## **The Fact Checker's Bible Sarah Harrison**

Smith,2007-12-18 These days fact-checking can seem like a lost art. The Fact Checker's Bible arrives not a moment too soon: it is the first—and essential—guide to the important but increasingly neglected task of checking facts, whatever their source. We are all overwhelmed with information that claims to be factual, but even the most punctilious researcher, writer, and journalist can sometimes get it wrong, so checking facts has become a more pressing task. Now Sarah Harrison Smith, former New Yorker fact checker and currently head of checking for The New York Times Magazine explains exactly how to: \*Reading for accuracy \*Determine what to check \*Research the facts \*Assess sources: people, newspapers and magazines, books, the Internet, etc. \*Check quotations \*Understand the legal liabilities \*Look out for and avoid the dangers of plagiarism For everyone from students to journalists to editors, the methods and practices outlined in The Fact Checker's Bible provide both a standard and a working manual for how to get the facts right.

**A Noose of Light** Alan Alfred Tunbridge, 2015-05-07  
When I got to 73 years of age in 2014, I felt serenely aware that I would soon no longer be here to tell my story, so I decided to write it down and thereby leave a record of my life adventure behind me when I depart. With an early childhood spent on the outskirts of the London Blitz, and Beatnik wanderings in the 1950s with Wizz Jones, and hashish-aided esoteric explorations in Notting Hill, and residency in the Coombe Springs Gurdjieff community, followed by a 20-year association with Idries Shah and his Sufi project, I think the story might be valued by those interested in the Western spiritual development upsurge of the 60s and 70s. And it also goes on to encompass travels in Andalusia and Morocco, lucid dreaming explorations in 'the Higgs field' and Hawaii (with Dr. Stephen La Berge), and the battle to create an Australian schizophrenia research institute. So I dare say there's something in it for everyone. I hope you enjoy it.

Radiological Crime Scene Management International Atomic Energy Agency, 2014-12-23 Radiological crime scene management is the process used to ensure safe, secure, effective and efficient operations at a crime scene where nuclear or other radioactive materials are known, or suspected, to be present. Managing a radiological crime scene is a key part of responding to a nuclear security event. Evidence collection at radiological crime scenes may share a wide range of characteristics with that at conventional crime scenes, such as evidence search patterns, geographical scene modelling and evidence recording, whether or not explosives are involved. This publication focuses on the framework and functional elements for managing a radiological crime scene that are distinct from any other crime scene. It assumes that States have a capability for managing conventional crime scenes.

*Human Aging* Paul W. Foos,M. Cherie Clark,2016-01-08

This text offers a readable and friendly presentation of the

important methods, findings, and theories of human aging, while actively involving the reader in meaningful exercises and critical thinking. Students are repeatedly challenged to apply information in the text to the older adults in their own lives. Specifically, suggestions for enhancing the lives of their older relatives are offered and encouraged. These include guidelines for discussions they might have regarding social, emotional, and environmental changes as well encouraging intellectual and social interaction. In this Edition: Emphasis on the science of the study of aging and why questions in aging are difficult to answer, how social scientists attempt to handle such difficulties, and the successes and failures social scientists have had thus far in answering those questions. The text also demonstrates how current research findings are now being applied in the real world and/or how they might be applied in the future. Cross-cultural comparisons and ethnic group comparisons are included wherever possible. Each chapter begins with Senior View, which introduces students to a real person and gives them a chance to hear what older adults think and say about important issues related to the chapter and a chance to compare those opinions to the research findings. Each chapter ends with Making Choices, emphasizing the important behavioral, emotional, and social choices that students can make now to prolong a healthy, happy life. Chapter Projects offer the opportunity for active learning, as students investigate for themselves an issue related to the chapter. Instructors can expand these projects for students who want to learn more, or for independent study. Focus on Aging boxes compliment the material in the text, providing additional insight and examples, and encouraging critical thinking. Every chapter includes discussion questions, study questions, chapter exercises, and related online resources.

*Productive Aging* Nancy Morrow-Howell,James Hinterlong,Michael Sherraden,2003-05-01 Will 69 million baby boomers suddenly drop out of the workforce when they turn 65? It is difficult to imagine this generation, with its talent, education, and experience, idling away the last thirty years of life.—From the Foreword, by Robert N. Butler, M.D., The Mount Sinai Medical Center Old age has been historically thought of as a period of frailty and dependence, yet studies show that with the help of advances in health and medicine, current populations will live longer and remain healthier than previous generations. As average life expectancies rise, traditional concepts of retirement need to be reconsidered on all levels—from government policy to business practice to individual life planning. In this volume, leaders in the field of gerontology explore these changing conditions through the concept of productive aging, which has been developed by leaders in the field to promote older adults' contributions to society in social and economic capacities. *Productive Aging: Concepts and Challenges* treats the implications of productive aging for the discipline of gerontology and for society in general. The first section defines the principles, historical perspectives, and conceptual frameworks for productive aging. The second section takes a disciplinary approach, treating the biomedical, psychological, sociological, and economic implications of a more capable older generation. The third section considers advances in theories of gerontology, and the fourth section suggests future directions in practice, theory, and research. Contributors: W.
