The Power of the Past Jessi Streib, 2015 'The Power of the Past' advances the notion that intimate life - marriage and ideas of how to best live - is closely linked to the class in which individuals were raised. Arguing against the notion that class is a meaningless category or that college degrees erase childhood inequalities, this book describes the ways that the class of individuals' past influences their identities and marriages.

Brokerage and Closure Ronald S. Burt, 2007-09-06 Social Capital, the advantage created by location in social structure, is a critical element in business strategy. Who has it, how it works, and how to develop it have become key questions as markets, organizations, and careers become more and more dependent on informal, discretionary relationships. The formal organization deals with accountability; Everything else flows through the informal: advice, coordination, cooperation friendship, gossip, knowledge, trust. Informal relations have always been with us, they have always mattered. What is new is the range of activities in which they now matter, and the emerging clarity we have about how they create advantage for certain people at the expense of others. This is done by brokerage and closure. Ronald S. Burt builds upon his celebrated work in this area to explore the nature of brokerage and closure. Brokerage is the activity of people who live at the intersection of social worlds, who have a vision advantage of seeing and developing good ideas, an advantage which can be seen in their compensation, recognition, and the responsibility they're entrusted with in comparison to their peers. Closure is the tightening of coordination in a closed network of people, and people who do this do well as a complement to brokers because of the trust and alignment they create. Brokerage and Closure explores how these elements work together to define social capital, showing how in the business world reputation has come to replace authority, pursued opportunity assignment, and reward has come to be associated with achieving competitive advantage in a social order of continuous disequilibrium.

The Stag Hunt and the Evolution of Social Structure Brian Skyrms, 2004 The possibility of a successful solution depends on the coevolution of cooperation and social structure. Brian Skyrms focuses on three factors that affect the emergence of such structure and the facilitation of collective action: location (interactions with neighbors), signals (transmission of information), and association (the formation of social networks).--Jacket.

Fast Scanning Calorimetry Christoph Schick, Vincent Mathot, 2016-06-28 In the past decades, the scan rate range of calorimeters has been extended tremendously at the high end, from approximately 10 up to 10 000 000 °C/s and more. The combination of various calorimeters and the newly-developed Fast Scanning Calorimeters (FSC) now span 11 orders of magnitude, by which many processes can be mimicked according to the time scale(s) of chemical and physical transitions occurring during cooling, heating and isothermal stays in case heat is exchanged. This not only opens new areas of research on polymers, metals, pharmaceuticals and all kinds of substances with respect to glass transition, crystallization and melting phenomena, it also enables in-depth study of metastability and reorganization of samples on an 1 to 1000 ng scale. In addition, FSC will become a crucial tool for understanding and optimization of processing methods at high speeds like injection molding. The book resembles the state-of-the art in Thermal Analysis & Calorimetry and is an excellent starting point for both experts and newcomers in the field.

Nanozymes: Next Wave of Artificial Enzymes Xiaoyu Wang, Wenjing Guo, Yihui Hu, Jiangjiexing Wu, Hui Wei, 2016-07-27 This book describes the fundamental concepts, the latest developments and the outlook of the field of nanozymes (i.e., the catalytic nanomaterials with enzymatic characteristics). As one of today's most exciting fields, nanozyme research lies at the interface of chemistry, biology, materials science and nanotechnology. Each of the book's six chapters explores advances in nanozymes. Following an introduction to the rise of nanozymes research in the course of research on natural enzymes and artificial enzymes in Chapter 1, Chapters 2 through 5 discuss different nanomaterials used to mimic various natural enzymes, from carbon-based and metal-based nanomaterials to metal oxide-based nanomaterials and other nanomaterials. In each of these

chapters, the nanomaterials' enzyme mimetic activities, catalytic mechanisms and key applications are covered. In closing, Chapter 6 addresses the current challenges and outlines further directions for nanozymes. Presenting extensive information on nanozymes and supplemented with a wealth of color illustrations and tables, the book offers an ideal guide for readers from disparate areas, including analytical chemistry, materials science, nanoscience and nanotechnology, biomedical and clinical engineering, environmental science and engineering, green chemistry, and novel catalysis.

Isles of Refuge Mark J. Rauzon,2000-11-01 In *Isles of Refuge*, the first book solely devoted to the Northwestern Hawaiian Islands, field biologist Mark Rauzon shares his extensive, first-hand knowledge of their natural history while providing an engaging narrative of his travels. Braving seasickness, bad weather, and biting bird ticks, he journeyed from Nihoa to Kure to study and photograph plants and animals for the U.S. Fish and Wildlife Service: rare palms, sharks, turtles, seals, and thousands of birds--finches, terns, petrels, noddies, shearwaters, curlews, boobies, tropicbirds, ducks, and albatrosses, or gooneys, famed throughout the Pacific for their flying prowess and bizarre breeding rituals. Isolation and access restrictions have led to the recovery of many of the Northwestern Hawaiian Islands' animal and plant populations to pre-exploitation levels, but they have also resulted in the general public's ignorance of the islands and their ecosystems. Informative and enjoyable, *Isles of Refuge* invites readers to learn more about the history and natural wonders of this invaluable resource.

Finding Meaning Brandy Nalani McDougall,2016-06-03 Winner of the Native American Literature Symposium's Beatrice Medicine Award for Published Monograph The first extensive study of contemporary Hawaiian literature, *Finding Meaning* examines kaona, the practice of hiding and finding meaning, for its profound connectivity. Through kaona, author Brandy Nalani McDougall affirms the tremendous power of Indigenous stories and genealogies to give lasting meaning to

decolonization movements.

Place Names of Hawaii Mary Kawena Pukui, Samuel H. Elbert, Esther T. Mookini, 1976-12-01 How many place names are there in the Hawaiian Islands? Even a rough estimate is impossible. Hawaiians named taro patches, rocks, trees, canoe landings, resting places in the forests, and the tiniest spots where miraculous events are believed to have taken place. And place names are far from static-- names are constantly being given to new houses and buildings, streets and towns, and old names are replaced by new ones. It is essential, then, to record the names and the lore associated with them now, while Hawaiians are here to lend us their knowledge. And, whatever the fate of the Hawaiian language, the place names will endure. The first edition of *Place Names of Hawaii* contained only 1,125 entries. The coverage is expanded in the present edition to include about 4,000 entries, including names in English. Also, approximately 800 more names are included in this volume than appear in the second edition of the *Atlas of Hawaii*.

Repair of Concrete Pavements National Research Council (U.S.). Highway Research Board. Annual Meeting, 1962 Paper 1 evaluates the use of welded wire fabric reinforcement to alleviate rutting and/or shoving of pavement at intersections, and compares the effectiveness of extra thickness of asphaltic concrete overlays over portland cement concrete vs the use of welded wire reinforcement in the asphaltic concrete overlay to control reflection cracking in the asphaltic concrete surface. Paper 2 concerns a method of controlling reflection cracks in bituminous concrete overlays over the transverse joints of rigid pavements. Paper 3 concerns the experiences in district no. 4 of the New York State Department of Public Works with the salvage and restoration of old concrete pavements. Paper 4: Maintenance programs during the first 8 years of commercial airline operation at Willow Run Airfield are described.

Privilege Lost Jessi Streib, 2020 One in two white youth born into the upper-middle-class will fall from it. Drawing upon ten years of longitudinal interviews with over 100 American youth, this book shows which upper-middle-class youth are most likely to fall, how they fall, and why they do not see it coming. The book shows that upper-middle-class youth inherit different amounts of academic knowledge, institutional insights, and money from their parents. Those raised with more resources enter class reproduction pathways, while those raised with fewer resources enter downwardly mobile paths. Of course, upper-middle-class youth whose families give them few resources could switch courses by drawing upon the resources in their community. They rarely do. Instead, they internalize identities that reflect their resource weaknesses and encourage them to maintain them. Those who fall are then youth raised with resource weaknesses and they fall by internalizing identities that encourage them to maintain them. They are often surprised by their downward mobility as they observed other time periods in which their resources and identities kept them or their parents in their class--
