**A Glossary of Words Used in the Wapentakes of Manley and Corringham,
Lincolnshire** Edward Peacock, 1889

Her Lost Words Stephanie Marie Thornton, 2023-03-28 From A Vindication of the Rights of Woman to Frankenstein, a tale of two literary legends—a mother and daughter—discovering each other and finding themselves along the way, from USA Today bestselling author Stephanie Marie Thornton. 1792. As a child, Mary Wollstonecraft longed to disappear during her father's violent rages. Instead, she transforms herself into the radical author of the landmark volume A Vindication of the Rights of Woman, in which she dares to propose that women are equal to men. From conservative England to the blood-drenched streets of revolutionary France, Mary refuses to bow to society's conventions and instead supports herself with her pen until an illicit love affair challenges her every belief about romance and marriage. When she gives birth to a daughter and is stricken with childbed fever, Mary fears it will be her many critics who recount her life's extraordinary odyssey... 1818. The daughter of infamous political philosopher Mary Wollstonecraft, passionate Mary Shelley learned to read by tracing the letters of her mother's tombstone. As a young woman, she desperately misses her mother's guidance, especially following her scandalous elopement with dashing poet Percy Bysshe Shelley. Mary struggles to balance an ever-complicated marriage with motherhood while nursing twin hopes that she might write something of her own one day and also

discover the truth of her mother's unconventional life. Mary's journey will unlock her mother's secrets, all while leading to her own destiny as the groundbreaking author of *Frankenstein*. A riveting and inspiring novel about a firebrand feminist, her visionary daughter, and the many ways their words transformed our world.

An Essay Concerning Human Understanding John Locke, 2004 Published in 1689, Locke's pioneering investigation into the origins, certainty, and extent of human knowledge set the groundwork for modern philosophy and influenced psychology, literature, political theory, and other areas of human thought and expression. Locke draws on the philosophy of perception, empirical beliefs, and natural sciences to explain how we acquire knowledge and form the beliefs we do, how and why there are unavoidable limits to human knowledge, and how, despite these limitations, we can strive to learn more about ourselves and our universe.

Cognitive Processing of the Chinese and the Japanese Languages C.K.

Leong, Katsuo Tamaoka, 1998-12-31 The area of cognitive processing of Chinese and Japanese is currently attracting a great deal of attention by leading cognitive psychologists. They aim to find out the similarities and differences in processing the morphosyllabic Chinese and Japanese syllabary as compared with alphabetic language systems. Topics under the processing of Chinese include: the use of phonological codes in visual identification of Chinese words, the constraint on such phonological activation, recognition of Chinese homophones, Chinese sentence comprehension and children's errors in writing Chinese characters. Topics under the processing of Japanese include: the automatic recognition of kanji within an interactive-activation framework, On-reading and Kun-reading of kanji characters, processing differences between hiragana and kanji, the effect of polysemy on katakana script, and the writing behavior of Japanese and non-Japanese speakers. The interactive-activation model provides the phonologic-orthographic links in processing both language systems. The present volume should add greatly to our understanding of this topic. Many of the contributors are internationally known for their experimental psychological work.

Contrastive Studies in Construction Grammar Hans C. Boas, 2010-11-11 The papers in this volume provide a contrastive application of Construction Grammar. By referencing a well-described constructional phenomenon in English, each paper provides a solid foundation for describing and analyzing its constructional counterpart in another language. This approach shows that the semantic description (including discourse-pragmatic and functional factors) of an English construction can be regarded as a first step towards a tertium comparationis that can be employed for comparing and contrasting the formal properties of constructional counterparts in other languages. Thus, the meaning pole of constructions should be regarded as the primary basis for comparisons of constructions across languages – the form pole is only secondary. This volume shows that constructions are viable descriptive and analytical tools for cross-linguistic comparisons that make it possible to capture both language-specific (idiosyncratic) properties as well as cross-linguistic generalizations.
