An Introduction to Statistical Methods and Data Analysis Lyman Ott, Michael Longnecker, 2010 Ott and Longnecker's AN INTRODUCTION TO STATISTICAL METHODS AND DATA ANALYSIS, 6th Edition, International Edition provides a broad overview of statistical methods for advanced undergraduate and graduate students from a variety of disciplines who have little or no prior course work in statistics. The authors teach students to solve problems encountered in research projects, to make decisions based on data in general settings both within and beyond the university setting, and to become critical readers of statistical analyses in research papers and in news reports. The first eleven chapters present material typically covered in an introductory statistics course, as well as case studies and examples that are often encountered in undergraduate capstone courses. The remaining chapters cover regression modeling and design of experiments.

A Criminal History of Mankind Colin Wilson, 2015-05-17 This “immensely stimulating story of true crime down the ages” tells the history of human violence, from Peking Man to the Mafia (The Times, London). This landmark work offers a completely new approach to the history and psychology of human violence. Its sweep is broad, its research meticulous and detailed. Colin Wilson explores the bloodthirsty sadism of the ancient Assyrians and the mass slaughter by the armies led by Genghis Khan, Tamerlane, Ivan the Terrible, and Vlad the Impaler. He delves into modern history, exploring the genocides practiced by Stalin and Hitler. He then takes a chilling look into the sex crimes and mass murders that have become symbols of the neuroses and intensity of modern life. With breathtaking audacity and stunning insight, Wilson puts criminality firmly in a wide, illuminating historical context. “A work of massive energy, compulsively readable, splendidly informative . . . it establishes Wilson in a European tradition of thought that includes H. G. Wells, Sartre and Shaw.” —Time Out London “A tremendous resource for crime buffs as well as a challenging exposition for some of the more subtle criminological thinking of our time.” —Kirkus Reviews

Introduction to Multivariate Statistical Analysis in Chemometrics Kurt Varmuza, Peter Filzmoser, 2016-04-19 Using formal descriptions, graphical illustrations, practical examples, and R software tools, *Introduction to Multivariate Statistical Analysis in Chemometrics* presents simple yet thorough explanations of the most important multivariate statistical methods for analyzing chemical data. It includes discussions of various statistical methods, such as principal component analysis, regression analysis, classification methods, and clustering. Written by a chemometrician and a statistician, the book reflects the practical approach of chemometrics and the more formally oriented one of statistics. To enable a better understanding of the statistical methods, the authors apply them to real data examples from chemistry. They also examine results of the different methods, comparing traditional approaches with their robust counterparts. In addition, the authors use the freely available R package to implement methods, encouraging readers to go through the examples and adapt the procedures to their own problems. Focusing on the practicality of the methods and the validity of the results, this book offers concise mathematical descriptions of many multivariate methods and employs graphical schemes to visualize key concepts. It effectively imparts a basic understanding of how to apply statistical methods to multivariate scientific data.

Manhunters Colin Wilson, 2014-07-01 Author Colin Wilson opens this illuminating psychological discussion with the development of the 1977 Behavioral Science Unit, which was set up in order to answer the many questions surrounding serial killers: How does someone become a serial killer? How do they choose their victims, and why do they not feel remorse? How are they caught? Wilson interviews FBI Special Agent Robert Ressler, coiner of the term “serial killer” and one of the pioneers of criminal profiling, as well as Ted Bundy and Charles Manson in order to figure out the motives behind their grisly actions. In *Manhunters*, by tracking the BSU's development of psychological profiling and genetic fingerprinting, Wilson reveals the forensic investigations that caused the seizure and arrest of some of the most vile and villainous people in the world, including Jeffrey Dahmer, William Heirens, Peter Sutcliffe, John Duffy, Jerry Brudos, Wayne Williams, and many more. As he divulges the details of each case, the murderers' fantasy worlds, sadistic motives, and monstrous psychological tendencies emerge.

The Serial Killers Colin Wilson, Donald Seaman, 2011-05-31 As the number of serial killers worldwide has risen steadily - from the emergence of Jack the Ripper in 1888 to Harold Shipman and Ivan Milat, the backpacker killer of the Australian outback - the need to understand mass murder is becoming more urgent. Using privileged access to the world's first National Centre for the Analysis of Violent Crime, Colin Wilson and Donald Seaman bring you this incisive study of the psychology of serial killers and the motives behind their crimes. From childhood traumas to issues of frustration, fear and fantasy, discover what turns an ordinary human being into a compulsive killer.
