psychological and anthropological studies of learning. Learning Science in Informal Environments draws together disparate literatures, synthesizes the state of knowledge, and articulates a common framework for the next generation of research on learning science in informal environments across a life span. Contributors include recognized experts in a range of disciplines—research and evaluation, exhibit designers, program developers, and educators. They also have experience in a range of settings—museums, after-school programs, science and technology centers, media enterprises, aquariums, zoos, state parks, and botanical gardens. Learning Science in Informal Environments is an

invaluable guide for program and exhibit designers, evaluators, staff of science-rich informal learning institutions and community-based organizations, scientists interested in educational outreach, federal science agency education staff, and K-12 science educators.

Global Value Chain Development Report 2021 Banque asiatique de développement, WORLD TRADE ORGANIZATION SECRETARIAT., 2022-01-25 A radical shift is underway in global value chains as they increasingly move beyond traditional manufacturing processes to services and other intangible assets. Digitization is a leading factor in this transformation, which is being accelerated by the coronavirus disease (COVID-19) pandemic. The Global Value Chain Development Report, the third of a biennial series, explores this shift beyond production. The report shows how the rise of services value chains offers a new path to development and how protectionism and geopolitical tensions, environmental risks, and pandemics are undermining the stability of global value chains and forcing their reorganization geographically. It is co-published by the WTO, the Asian Development Bank, the Research Institute for Global Value Chains at the University of International Business and Economics, the Institute of Developing Economies, and the China Development Research Foundation.

The Psychology of Friendship Mahzad Hojjat, Anne Moyer, 2017 In the late 20th and 21st centuries, the meteoric rise of countless social media platforms and mobile applications have illuminated the profound need friendship and connection have in all of our lives; and yet, very few scholarly volumes have focused on this unique and important bond during this new era of relating to one another. Exploring such topics as friendship and social media, friendship with current and past romantic partners, co-workers, mentors, and even pets, editors Mahzad Hojjat and Anne Moyer lead an expert group of global contributors as they each explore how friendship factors within our lives today. What does it mean to be a friend? What roles do friendships play in our own development? How do we

befriend those across the race, ethnicity, gender, and orientation spectrums? What happens when a friendship turns sour? What is the effect of friendship - good and bad - on our mental health? Providing a much needed update to the field of interpersonal relations, *The Psychology of Friendship* serves as a field guide for readers as they shed traditional definitions of friendship in favor of contemporary contexts and connections.

Cognitive Biases in Visualizations Geoffrey Ellis, 2018-09-27 This book brings together the latest research in this new and exciting area of visualization, looking at classifying and modelling cognitive biases, together with user studies which reveal their undesirable impact on human judgement, and demonstrating how visual analytic techniques can provide effective support for mitigating key biases. A comprehensive coverage of this very relevant topic is provided through this collection of extended papers from the successful DECISIVe workshop at IEEE VIS, together with an introduction to cognitive biases and an invited chapter from a leading expert in intelligence analysis. *Cognitive Biases in Visualizations* will be of interest to a wide audience from those studying cognitive biases to visualization designers and practitioners. It offers a choice of research frameworks, help with the design of user studies, and proposals for the effective measurement of biases. The impact of human visualization literacy, competence and human cognition on cognitive biases are also examined, as well as the notion of system-induced biases. The well referenced chapters provide an excellent starting point for gaining an awareness of the detrimental effect that some cognitive biases can have on users' decision-making. Human behavior is complex and we are only just starting to unravel the processes involved and investigate ways in which the computer can assist, however the final section supports the prospect that visual analytics, in particular, can counter some of the more common cognitive errors, which have been proven to be so costly.

Dangerous Designs Parminder Bhachu, 2005-10-05 In late-1990s Britain, the salwaar-kameez or 'Punjabi suit' emerged as a high-fashion garment. Popular both on the catwalk and on the street, it made front-page news when worn by Diana, Princess of Wales and by Cherie Booth, the wife of UK Prime Minister Tony Blair. In her ethnography of the local and global design economies established by Asian women fashion entrepreneurs, Parminder Bhachu focuses on the transformation of the salwaar-kameez from negatively coded 'ethnic clothing' to a global garment fashionable both on the margins and in the mainstream. Exploring the design and sewing businesses, shops and street fashions in which this revolution has taken place, she shows how the salwaar-kameez is today at the heart of new economic micro-markets which themselves represent complex, powerfully coded means of cultural dialogue and racial politics. The innovative designs of second-generation British Asian women are

drawn from characteristically improvisational migrant cultural codes. Through their hybrid designs and creation of new aesthetics, these women cross cultural boundaries, battling with racism and redefining both Asian and British identities. At the same time, their border-crossing commercial entrepreneurship produces new diaspora economies which give them control over many economic, aesthetic, cultural and technological resources. In this way, the processes of global capitalism are gendered, racialized and localized through the interventions of diasporic women from the margins.

Bioremediation and Biotechnology Khalid Rehman Hakeem,Rouf Ahmad Bhat,Humaira Qadri,2020-01-26 Toxic substances threatens aquatic and terrestrial ecosystems and ultimately human health. The book is a thoughtful effort in bringing forth the role of biotechnology for bioremediation and restoration of the ecosystems degraded by toxic and heavy metal pollution. The introductory chapters of the book deal with the understanding of the issues concerned with the pollution caused by toxic elements and heavy metals and their impacts on the different ecosystems followed by the techniques involved in monitoring of the pollution. These techniques include use of bio-indicators as well as modern techniques for the assessment and monitoring of toxicants in the environment. Detailed chapters discussing the role of microbial biota, aquatic plants, terrestrial plants to enhance the accumulation efficiency of these toxic and heavy metals are followed by remediation techniques involving myco-remediation, bio-pesticides, bio-fertilizers, phyto-remediation and rhizo-filtration. A sizable portion of the book has been dedicated to the advanced bio-remediation techniques which are finding their way from the laboratory to the field for revival of the degraded ecosystems. These involve bio-films, micro-algae, genetically modified plants and filter feeders. Furthermore, the book is a detailed comprehensive account for the treatment technologies from unsustainable to sustainable. We believe academicians, researchers and students will find this book informative as a complete reference for biotechnological intervention for sustainable treatment of pollution.

Twelve Years a Slave Solomon Northup,2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York.

Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

Waiting and the Temporalities of Irregular Migration Christine M. Jacobsen, Marry-Anne Karlsen, Shahram Khosravi, 2020-10-15 This edited volume approaches waiting both as a social phenomenon that proliferates in irregularised forms of migration and as an analytical perspective on migration processes and practices. Waiting as an analytical perspective offers new insights into the complex and shifting nature of processes of bordering, belonging, state power, exclusion and inclusion, and social relations in irregular migration. The chapters in this book address legal, bureaucratic, ethical, gendered, and affective dimensions of time and migration. A key concern is to develop more theoretically robust approaches to waiting in migration as constituted in and through multiple and relational temporalities. The chapters highlight how waiting is configured in specific legal, material, and socio-cultural situations, as well as how migrants encounter, incorporate, and resist temporal structures. This collection includes ethnographic and other empirically based material, as well as theorizing that cross-cut disciplinary boundaries. It will be relevant to scholars from anthropology and sociology, and others interested in temporalities, migration, borders, and power.

The Oxford Handbook of Contextual Approaches to Human Resource Management Dr. Emma Parry, Dr. Michael J. Morley, Dr. Chris Brewster, 2021-05-25 In recent years scholars and practitioners have increasingly recognized that human resource management (HRM) has paid insufficient attention to the impact of context. While research has been devoted to examining the impact of national context on HRM systems, this literature has been largely separate from that focused on other levels of context affecting organizational choices in HRM strategies, such as the impact of the organizational environment, industry sector, occupation or workforce characteristics. In addition, research has tended to consider elements of context in isolation rather than considering its impact at different levels. The goal of *The Oxford Handbook of Contextual Approaches to Human Resource Management* is to provide a more holistic approach to developing a contextual understanding of HRM. This Handbook offers a comprehensive understanding of the influence of contextual characteristics on the design and implementation of HRM systems. Rather than focusing on a single level or approach to examining context, the Handbook provides both conceptual and empirical analyses of different elements of context using a range of different lenses and measures. In order to explore the influence of contextual factors at multiple levels, the volume assembles a range of detailed accounts of how context affects the design, implementation and impact of HRM activities.

Internet of Things (IoT) in 5G Mobile Technologies Constandinos X. Mavromoustakis, George Mastorakis, Jordi Mongay Batalla, 2016-04-20 This book reports on the latest advances in the modeling, analysis and efficient management of information in Internet of Things (IoT) applications in the context of 5G access technologies. It presents cutting-edge applications made possible by the

implementation of femtocell networks and millimeter wave communications solutions, examining them from the perspective of the universally and constantly connected IoT. Moreover, it describes novel architectural approaches to the IoT and presents the new framework possibilities offered by 5G mobile networks, including middleware requirements, node-centrality and the location of extensive functionalities at the edge. By providing researchers and professionals with a timely snapshot of emerging mobile communication systems, and highlighting the main pitfalls and potential solutions, the book fills an important gap in the literature and will foster the further developments of 5G hosting IoT devices.
