**Histamine in Inflammation** Robin Thurmond, 2011-06-29 The year 2010 marks the centennial for the identification of histamine and the first glimpse of its many physiological functions. From these initial findings a rich tapestry of research has uncovered roles for histamine in almost every physiological process with new findings emerging every year. These diverse roles of histamine have made for fertile ground for the discovery of novel therapeutics, and these drugs have been so successful that the term “antihistamine” has entered the common lexicon. This volume is an attempt to give a snapshot in time as to the current understanding of the role of histamine in just one important therapeutic area—inflammation. The first three chapters provide some background context for the rest of the book starting out with a historical perspective by Figueroa and Shankley. Bongers et al provide an overview of the pharmacology of the four histamine receptors and the chapter by Hiroshi Ohtsu describes how histamine is synthesized as well as the insights derived from mice where this synthesis is disrupted. The next several chapters discuss disease areas where histamine is known to be involved. Chapter 4 by Thomas Taylor-Clark outlines the role of histamine in allergic rhinitis, an area where antihistamines are commonly used. This is also true for ocular allergy as discussed by Ohbayashi et al. Both of these chapters highlight aspects of these conditions that are still not well-controlled and suggest the utility of new antihistamines targeting other histamine receptors.

Twelve Years a Slave Solomon Northup, 2024-01-04 Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Northup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous

memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after being freed.

**Late-Life Depression** Steven P. Roose, Harold A. Sackeim, 2004-07-15 We live in an aging world. Illnesses that are prevalent and cause significant morbidity and mortality in older people will consume an increasing share of health care resources. One such illness is depression. This illness has a particularly devastating impact in the elderly because it is often undiagnosed or inadequately treated. Depression not only has a profound impact on quality of life but it is associated with an increased risk of mortality from suicide and vascular disease. In fact for every medical illness studied, e.g. heart disease, diabetes, cancer, individuals who are depressed have a worse prognosis. Research has illuminated the physiological and behavioral effects of depression that accounts for these poor outcomes. The deleterious relationship between depression and other illnesses has changed the concept of

late-life depression from a psychiatric disorder that is diagnosed and treated by a psychiatrist to a common and serious disorder that is the responsibility of all physicians who care for patients over the age of 60. This is the first volume devoted to the epidemiology, phenomenology, psychobiology, treatment and consequences of late-life depression. Although much has been written about depressive disorders, the focus has been primarily on the illness as experienced in younger adults. The effects of aging on the brain, the physiological and behavioral consequences of recurrent depression, and the impact of other diseases common in the elderly, make late-life depression a distinct entity. There is a compelling need for a separate research program, specialized treatments, and a book dedicated to this disorder. This book will be invaluable to psychiatrists, gerontologists, clinical psychologists, social workers, students, trainees, and others who care for individuals over the age of sixty.

**Subtitling Chinese Cinema: A Case Study of Zhang Yimou's Films** Yilei Yuan, 2021-01-12 Doctoral Thesis / Dissertation from the year 2016 in the subject Film Science, University of Glasgow, language: English, abstract: In recent years, more and more Chinese films have been exported abroad. This thesis intends to explore the subtitling of Chinese cinema into English, with Zhang Yimou's films as a case study. Zhang Yimou is arguably the most critically and internationally acclaimed Chinese filmmaker, who has experimented with a variety of genres of films. I argue that in the subtitling of his films, there is an obvious adoption of the domestication translation strategy that reduces or even omits Chinese cultural references. I try to discover what cultural categories or perspectives of China are prone to the domestication of translation and have formulated five categories: humour, politeness, dialect, history and songs and the Peking Opera. My methodology is that I compare the source Chinese dialogue lines with the existing English subtitles by providing literal translations of the source lines, and I will also give my alternative translations that tend to retain the source cultural references better. I also speculate that the domestication strategy is frequently employed by subtitlers possibly because the subtitlers assume the source cultural references are difficult for target language subtitle readers to comprehend, even if they are translated into a target language. However, subtitle readers are very likely to understand more than what the dialogue lines and the target language subtitles express, because films are multimodal entities and verbal information is not the only source of information for subtitle readers. The image and the sound are also significant sources of information for subtitle readers who are constantly involved in a dynamic film-watching experience. They are also expected to grasp visual and acoustic information.

The complete omission or domestication of source cultural references might also affect their interpretation of the non-verbal cues. I also contemplate that the translation, which frequently domesticates the source culture carried out by a translator who is also a native speaker of the source language, is ‘submissive translation’.

**Steven Spielberg** Joseph McBride,1999-05-06 Director, producer, and studio magnate, Steven Spielberg is the most successful filmmaker in movie history, responsible for such box-office blockbusters as Jaws, Close Encounters of the Third Kind, E.T. The Extra-Terrestrial, the Indiana Jones trilogy, Jurassic Park, and Saving Private Ryan. From Spielberg's troubled youth to the personal epiphany of Schindler's List and the founding of DreamWorks, this impeccable biography reveals hidden dimensions of his personality and creative evolution while illuminating each film. This impeccable biography reveals hidden dimensions of the director's creative evolution while illuminating each film.

The most up-to-date dictionary of its kind available, this is a must-have for all students of film studies and ancillary subjects, as well as an informative read for cinephiles and for anyone with an interest in films and film criticism.

Medicine Caroline Petit,2014-01-30 The extent to which classical theories about, and practices of, medical knowledge have shaped and continue to define medicine today is remarkable: but not always widely appreciated. Caroline Petit here offers a concise yet comprehensive account of medicine in antiquity which explores precisely that fascinating legacy. Discussing topics such as medical ethics, diagnostic explanations of illness and disease, matters of sex and gender, the ancient division between body and soul, interpretations of madness and melancholia, and methods of medical teaching

and dissemination, the author draws fascinating parallels between the ancient, early modern and modern periods. We learn, positively, that the ancient medical thinking of Galen, Hippocrates and Soranos of Ephesus nourished the thought of some of the greatest physicians in history; but also that, negatively, modern medical thinkers sometimes misused ancient texts in pursuit of their own social and political agendas - a recurring problem in the history of medicine. Discussing a variety of ancient texts, from the Hippocratic era to the late Roman Empire, and examining contested literary evidence and interpretations, Petit skilfully traces the trajectory of medical practice from its magical and religious origins to a rational science of pathology, physiology, surgery and anatomy.

Space Systems for Disaster Warning, Response, and Recovery Scott Madry, 2014-09-06 This SpringerBrief provides a general overview of the role of satellite applications for disaster mitigation, warning, planning, recovery and response. It covers both the overall role and perspective of the emergency management community as well as the various space applications that support their work. Key insights are provided as to how satellite telecommunications, remote sensing, navigation systems, GIS, and the emerging domain of social media are utilized in the context of emergency management needs and requirements. These systems are now critical in addressing major man-made and natural disasters. International policy and treaties are covered along with various case studies from around the world. These case studies indicate vital lessons that have been learned about how to use space systems more effectively in addressing the so-called "Disaster Cycle." This book is appropriate for practicing emergency managers, Emergency Management (EM) courses, as well as for those involved in various space applications and developing new satellite technologies.

IGF and Nutrition in Health and Disease M. Sue Houston, Jeffrey M. P. Holly, Eva L. Feldman, 2004-08-04 A benchmark review on how specific

nutrients or adverse nutritional states impact the components of the IGF (Insulin-like Growth Factor) system and affect human health and disease. The authors describe the fundamentals of the IGF system, explain its basic mechanisms of action, illuminate its essential role in physical development across the life span, and highlight the link between normal and abnormal cellular growth resulting in tumor formation. They also fully examine the clinical aspects of nutrition and IGF, from pre- and postnatal development through old age, in the maintenance of normal metabolism, bone, and muscle health, and their role in pathological states. Special attention is given to critical illness, diabetes, gastrointestinal diseases, kidney failure, endocrine dysfunctions, cardiovascular disease, neurological disorders, and cancer, as well as to their potential for IGF therapy.

**For All Time** Jude Deveraux, 2014-07-01 NEW YORK TIMES BESTSELLER • Jude Deveraux returns to the magnificent, sunny island in *For All Time*, the second novel in her Nantucket Brides trilogy—this time featuring the next generation of her beloved family of Montgomery-Taggerts. The wedding of Alix Madsen and Jared Montgomery is a glorious affair at an elegant little chapel in the woods, followed by dinner and dancing, all while moonlight blankets the festivities in a romantic glow. While most guests are fixed on the happy couple, Jared's cousin Graydon can't look away from a bridesmaid, Toby Wyndam. It's not just her quiet beauty that enthralls him or the way she makes him laugh. Toby possesses the truly remarkable ability of being able to distinguish Graydon from his identical twin brother, Rory. According to family legend, such a gift marks her as Graydon's True Love. But Graydon knows there is no possible way that they can ever be together, for he is heir to the Lanconian throne and is to marry a noble woman who has been chosen for him. Yet, intrigued by Toby, he asks her to help him hide on Nantucket for a week away from regal responsibilities. In exchange, he'll assist her with planning acclaimed novelist Victoria Madsen's lavish wedding. Since they both know their union is impossible, the pair promises that they will never be more than just friends. But there's more going on between Graydon and Toby than her unique power to tell him apart from his twin. At work are forces beyond their control, which are ruled by time itself. Combine that with the magical island of Nantucket, and a seductive spell is cast over Graydon and Toby. If they are to be together, they must change what once was, as well as what will be. **BONUS:** This edition includes an excerpt from Jude Deveraux's *Ever After*. Praise for Jude Deveraux and *For All Time* “Jude Deveraux is an amazing author, and her Nantucket Brides series will sweep you away.” —Susan Mallery “Jude Deveraux takes us to a place where dreams are made. . . . *For All Time* is a page-turning time-travel romance that captures your imagination from the start and keeps hold till the very last page.”—Fresh Fiction “A beautifully written story with a refreshing old-

romance feel . . . Fans of Deveraux will be delighted, while new readers will fall in love with her signature writing style.”—RT Book Reviews “A charming tale.”—Library Journal “Engrossing . . . [a] romance that transcends time.”—Kirkus Reviews

User-Centered Translation Tytti Suojanen, Kaisa Koskinen, Tiina Tuominen, 2014-12-05 Translators want to take their readers into account, but traditional translation theory does not offer much advice on how to do that. User-Centered Translation (UCT) offers practical tools and methods to help empower translators to act for their readers. This book will help readers to: Create mental models such as personas; Test translations with usability testing methods; Carry out reception research. Including assignments, case studies and real-life scenarios ranging from the translation of user instructions and EU texts to literary and audiovisual translation, this is an essential guide for students, translators and researchers.

**Inflammation and Cancer** Brendan J. Jenkins, 2023-06-26 This second edition volume expands on the previous edition with an update on the broad spectrum of research models, techniques, and protocols used in laboratories by basic and clinical researchers. The chapters in this book are divided into two parts. Part One discusses the latest findings on the development and characterization of representative research models for chronic immune-based diseases and inflammation-associated cancers. Part Two covers biochemical, molecular, and cellular biological techniques that are commonly used to dissect the molecular mechanisms and cellular processes that drive the pathogenesis of certain disease states. Written in the highly successful *Methods in Molecular Biology* series format, chapters include introductions to their respective topics, lists of the necessary materials and reagents, step-by-step, readily reproducible laboratory protocols, and tips on troubleshooting and avoiding known pitfalls. Cutting-edge and comprehensive, *Inflammation and Cancer: Methods and Protocols, Second Edition* is a valuable resource for those with a diverse range of laboratory-based experience, ranging from novice undergraduate students to established basic or clinical researchers who wish to diversify their existing portfolio of practical knowledge in the field.
