The Afterlife of Trees Brian Bartlett,2002 Brian Bartlett's poems, both pithy and expansive, bridge nature and human society, humour and elegy. Ranging from Buster Keaton films to a miniature Taj Mahal, from a celebration of sloths to an ironic look at the new millennium, from an urban garden to a ferry at sea, these poems tell stories and sing, question and praise.

The Origins of the Libyan Nation Anna Baladinetti,2014-05-12 Libya is a typical example of a colonial or external creation. This book addresses the emergence and construction of nation and nationalism, particularly among Libyan exiles in the Mediterranean region. It charts the rise of nationalism from the colonial era and shows how it developed through an external Libyan diaspora and the influence of Arab nationalism. From 1911, following the Italian occupation, the first nucleus of Libyan nationalism formed through the activities of Libyan exiles. Through experiences undergone during periods of exile, new structures of loyalty and solidarity were formed. The new and emerging social groups were largely responsible for creating the associations that ultimately led to the formation of political parties at the eve of independence. Exploring the influence of colonial rule and external factors on the creation of the state and national identity, this critical study not only provides a clear outline of how Libya was shaped through its borders and boundaries but also underlines the strong influence that Eastern Arab nationalism had on Libyan nationalism. An important contribution to history of Libya and nationalism, this work will be of interest to all scholars of African and Middle Eastern history.

Israel and Palestine Avi Shlaim,2020-05-05 With characteristic rigor and readability, Avi Shlaim reflects on a range of key issues, transformations and personalities in the Israel-Palestine conflict. From the 1917 Balfour Declaration to the 2008 invasion of Gaza, Israel and Palestine places current events in their proper historical perspective, and assesses the impact of key political and intellectual figures, including Yasir Arafat and Ariel Sharon, Edward Said and Benny Morris. It also re-examines the United States' influential role in the conflict, and explores the many missed opportunities for peace and progress. Clear-eyed and meticulous, Israel and Palestine is an essential tool for understanding the fractured history and future prospects of the region.

Power and the Past Eric Langenbacher,Yossi Shain,2010-01-29 Only recently have international relations scholars started to seriously examine

the influence of collective memory on foreign policy formation and relations between states and peoples. The ways in which the memories of past events are interpreted, misinterpreted, or even manipulated in public discourse create the context that shapes international relations. Power and the Past brings together leading history and international relations scholars to provide a groundbreaking examination of the impact of collective memory. This timely study makes a contribution to developing a theory of memory and international relations and also examines specific cases of collective memory's influence resulting from the legacies of World War II, the Holocaust, and September 11. Addressing concerns shared by world leaders and international institutions as well as scholars of international studies, this volume illustrates clearly how the memory of past events alters the ways countries interact in the present, how memory shapes public debate and policymaking, and how memory may aid or more frequently impede conflict resolution.

The European Union and the Global South Fredrik Söderbaum, Patrik Stålgren, 2010 The development of coherent and effective relations with other regions and countries is one of the most challenging tasks faced by the European Union. This original volume explores the EU's engagement with the global South, focusing on three controversial policy areas: economic cooperation, development cooperation, and conflict management. A discussion of the EU's interregional model - which promotes interaction with regions rather than nation-states - provides a backdrop for case studies of EU policies with regard to Africa, Asia, and Latin America. While disclosing the tensions and overlaps between the EU's foreign policies and those of its member states, the authors also highlight an increasing trend toward successful policy coordination.

Global Climate Governance Beyond 2012 Frank Biermann, Philipp Pattberg, Fariborz Zelli, 2010-02-18 An assessment of policy options for future global climate governance, written by a team of leading experts from the European Union and developing countries. Global climate governance is at a crossroads. The 1997 Kyoto Protocol was merely a first step, and its core commitments expire in 2012. This book addresses three questions which will be central to any new climate agreement. What is the most effective overall legal and institutional architecture for successful and equitable climate politics? What role should non-state actors play, including multinational corporations, non-governmental organizations, public-private partnerships and market mechanisms in general? How can we deal with the growing challenge of adapting our existing institutions to a substantially warmer world? This important resource offers policy practitioners in-depth qualitative and quantitative assessments of the costs and benefits of various policy options, and also offers academics from wide-ranging disciplines insight into innovative interdisciplinary approaches towards international climate negotiations.

The White War Former Professor of Law and Senior Pro-Vice Chancellor Mark Thompson, Mark Thompson, 2010-07 In May 1915, Italy declared war on the Habsburg Empire. Nearly 750,000 Italian troops were killed in savage, hopeless fighting on the stony hills north of Trieste and in the snows of the Dolomites. To maintain discipline, General Luigi Cadorna restored the Roman practice of decimation, executing random members of units that retreated or rebelled...
