Tattered Love Lola Stark,2013-09 When ex-Special Ops bad-ass Mace walks into Needle's Kiss tattoo parlour, he never expected to find the girl who would turn his life upside down. Hard as nails Scarlett has been unlucky in love: she's been burnt, chewed up and spat out. Reluctant to have another relationship, can she keep her wits about her when hot-as-sin Mace walks into her tattoo parlor? Or will he break her down and leave his mark within her ink? What starts out as a little fun, turns into something so much more. Can Scarlett look beyond Mace's devastating past or will his demons come back to haunt them both? Content warning: contains steamy, anywhere-goes sex, an alcohol induced embarrassing night out and two headstrong lovers taken on a whirlwind of crazy.

*On the Edge of Gone* Corinne Duyvis,2016-03-08 A thrilling, thought-provoking novel from one of young-adult literature's boldest new talents. January 29, 2035. That's the day the comet is scheduled to hit—the big one. Denise and her mother and sister, Iris, have been assigned to a temporary shelter outside their hometown of Amsterdam to wait out the blast, but Iris is nowhere to be found, and at the rate Denise's drug-addicted mother is going, they'll never reach the shelter in time. A last-minute meeting leads them to something better than a temporary shelter—a generation ship, scheduled to leave Earth behind to colonize new worlds after the comet hits. But everyone on the ship has been chosen because of their usefulness. Denise is autistic and fears that she'll never be allowed to stay. Can she obtain a spot before the ship takes flight? What about her mother and sister? When the future of the human race is at stake, whose lives matter most?

*Authentic Conversations* James D. Showkeir,Maren S. Showkeir,2008-09-01 In this groundbreaking new book, the Showkeirs take something people typically think of as merely functional—ordinary conversations—and show the power they have to create, sustain, and change the very nature of workplace culture. Conversations can lead to an engaged and energized workforce, or to one that is alienated and uninspired. If you want to change the culture you must change the conversations. All too often workplace conversations—between managers and direct reports, peer-to-peer, or with external stakeholders—create parent-child relationships. People hide facts, sugarcoat reality and claim helplessness to try to control interactions and get what they want. The Showkeirs expose the destructiveness of these manipulative conversations, and demonstrate how we can move to honest and authentic interactions that create adult relationships. By intentionally and thoughtfully changing conversations, organizations will engender increased commitment, true accountability, and improved workplace performance. Drawing on more than 25 years of experience as organizational consultants, their book offers examples of parent-child and adult-adult workplace conversations in a variety of settings, circumstances and industries. They also provide a hands-on guide, including sample scripts, for dealing with a host of potentially difficult conversations. *Authentic Conversations* goes to the heart of why so many people today are disengaged, uninspired, and uncommitted to their organization's success. It challenges the conventional wisdom about managing people and sets out specific, concrete ways to consciously make conversations the primary driver for change.

**Biology of Grasshoppers** R. F. Chapman, A. Joern, 1991-01-16 Novel Aspects of Insect-Plant Interactions Edited by Pedro Barbosa and Deborah Letourneau This volume represents the forefront of two rapidly advancing areas of ecology: three-trophic-level interactions and the interdisciplinary field of chemical ecology The book focuses on the role of microorganisms as mediators of interactions between insects and plants, providing critical appraisal of studies and suggesting ways to integrate competing hypotheses of insect-plant dynamics. 1988 (0 471-83276-6) 362 pp. Arthropod Biological Control Agents and Pesticides Brian A. Croft Examining the effects of pesticides on predators and parasites and exploring methods for reducing negative impacts of pesticide use, this book focuses on the interaction of pesticides with entomophagous arthropods. It surveys the history of research in the field and discusses susceptibility assessment, lethal, sublethal, and ecological effects of pesticides, and selectivity, resistance, and resistance management. 1990 (0 471-81975-1) 723 pp. Lepidopteran Anatomy, John Eaton This single-source treatment on the anatomy of Lepidoptera provides a detailed exposition of its anatomy plus all its life stages, including the larva and adult forms of the exoskeleton, musculature, organ systems, and specialized structures. As the only thorough examination of the morphology of this insect group, it is an essential acquisition for entomologists, morphologists, and insect physiologists. 1988 (1-05862-9) 257 pp. Integrated Pest Management Systems and Cotton Production Edited by Ray Frisbie, Kamal El-Zik, and L. Ted Wilson The most complete and authoritative work available on the subject, this book brings together information on integrated pest management strategies that are applicable to cotton. It addresses economic, agronomic, and biological factors of pest management and focuses on plant resistance to pests and the genetic rationale for improving plant health. 1989 (0 471-81782-1) 437 pp.

**Spectacle, Pageantry, and Early Tudor Policy** Sydney Anglo, 1997 This standard work, long out of print, discusses every English royal entry, festival, disguising, masque, and tournament, from the accession of Henry VII to the coronation celebrations of Elizabeth I. The study of court festivals, spectacle, and civic pageantry in Renaissance Europe has now developed into a major academic industry, so that the market for authoritative works on these themes extends far beyond the boundaries of conventional scholarly disciplines. *Spectacle, Pageantry and Early Tudor Policy* was a pioneering work and remains the only comprehensive and analytical treatment of its subject.

Dissociative Recombination of Molecular Ions with Electrons Steven L. Guberman, 2012-12-06 *Dissociative Recombination of Molecular Ions with Electrons* is a comprehensive collection of refereed papers describing the latest developments in dissociative recombination research. The papers are written by the leading researchers in the field. The topics covered include

the use of microwave afterglows, merged beams and storage rings to measure rate coefficients and to identify the products and their yields. The molecules studied range in size from the smallest,  $H_2^+$ , to bovine insulin ions. The theoretical papers cover the important role of Rydberg states and the use of wave packets and quantum defect theory to deduce cross sections, rate constants and quantum yields. Several theoretical and experimental papers address the controversial topic of  $H_3^+$  dissociative recombination and its importance in the interstellar medium. Dissociative recombination studies of other molecular ions in the interstellar medium and in cometary and planetary atmospheres are covered. Ionization is an important competitive process to dissociative recombination and its competition with predissociation and its role in the reverse process of the association of neutral species is presented. Dissociative attachment, in which an electron attaches to a neutral molecule, has many similarities to dissociative recombination. The topics covered include the accurate calculation of electron affinities, attachment to molecules, clusters, and to species absorbed on solid surfaces and electron scattering by a molecular anion.

**Teas, Cocoa and Coffee** Alan Crozier, Hiroshi Ashihara, Francisco Tomás-Barbéran, 2011-10-14 In recent years, the role of plant secondary metabolites as protective constituents in the human diet has been a growing area of research. Unlike the traditional vitamins, they are not essential for short-term wellbeing, but there is increasing evidence that modest long-term intakes can have favourable impacts on the incidence of cancers and many chronic diseases, including cardiovascular disease and type II diabetes, which are occurring in Western populations with increasing frequency. This book covers the latest science on the metabolism and potential health benefits of teas, cocoa, coffee and their extracts in the human diet. From an opening chapter tracing the origins of teas, cocoa and coffee as beverage, the book proceeds to explore the phytochemical content of coffee, cocoa and the various types of tea. The bioavailability of secondary metabolites from each of the beverages is then considered in depth, and related directly to their health benefits. Embracing the full range of tea, coffee and cocoa beverages and products, the book offers the most up-to-date and comprehensive treatment of these increasingly important dietary components. As the only book to bring together the latest information on the biochemistry and health benefits of teas, coffee and cocoa, this book is essential reading for food scientists and technologists involved in the production of tea, coffee and cocoa products. Nutritionists will value the book's health focus, while agricultural scientists working on the cultivation of these crops will prize its scope and depth of detail. It is also an important resource for all those who use functional ingredients in other products, whether they are based in industry or research.
