*The SAGE Handbook of Curriculum and Instruction* F. Michael Connelly, Ming Fang He, JoAnn Phillion, 2008 The SAGE Handbook of Curriculum and Instruction emerges from a concept of curriculum and instruction as a diverse landscape defined and bounded by schools, school boards and their communities, policy, teacher education, and academic research. Each contributing author was asked to comprehensively review the research literature in their assigned topic. These topics, however, are defined by practical places on the landscape e.g. schools and governmental policies for schools. Key Features:

- o Presents a different vision or re-conceptualization of the field
- o Provides a comprehensive and inclusive set of authors, ideas, and topics
- o Takes a global rather than North American parochial approach
- o Recognizes that curriculum and instruction is broader in scope than is suggested by university research and theory
- o Reflects post-1992 changes in curriculum policy, practice and scholarship
- o Represents a rethinking of how school subject matter areas are treated. Teacher education is included in the Handbook with the intent of addressing the role and place of teacher education in bridging state and national curriculum policies and curriculum as enacted in classrooms.

*The Routledge International Handbook of Equity and Inclusion in Education* Paul Downes, Guofang Li, Lore Van Praag, Stephen Lamb, 2024-05-13 Providing a cornerstone to the global debate on equity and inclusion within education, this handbook explores equity issues pertaining to poverty and social class, race, ethnicity, sociocultural, sociolinguistic exclusion in

education and recognises intersectionality and gender across these dimensions. This carefully curated collection of essays written by international experts promotes inclusive systems in education that explicitly recognise the voices of learners who may be at risk of marginalisation, exclusion or underachievement. Developing a multilayered innovative conceptual framework involving spatial, emotional-relational and dialogical 'turns' for education, it emphasises key system points for reform, including building strategic bridges between health and education for vulnerable groups and shifts in focus for initial teacher education and the wider curriculum. The handbook is organised into the following key parts: Theoretical Frameworks Funding Models and Structures for Equity and Inclusive Systems Exclusion and Discrimination Bridging Health and Education Agency and Empowerment Outreach and Engagement The Routledge International Handbook of Equity and Inclusion in Education will be of great value to academics operating in the areas of education, psychology, sociology, social policy, ethnography, cultural studies; researchers in university research centres and in policy institutes pertaining to education, poverty, social inclusion as well as international organisations involved with inclusion in education.
