Practical Design, Construction and Operation of Food Facilities J. Peter Clark,2008-09-12 Around the world concerns about cost, efficiency, and safety - employee, product, process and consumer -- have led to changes in the way food plants are planned, constructed and evaluated. From initiation of major capital requests to legal design requirements to project management and plant operations, food engineers and scientists must understand the myriad of requirements and responsibilities of successful food facilities. J. Peter Clark provides that guidance in this complete volume. Included are: A summary of lessons on understanding how management evaluates potential investments and how they can contribute to ultimate shareholder value, and checklists to help accurately estimate capital and operating costs Important, and in some cases unique, features of a food plant including focus on food safety. Addresses not only consumer products, but ingredients for consumer products and the concerns of distribution and flexibility that must be considered. Also considered are the support facilities that are equally essential to the safe production of food An effective approach to understanding production lines and optimizing operations during expansion by briefly introducing Goldratt's Theory of Constraints. The book explores the challenges of construction while maintaining safe and sanitary operations An approach and methodology that can be extended beyond the case studies presented in order to effectively plan development processes and make correct equipment selections Project management and plant operations guidance to assist engineers who find themselves in the role of managing a design or construction process project, or of supervising a portion of a plant. Includes suggestions for effectively troubleshooting an unsatisfactory operation Provides real-world insights including guides for proper project estimation, understanding the role and importance of support facilities, maintaining standards while under construction and other vital considerations Includes checklists and proven approaches to guide the reader through the wide range of necessary planning and implementation steps Considers factors for both new plant construction and expansion of existing plants

Forgotten Grasslands of the South Reed F. Noss,2012-12-03 Forgotten Grasslands of the South is the study of one of the biologically richest and most endangered ecosystems in North America. In a seamless blend of science and personal observation, renowned ecologist Reed Noss explains the natural history of southern grasslands, their origin and history, and the physical determinants of grassland distribution, including ecology, soils, landform, and hydrology. In addition to offering fascinating new information about these little-studied ecosystems, Noss demonstrates how natural history is central to the practice of conservation. Although theory and experimentation have recently dominated the field of ecology, ecologists are coming to realize how these distinct approaches are not divergent but complementary, and that pursuing them together can bring greater knowledge and understanding of how the natural world works and how we can best conserve it. This long-awaited work sets a new standard for scientific literature and is essential reading for those who study and work to conserve the grasslands of the South as well as for everyone who is fascinated by the natural world.

Supporting the Doughboys Leo P Hirrel,2018-09-16 One hundred years ago, the US Army suddenly found itself at the center of one of the greatest human conflicts until that time. World War I came at a time when the Army lost the institutional knowledge of how to raise and employ large armies in the decades after the Civil War. Our Army needed to transform itself in short order into a world-class fighting organization, capable of engaging one of the world's best armies. At the same time, it needed to adapt to modern weapons and technologies. Dr. Leo Hirrel has prepared a comprehensive study of the emergence of Army sustainment as a key part of transforming itself into a modern fighting force. It is a story of how the Army began with only the vaguest notions of how to support a multi-million Soldier Army, and with even less concept of how to operate overseas. Yet by the end of the war, the Army developed sustainment solutions that would last through the next war and beyond. Of course there were numerous mistakes and miscalculations, but the achievements were truly remarkable. This is a story for all students of military history. Understanding the role and development of sustainment functions in the American Expeditionary Forces is critical to appreciating the Army in World War I. This book provides a breadth of education for military leaders regardless of their branch.

Landscape as Infrastructure Pierre Belanger, 2016-11-10 As ecology becomes the new engineering, the projection of landscape as infrastructure—the contemporary alignment of the disciplines of landscape architecture, civil engineering, and urban planning— has become pressing. Predominant challenges facing urban regions and territories today—including shifting climates, material flows, and population mobilities, are addressed and strategized here. Responding to the under-performance of master planning and over-exertion of technological systems at the end of twentieth century, this book argues for the strategic design of infrastructural ecologies, describing a synthetic landscape of living, biophysical systems that operate as urban infrastructures to shape and direct the future of urban economies and cultures into the 21st century. Pierre Bélanger is Associate Professor of Landscape Architecture and Co-Director of the Master in Design Studies Program at Harvard University's Graduate School of Design. As part of the Department of Landscape Architecture and the Advanced Studies Program, Bélanger teaches and coordinates graduate courses on the convergence of ecology, infrastructure and urbanism in the interrelated fields of design, planning and engineering. Dr. Bélanger is author of the 35th edition of the Pamphlet Architecture Series from Princeton Architectural Press, *GOING LIVE: from States to Systems* (pa35.net), co-editor with Jennifer Sigler of the 39th issue of Harvard Design Magazine, *Wet Matter*, and co-author of the forthcoming volume *ECOLOGIES OF POWER: Mapping Military Geographies & Logistical Landscapes of the U.S. Department of Defense*. As a landscape architect and urbanist, he is the recipient of the 2008 Canada Prix de Rome in Architecture and the Curator for the Canada Pavilion and Canadian Exhibition, *EXTRACTION*, at the 2016 Venice Architecture Biennale (extraction.ca).

Rice Improvement Jauhar Ali, Shabir Hussain Wani, 2021-05-05 This book is open access under a CC BY 4.0 license. By 2050, human population is expected to reach 9.7 billion. The demand for increased food production needs to be met from ever reducing resources of land, water and other environmental constraints. Rice remains the staple food source for a majority of the global populations, but especially in Asia where ninety percent of rice is grown and consumed. Climate change continues to impose abiotic and biotic stresses that curtail rice quality and yields. Researchers have been challenged to provide innovative solutions to maintain, or even increase, rice production. Amongst them, the 'green super rice' breeding strategy has been successful for leading the development and release of multiple abiotic and biotic stress tolerant rice varieties. Recent advances in plant molecular biology and biotechnologies have led to the identification of stress responsive genes and signaling pathways, which open up new paradigms to augment rice productivity. Accordingly, transcription factors, protein kinases and enzymes for generating protective metabolites and proteins all contribute to an intricate network of events that guard and maintain cellular integrity. In addition, various quantitative trait loci associated with elevated stress tolerance have been cloned, resulting in the detection of novel genes for biotic and abiotic stress resistance. Mechanistic understanding of the genetic basis of traits, such as N and P use, is allowing rice researchers to engineer nutrient-efficient rice varieties, which would result in higher yields with lower inputs. Likewise, the research in micronutrients biosynthesis opens doors to genetic engineering of metabolic pathways to enhance micronutrients production. With third generation sequencing techniques on the horizon, exciting progress can be expected to vastly improve molecular markers for gene-trait associations forecast with increasing accuracy. This book emphasizes on the areas of rice science that attempt to overcome the foremost limitations in rice production. Our intention is to highlight research advances in the fields of physiology, molecular breeding and genetics, with a special focus on increasing productivity, improving biotic and abiotic stress tolerance and nutritional quality of rice.

Vegetarian and Plant-Based Diets in Health and Disease Prevention François Mariotti, 2017-05-23 *Vegetarian and Plant-Based Diets in Health and Disease Prevention* examines the science of vegetarian and plant-based diets and their nutritional impact on human health. This book assembles the science related to vegetarian and plant-based diets in a comprehensive, balanced, single reference that discusses both the overall benefits of plant-based diets on health and the risk of disease and issues concerning the status in certain nutrients of the individuals, while providing overall consideration to the entire spectrum of vegetarian diets. Broken into five sections, the first provides a general overview of vegetarian / plant-based diets so that readers have a foundational understanding of the topic. Dietary choices and their relation with nutritional transition and sustainability issues are discussed. The second and third sections provide a comprehensive description of the relationship between plant-based diets and health and disease prevention. The fourth section provides a deeper look into how the relationship between plant-based diets and health and disease prevention may differ in populations with different age or physiological status. The fifth and final section of the book details the nutrients and substances whose intakes are related to the proportions of plant or animal products in the diet. Discusses the links between health and certain important characteristics of plant-based diets at the level of food groups Analyzes the relation between plant-based diet and health at the different nutritional levels, i.e. from dietary patterns to specific nutrients and substances Provides a balanced evidence-based approach to analyze the positive and negative aspects of vegetarianism Addresses the different aspects of diets predominantly based on plants, including geographical and cultural variations of vegetarianism

Crop Responses to Global Warming Dinesh Chandra Uprety, V.R Reddy, 2016-09-13 The monograph entitled "Crop responses to Global warming" describes the normal historical shifts in the earth's atmospheric temperature and weighs the evidence concerning anthropogenic induced changes in the level of temperature. The unprecedented increase in the earth's temperature after pre industrial period has been possibly related to the anthropogenic activities. This monograph will give an overview of the global as well as Indian crops productivity in relation to the rise in the earth's surface temperature. A chapter in this monograph is on the technologies to study the response of crop plants to the elevated temperature. The impact assessment analysis of rising temperature on crops such as wheat, rice, maize, soybean, cotton and brassica are described, reviewed and discussed in separate chapters as case studies. The responses of physiological processes and biochemical reactions to the elevated temperature in crop plants are described crop wise. The monograph also includes the impact of elevating temperature on crop weed interaction, pest and diseases and soil dynamics for each crop species independently. The mitigation technologies to counter the adverse effect of high temperature stress are described for each crop according to their cultivation and climatic conditions. The future research strategies for each crop to meet the threat of elevating temperature on crop productivity and food security is described and discussed. The description of temperature enrichment technologies will help researchers and scientists to study the responses of biological materials to rising temperature. The monograph will be the main text

for teaching climate change, global warming and environmental botany as no such book is currently available relating to the rising atmospheric temperature on crop plants. Therefore, the monograph will be highly useful for students of global climate change, environmental botany and agricultural sciences, scientists, researchers, farmers and policy makers

The Clash of Globalisations Ray Kiely,2005-03-01 This book provides a powerful critique of the case made for 'globalisation', with particular emphasis placed on neo-liberalism, the third way, and the hegemonic role of the US state. It then examines the rise of 'anti-globalisation' politics and the debate over progressive alternatives to 'actually existing globalisation'.

Music in the Third Reich Erik Levi,1996-04-15 In this authoritative study, one of the first to appear in English, Erik Levi explores the ambiguous relationship between music and politics during one of the darkest periods of recent cultural history. Utilising material drawn from contemporary documents, journals and newspapers, he traces the evolution of reactionary musical attitudes which were exploited by the Nazis in the final years of the Weimar Republic, chronicles the mechanisms that were established after 1933 to regiment musical life throughout Germany and the occupied territories, and examines the degree to which the climate of xenophobia, racism and anti-modernism affected the dissemination of music either in the opera house and concert hall, or on the radio and in the media.
