The Underground Is Massive Michaelangelo Matos,2015-04-28 Joining the ranks of *Please Kill Me* and *Can't Stop Won't Stop* comes this definitive chronicle of one of the hottest trends in popular culture—electronic dance music—from the noted authority covering the scene. It is the sound of the millennial generation, the music “defining youth culture of the 2010s” (Rolling Stone). Rooted in American techno/house and ‘90s rave culture, electronic dance music has evolved into the biggest moneymaker on the concert circuit. Music journalist Michaelangelo Matos has been covering this beat since its genesis, and in *The Underground Is Massive*, charts for the first time the birth and rise of this last great outlaw musical subculture. Drawing on a vast array of resources, including hundreds of interviews and a library of rare artifacts, from rave fanzines to online mailing-list archives, Matos reveals how EDM blossomed in tandem with the nascent Internet—message boards and chat lines connected partiers from town to town. In turn, these ravers, many early technology adopters, helped spearhead the information revolution. As tech was the tool, Ecstasy—(Molly, as it’s know today) an empathic drug that heightens sensory pleasure—was the narcotic fueling this alternative movement. Full of unique insights, lively details, entertaining stories, dozens of photos, and unforgettable misfits and stars—from early break-in parties to Skrillex and Daft Punk—*The Underground Is Massive* captures this fascinating trend in American pop culture history, a grassroots movement that would help define the future of music and the modern tech world we live in.

The Making of a European Constitution Michelle Everson,Julia Eisner,2007-09-21 An original and innovative recasting of constitutionalism, written by acknowledged experts in the field, this empirically grounded and theoretically informed volume addresses the strategies and philosophies that judges and lawyers bring to bear when creating European constitutional jurisprudence; investigating and promoting promotes the sustainability of a theory or praxis of ‘procedural’ constitutionalism. Building upon European and American critical legal scholarship, Michelle Everson and Julia Eisner argue that constitutional adjudication has never been the neutral matter of a mere judicial ‘identification’ of the values, norms and procedures that each society seeks to concretise in its own body of constitutional law. Instead, a ‘mythology’ of comprehensive national constitutional settlement has obscured the primary legal constitutional conundrum that is created by the requirement that a judiciary must always adapt its constitutional jurisprudence to the evolving values that are to be found within any society; but must always, also, maintain the integrity and autonomy of the law itself. European judges and lawyers, having been denied recourse to all forms of constitutional mythology, provide us with an alternative model of

constitutionalism; one that does not require a founding myth of constitutional settlement, and one which both secures the autonomy of law, as well as ensures dialogue between law and society. This occurs, however, not through grand theories of 'constitutional adjudication' but, as The Making of a European Constitution documents, rather through a practical process.

Integrating Library Use Skills Into the General Education Curriculum Maureen Pastine,Bill Katz,2021-04-14 This provocative new book will help you design and implement the most effective library user education possible--one that builds on basic library use skills through a progressively sophisticated program that is fully integrated into course curriculum at all levels, from the freshman year to graduation and beyond. By exploring major issues underlying the integration of library use skills and research methodologies into the general education curriculum, contributors raise important questions, offer creative ideas, and provide insight into the many improvements made in library instruction in the past few years. Following an introduction by Patricia Breivik, a recognized national authority on libraries and general education, contributors representing two- and four-year institutions and research universities discuss such issues as the relationship between high school and college programs, research skills instruction in a remote access environment, the use of microcomputers and end user searching programs to promote critical thinking, and the improved relationship between librarians and faculty. In addition to articles on library instruction geared towards question analysis, information generation by field, structure of published knowledge and dissemination of a discipline's literature, chapters identify cooperative efforts needed among school, public, special, academic libraries and other information agencies, computer center personnel, and online database vendors. Bibliographic instruction librarians who are active participants in planning and administering library user education programs will find this volume to be essential for building and developing stronger, more integrated programs.

Marxian Reproduction Schema Andrew Trigg,2006-04-18 In 1878 Karl Marx developed the reproduction schema: his model of how total capital is produced and reproduced. This is thought to be the first two-sector economic model ever constructed. Two key aspects of Marx's writings are widely agreed to be undeveloped: The role of aggregate demand and the role of money. This book synthesizes various strands of economic thought to enable the reader to understand and clarify the structure of the reproduction schema. This synthesis will challenge prevailing orthodoxies. This book constructs a macro monetary model which draws on a wide range of economic theories, within both the Marxian economic tradition, and the tradition of Keynes, Kalecki, Domar, Sraffa and Leontief. Marxian economics has been dominated by supply-side thinking, including general equilibrium theory and pronouncements about the shortage of surplus value, whilst Post Keynesians have failed to take seriously the importance of reproduction and the multisectoral structure of capitalism. By locating aggregate demand and the circuit of money in the reproduction schema, this key book provides an analytical contribution to both Marxian and Post Keynesian economics.

Mourning Becomes the Law Gillian Rose,1996-09-12 In Mourning Becomes the Law, Gillian Rose takes us beyond the impasse of post-modernism or 'despairing rationalism without reason'. Arguing that the post-modern search for a 'new ethics' and ironic philosophy are incoherent, she breathes new life into the debates concerning power and domination, transcendence and eternity. Mourning Becomes the Law is the philosophical counterpart to Gillian Rose's highly acclaimed memoir Love's Work. She extends similar clarity and insight to discussions of architecture, cinema, painting and poetry, through which relations between the formation of the individual and the theory of justice are connected. At the heart of this reconnection lies a reflection on the significance of the Holocaust and Judaism. Mourning Becomes the Law reinvents the classical analogy of the soul,

the city and the sacred. It returns philosophy, Nietzsche's 'bestowing virtue', to the pulse of our intellectual and political culture.

General Patton Stanley Hirshson, 2003-08-05 General George S. Patton Jr, an inspirational leader and outstanding tactician, has intrigued and confounded his biographers. Utilising untapped archival materials in both the USA and UK, government documents, family papers, and oral histories, Hirshson creates the most balanced portrait of Patton ever written. It reveals Patton as a complex soldier capable of brilliant military manoeuvres but also of inspiring his troops with fiery speeches that resulted in horrendous acts, such as the massacres of Italian civilians. It explains Patton's belief in a soldier's Valhalla, connects the family's wealth to one of America's bitterest labour strikes, and disputes the usual interpretation of Patton's relief from command of the Third Army. In investigating this complex man, Hirshson has uncovered surprising material about a series of civilian massacres in Sicily, about the two slapping incidents, about attempts to exploit Patton's diary after his death, and about Patton's relations with top Allied generals. Patton emerges as a soldier of great imagination and courage, and his military campaigns make for edge-of-the-seat reading. All the drama of Patton's life comes alive in this meticulously documented volume.

The Hacker's Handbook Susan Young, Dave Aitel, 2003-11-24 This handbook reveals those aspects of hacking least understood by network administrators. It analyzes subjects through a hacking/security dichotomy that details hacking maneuvers and defenses in the same context. Chapters are organized around specific components and tasks, providing theoretical background that prepares network defenders for the always-changing tools and techniques of intruders. Part I introduces programming, protocol, and attack concepts. Part II addresses subject areas (protocols, services, technologies, etc.) that may be vulnerable. Part III details consolidation activities that hackers may use following penetration.

This book shows the upgrades users can perform, the ones that are better left to the manufacturer, and more.

Money, Distribution Conflict and Capital Accumulation E. Hein, 2007-12-19 This book demonstrates that 'monetary analysis', as contained in Post-Keynesian monetary theories, but also in the Neo-Ricardian monetary theory of distribution and in Marx's monetary analysis, can be integrated into Post-Keynesian models of distribution of growth in a convincing way.

Tourism and Development in the Developing World David J. Telfer, Richard Sharpley, 2015-12-14 Tourism is widely considered to be an important factor in socio-economic development, particularly in less developed countries. However, despite almost universal recognition of tourism's development potential, the extent to which economic and social progress is linked to the growth of a country's tourism sector remains the subject of intense debate. *Tourism and Development in the Developing World* offers a thorough overview of the tourism-development relationship. Focusing specifically on the less developed world and drawing on contemporary case studies, this updated second edition questions widely-held assumptions on the role of tourism in development and seeks to highlight the challenges faced by destinations seeking to achieve development through tourism. The introductory chapter establishes the foundation for the book, exploring the meaning and objectives of development, reviewing theoretical perspectives on the developmental process, and assessing the reasons why less developed countries are attracted to tourism as a development option. The concept of sustainable development, as the most widely adopted contemporary model of development, is then introduced and its links with tourism critically assessed. Subsequent chapters explore the key issues associated with tourism and development, including the rise of globalization; the tourism planning and development process; the relationship between tourism and communities within which it is developed; the management implications of trends in the demand for and uptake of tourism; and an analysis of the consequences of tourism development for destination environments, economies and societies. A new chapter considers the challenges of climate change, sustainability of resource supply (oil, water and food), global economic

instability, political instability and changing demographics. Finally, the issues raised throughout the book are drawn together in a concluding chapter that assesses the tourism and development 'dilemma'. Combining an overview of essential concepts, theories and knowledge with an analysis of contemporary issues and debates in tourism and development, this new edition will be an invaluable resource for those investigating tourism issues in developing countries. The book will be of interest to students of tourism, development, geography and area studies, international relations and politics, and sociology.
