The Heiress Ruth Goetz, Augustus Goetz, 1975 THE STORY: The background of the play is New York in the 1850s and the basic story tells of a shy and plain young girl, Catherine Sloper, who falls desperately in love with a delightful young fortune hunter. Catherine's lack of worldliness prevents

Capturing Change in Science, Technology, and Innovation Panel on Developing Science, Technology, and Innovation Indicators for the Future, Committee on National Statistics, Division on Behavioral and Social Sciences and Education, Board on Science, Technology, and Economic Policy, Policy and Global Affairs, National Research Council, 2014-06-08 Since the 1950s, under congressional mandate, the U.S. National Science Foundation (NSF) - through its National Center for Science and Engineering Statistics (NCSES) and predecessor agencies - has produced regularly updated measures of research and development expenditures, employment and training in science and engineering, and other indicators of the state of U.S. science and technology. A more recent focus has been on measuring innovation in the corporate sector. NCSES collects its own data on science, technology, and innovation (STI) activities and also incorporates data from other agencies to produce indicators that are used for monitoring purposes - including comparisons among sectors, regions, and with other countries - and for identifying trends that may require policy attention and generate research needs. NCSES also provides extensive tabulations and microdata files for in-depth analysis. *Capturing Change in Science, Technology, and Innovation* assesses and provides recommendations regarding the need for revised, refocused, and newly developed indicators of STI activities that would enable NCSES to respond to changing policy concerns. This report also identifies and assesses both existing and potential data resources and tools that NCSES could exploit to further develop its indicators program. Finally, the report considers strategic pathways for NCSES to move forward with an improved STI indicators program. The recommendations offered in *Capturing Change in Science, Technology, and Innovation* are intended to serve as the basis for a strategic program of work that will enhance NCSES's ability to produce indicators that capture change in science, technology, and innovation to inform policy and optimally meet the needs of its user community.

Small Groups as Complex Systems Holly Arrow,Joseph E. McGrath,Jennifer L. Berdahl,2000-03-21 What are groups? How do they behave? Arrow, McGrath, and Berdahl answer these questions by developing a general theory of small groups as complex systems. Basing their theory on concepts distilled from general systems theory, dynamical systems theory, and complexity and chaos theory, they explore groups as adaptive, dynamic systems that are driven by interactions among group members as well as between the group and its embedding contexts. In addition, they consider not only the group's members and their distribution of attributes, but also the group's tasks and technology in order to understand how those members, tasks, and tools are intertwined, coordinated, and adjusted. Throughout the book, the authors focus our attention on relationships among people, tools, and tasks that are activated by a combination of individual and collective purposes and goals that change and evolve as the group interacts over time.

The Papers of Martin Luther King, Jr Martin Luther King (Jr.),1992 More than two decades after his death, Martin Luther King, Jr.'s ideas - his call for racial equality, his faith in the ultimate triumph of justice, and his insistence on the power of nonviolent struggle to bring about a major transformation of American society - are as vital and timely as ever. The wealth of his writings, both published and unpublished, that constitute his intellectual legacy are now preserved in this authoritative, chronologically arranged, multivolume edition. Faithfully transcribing the texts of his letters, speeches, sermons, student papers, and articles, this edition has no equal. Volume II begins with King's doctoral work at Boston University and ends with his first year as pastor of the historic Dexter Avenue Baptist Church in Montgomery, Alabama. It includes papers from his graduate courses and a fully annotated text of his dissertation. There is correspondence with people King knew in his years before graduate school and a transcription of the first known recording of a King sermon. We learn, too, of King's marriage to Coretta Scott. Accepting the call to serve Dexter, King followed the church's tradition of socially active pastors by becoming involved in voter registration and other issues of social justice. In Montgomery he completed his doctoral work, and he and Coretta Scott began their married life. King's early papers document the formative experiences of a man whose life and teachings have had a profound influence not only on Americans but on people of all nations.--BOOK JACKET.
