Many vintage books such as this are increasingly scarce and expensive. It is with this in mind that we are republishing this volume now in an affordable, modern, high-quality edition complete with a specially-commissioned new introduction on illustration.

**Learning to Draw** Robert Kaupelis, 2012-06-26 Teachers, students, and amateur artists will all benefit from the advice of this esteemed educator and fine artist whose book, as described by a colleague, is a cause célèbre for art education, not only because it meets the urgent professional need, but also because it combines artistic, aesthetic, and instructional considerations in a way which is significantly different from any other text. Encouraging teachers and students to use his suggestions in ways they feel most appropriate, the author (an expert guide and teacher) offers sound advice on methods and techniques for artists at all levels. Using the lessons and methods he employed over the years as an instructor, Kaupelis focuses on solving the problems common to many illustrators, among them successfully developing perspective, contour and modeled drawing, and drawing from memory and projected images. A splendid blend of instruction, analysis, and insights, this volume—one of the most widely read art instruction texts—deserves a place on the shelves of instructors and serious students of art.

12 Rules for Life Jordan B. Peterson,2018-01-23 #1 NATIONAL BESTSELLER #1 INTERNATIONAL BESTSELLER What does everyone in the modern world need to know? Renowned psychologist Jordan B. Peterson's answer to this most difficult of questions uniquely combines the hard-won truths of ancient tradition with the stunning revelations of cutting-edge scientific research. Humorous, surprising and informative, Dr. Peterson tells us why skateboarding boys and girls must be left alone, what terrible fate awaits those who criticize too easily, and why you should always pet a cat when you meet one on the street. What does the nervous system of the lowly lobster have to tell us about standing up straight (with our shoulders back) and about success in life? Why did ancient Egyptians worship the capacity to pay careful attention as the highest of gods? What dreadful paths do people tread when they become resentful, arrogant and vengeful? Dr. Peterson journeys broadly, discussing discipline, freedom, adventure and responsibility, distilling the world's wisdom into 12 practical and profound rules for life. 12 Rules for Life shatters the modern commonplaces of science, faith and human nature, while transforming and ennobling the mind and spirit of its readers.

**In Five Years** Rebecca Serle, 2020-03-10 A NEW YORK TIMES BESTSELLER A Good Morning America, FabFitFun, and Marie Claire Book Club Pick “In Five Years is as clever as it is moving, the rare read-in-one-sitting novel you won’t forget.” —Chloe Benjamin, New York Times bestselling author of The Immortalists Perfect for fans of Me Before You and One Day—a striking, powerful, and moving love story following an ambitious lawyer who experiences an astonishing vision that could change her life forever. Where do you see yourself in five years? Dannie Kohan lives her life by the numbers. She is nothing like her lifelong best friend—the wild, whimsical, believes-in-fate Bella. Her meticulous planning seems to have paid off after she nails the most important job interview of her career and accepts her boyfriend’s marriage proposal in one fell swoop, falling asleep completely content. But when she awakens, she’s suddenly in a different apartment, with a different ring on her finger, and beside a very different man. Dannie spends one hour exactly five years in the future before she wakes again in

her own home on the brink of midnight—but it is one hour she cannot shake. In *Five Years* is an unforgettable love story, but it is not the one you're expecting.

*Maps of Meaning* Jordan B. Peterson,2002-09-11 Why have people from different cultures and eras formulated myths and stories with similar structures? What does this similarity tell us about the mind, morality, and structure of the world itself? From the author of *12 Rules for Life: An Antidote to Chaos* comes a provocative hypothesis that explores the connection between what modern neuropsychology tells us about the brain and what rituals, myths, and religious stories have long narrated. A cutting-edge work that brings together neuropsychology, cognitive science, and Freudian and Jungian approaches to mythology and narrative, *Maps of Meaning* presents a rich theory that makes the wisdom and meaning of myth accessible to the critical modern mind.

*The Architecture of Roman Temples* John W.

Stamper,2005-02-16 This book examines the development of Roman temple architecture from its earliest history in the sixth century BC to the reigns of Hadrian and the Antonines in the second century AD. John Stamper analyzes the temples' formal qualities, the public spaces in which they were located and, most importantly, the authority of precedent in their designs. He also traces Rome's temple architecture as it evolved over time and how it accommodated changing political and religious contexts, as well as the affects of new stylistic influences.

**Losing Our Minds** Deborah L. Ruf,2005 Wouldn't it be a disgrace if we lost the brightest students now attending our nation's schools? Dr. Deborah L. Ruf establishes that there are far

more highly gifted children than previously imagined, yet large numbers of very bright children are never discovered by their schools. Using 78 gifted and highly gifted children as her examples, she illustrates five levels of giftedness. Parents will be able to estimate which of the five levels of giftedness their child fits by comparing their own child's developmental milestones to those of the children described in the book. This book contains practical advice for parents, including how to find a school that works for your child. Book jacket.
